Total actual interviewing time 3 1/4 hours

Form of introduction

"My name is X. I'm from Essex/London University. We're preparing a report (writing a book) about standards of living in Britain today and how families manage. We think it's important for the Government and everyone else to know what the facts really are. We're hoping to talk to about 3,000 families throughout the country and I'd be very grateful if you could help us by answering some questions. All our information is, of course, strictly confidential."

QUESTION 5

Note that the recent Industrial Employment Act gives employers the responsibility of notifying employees about certain terms of service. Many employees will have received some kind of notification.

QUESTION 6 Whether sick pay

Include only when employer pays cash directly to an employee who is sick. Contributions towards medical care costs come under Q. 11. Ideally we would like to have details of sick pay expected and length of time employer is expected to go on paying. (Sometimes a man is paid one proportion of pay for 3 months and then a lower proportion for a further 3 months.) Many informants, however, will not know and you should do your best to get a general idea at least of the **starting level** for the first month, recording underneath more specific information if known.

Sick pay amount What should be entered here is costs paid by employer. Sickness benefit should not be included even though employers contribute towards it. Earnings means **earnings before tax**.

QUESTION 7 Pension

Include any type of occupational pension, contributory or non-contributory, funded or unfunded.

QUESTION 7a Employee's contribution

Note that we are not attempting to establish what the employer pays, because many informants will not know. We require amount paid (preferably) or per cent of earnings **before tax**: many schemes are not of the type that the employer pays a fixed proportion of earnings. In these instances, code "None" or "Does not apply", according to the information you are given. When given a percentage note that it may be calculated on basic wages rather than earnings and you should note this so that we can adjust the figure in the office. Estimate the proportion of normal earnings the previous contribution amounts to — correct to nearest percentage point unless respondent names half a percentage point.

QUESTION 7b Pensionable age

That is, the age at which the pension is first payable.

QUESTION 7c Years towards pension

Do not count any years towards another pension in a previous employment unless those years have been accepted by the present employer as counting towards the pension from his employment.

QUESTION 7d Amount of pension

The question refers to the total occupational pension, though part of the cost may be paid by the informant. If the informant knows more details about his entitlement enter information in box (e.g. two-thirds of salary in last 5 years of service).

QUESTION 8 Meal vouchers

You may have to build up towards the average weekly value by asking "How much is each voucher worth?", "How many do you use in an average week?". Generally vouchers are additional to wage or salary but sometimes the employer will include them on a pay slip as part of earnings received. Watch that you do not count their value both here and later under net earnings.

QUESTION 9 Subsidised meals

Meals include drinks that may accompany them though we think it might cause offence to ask this in a formal question. We are interested to learn of anything from subsidised canteen meals to expense account lunches and dinners.

QUESTION 9a Saving on meals

Note that we are seeking an estimate of the difference between the actual cost to the employee and what he would have spent in the ordinary way if there were no subsidised canteen or restaurant available, or if his work did not allow him to charge the cost of outside meals. We are not seeking an estimate of the real value of the meals. Since some employees may not spend more outside on a poorer meal than they spend inside for a subsidised one, some entries may be "0" shillings.

2nd
a weeks full
pay per week
for every
year with
firm.

QUESTION 20 Miscellaneous allowances and cash income

The various kinds of income have been laid out as compactly as possible but remember that two or more may need to be coded and you should prompt carefully. Underneath describe the type of allowance (so that we know to which code a particular amount refers) and the amount per week or per month. Ring either "1" or "2" depending on whether the allowance did in fact cover last week and strike out "Before" or "After" tax as appropriate. Make sure that in the case of allowances of husbands temporarily away from home that you have not already written in his earnings earlier as a member of the household. If you have do not write in any amount he pays. All we want here is any income which is not covered by earlier entries.

QUESTION 20(b) Allowances for separated and divorced wives

Some wives receive money direct from their husbands (or via the court). Others have court orders but these are signed over to the Supplementary Benefits Commission, which collects the money and pays the mother a standard weekly allowance. We therefore want to avoid counting the amount in Q. 20 if that amount is already included in the figure for supplementary benefit listed under Q. 15. We also want to be able to sort out irregular payments of both money from court orders and supplementary benefit. Check carefully in all these instances and write a note if anything needs clarification. Fatherless families form a small proportion of the total sample of households. Where money from court orders is paid irregularly and the mother claims weekly from the Supplementary Benefits Office she might not always claim the full amount, or may delay her claim in which case she loses benefit. Check to see if such loss is occurring.

QUESTION 21 Allowances and sums paid to others

This question complements some of the sub-questions in Q. 20. Here we are concerned to find out about all cash payments or allowances amounting to at least 10s. a week or £25 a year. Note that married children frequently pay rent or bills for elderly parents and old people sometimes make considerable cash gifts to their children. Examples are payments for grandchildren's clothing or holidays, payment of T.V. rentals and licence, cash gift for car.

