QUESTION 8(d) — Length of housing problem

Number of years should not include any period before the age of 21.

QUESTION 9 — Structural defects

Note that the need for redecoration and refurnishing is not included. Informants may vary in their interpretation of a "defect" (for example, a woman living in a modern house may complain of small damp spots on the walls) but apart from discouraging people from regarding minor blemishes as defects you should accept what informants say.

QUESTION 9

Television: combined television, radio and record-playing sets may be listed under separate headings.

Central heating: uniform heating throughout dwelling (or part of dwelling) occupied by household.

*Question 9.
Are waiting
for telephone
to be put in*

QUESTION 5

Note that the recent Industrial Employment Act gives employers the responsibility of notifying employees about certain terms of service. Many employees will have received some kind of notification.

QUESTION 6 Whether sick pay

Include only when employer pays cash directly to an employee who is sick. Contributions towards medical care costs come under Q. 11. Ideally we would like to have details of sick pay expected and length of time employer is expected to go on paying. (Sometimes a man is paid one proportion of pay for 3 months and then a lower proportion for a further 3 months.) Many informants, however, will not know and you should do your best to get a general idea at least of the starting level for the first month, recording underneath more specific information if known.

Sick pay amount What should be entered here is costs paid by employer. Sickness benefit should not be included even though employers contribute towards it. Earnings means earnings before tax.

QUESTION 7 Pension

Include any type of occupational pension, contributory or non-contributory, funded or unfunded.

QUESTION 7a Employee's contribution

Note that we are not attempting to establish what the employer pays, because many informants will not know. We require amount paid (preferably) or per cent of earnings before tax: many schemes are not of the type that the employer pays a fixed proportion of earnings. In these instances, code "None" or "Does not apply", according to the information you are given. When given a percentage note that it may be calculated on basic wages rather than earnings and you should note this so that we can adjust the figure in the office. Estimate the proportion of normal earnings the previous contribution amounts to — correct to nearest percentage point unless respondent names half a percentage point.

QUESTION 7b Pensionable age

That is, the age at which the pension is first payable.

QUESTION 7c Years towards pension

Do not count any years towards another pension in a previous employment unless those years have been accepted by the present employer as counting towards the pension from his employment.

QUESTION 7d Amount of pension

The question refers to the total occupational pension, though part of the cost may be paid by the informant. If the informant knows more details about his entitlement enter information in box (e.g. two-thirds of salary in last 5 years of service).

2nd has not joined pension scheme yet as has not been at present job for a full year yet. Details of scheme not known

QUESTION 8 Meal vouchers

You may have to build up towards the average weekly value by asking "How much is each voucher worth?", "How many do you use in an average week?". Generally vouchers are additional to wage or salary but sometimes the employer will include them on a pay slip as part of earnings received. Watch that you do not count their value both here and later under net earnings.

QUESTION 9 Subsidised meals

Meals include drinks that may accompany them though we think it might cause offence to ask this in a formal question. We are interested to learn of anything from subsidised canteen meals to expense account lunches and dinners.

QUESTION 9a Saving on meals

Note that we are seeking an estimate of the difference between the actual cost to the employee and what he would have spent in the ordinary