QUESTION 22 Tax relief

Our object is to gain further evidence about reciprocal aid but also to help us in interpreting the figures for earnings and deductions given earlier. Note that you are not expected to probe for amounts.

QUESTION 23

Property income is considerable for a small percentage of informants and tends to be of two types: income from only one or two houses and income from a range of properties. With a few people considerable time may need to be spent on getting a reliable answer to this question. Net income after tax may not be known so we deliberately seek gross income before tax, then expenses, and only finally income after tax. You may not be able to get the third but make sure you get a figure for the first. It may also be difficult to secure a figure for expenses of rates and repairs but remember that property-owners will often know the total sums entered on their income tax returns. It may even be helpful to remind informants of this: "I mean the total like that in your income tax return — gross income less expenses." Note that many owner-occupiers and tenants rent rooms and flats to others in their accommodation. Do not count the rent from a boarder living in the household.

expenses of
owner occupier
house.*

QUESTION 25(a) Private and business accommodation

Count as "business" accommodation any accommodation which counts for purposes of offsetting tax. This may include a study room for some teachers, for example.

QUESTION 25(e) Rate rebate or reduction

Note that many councils pay rebates twice a year.

QUESTION 25(h) Mortgage

The informant may know the total sum paid in the previous year but not the division of the sum between interest and repayments of principal. Yet it is essential for us to find how much of the payment represents capital repayments and how much interest payments, because otherwise we cannot work out housing costs which are comparable with costs incurred by households paying rent. In many instances a monthly or annual payment slip will show the two amounts and the informant should be encouraged to look this up. Note that if the informant still **cannot** give you the answer we have provided certain questions on the right-hand side of the page which will allow us to make a reliable estimate. You should note certain details in the

- (a) source of loan or mortgage;
- (b) term of repayment;
- (c) number of years paid;
- (d) amount of loan.

Please make special note if the repayment of a mortgage is covered by an endowment policy and note the amount and frequency of the premium. As elsewhere put a tick in the small box or make a note if you are fortunate enough to be shown documents.

QUESTION 25(i) Value of house/flat

Ask for an estimate and only show Flashcard No. 3 if the informant hesitates in giving an answer and you judge that it would be appropriate. Always insert the code number as given on the Flashcard, even if you also obtain an exact estimate.

QUESTION 25(l) Government's Mortgage Scheme

Note that, broadly, this is advantageous only to a householder with relatively low income who does not expect to pay tax at the standard rate in the foreseeable future.

QUESTION 14 Fuel

Everyone forgets to order coal. Stress "through lack of money".

QUESTION 15 Birthday parties

Again the emphasis is on the expense and the experience of bringing the child's friends into the home, so stress that we don't mean just a family party.

QUESTION 17 (a) Social class

This question requires the views of both chief wage-earner (head of household) and housewife. By "chief wage-earner" we mean the person upon whose earnings the housekeeping income primarily depends. By "Head of Household" we have in mind the alternative person to be questioned if there is no chief wage-earner, e.g. a husband who is a retirement pensioner, or a widowed mother (who may be the tenant) living with her widowed daughter (the housewife) and grandchildren. As far as possible the views on social class should be sought from each person independently. If both are present take the question stage by stage, making sure both answer before passing on. The question asks first for a self-rating, which must be written down. At this stage avoid putting names of classes into people's heads. People often hesitate awkwardly, so try to get the informant to say what class she thinks she belongs to or "is nearest to". Prompt by repeating the question carefully, and say "It's what you think", implying (which is true) that everyone has their own idea and each is equally valid. Do not strain to get an answer if one is not easily forthcoming. Do not assume the informant will pick one class only. Multiple choices of "middle and working" or "professional and working" are allowed.

QUESTION 17 (b) Determinant of class

Code housewife and chief wage-earner only. Next, to give us a clue as to what the informant is using as a reference point and scale we ask, in effect, the informant's idea of what determines "class". Try to get the most important one only.

QUESTION 17 (c) Names of classes

Third, the informant is presented with a flash-card (this is why husband and wife should if possible be interviewed separately, since otherwise the second person may be unduly influenced). Code one item only. If informant wants (again) to say "None", say "Well, I've got to put something down, which would you think was nearest?" This rating is the most important bit of the question. Do not be puzzled if the wife gives a different answer from the husband. This is quite common.

QUESTION 17 (d) Father's main occupation

That is, the occupation held for most of the time (not necessarily the most recent).

QUESTION 18 Well off

Four comparisons are made in this series of questions—with relatives, with other people (note—of the same age) in locality, with the average in the country and finally in the context of time. Prompt carefully and remember that you might get a different response for one comparison than for another.
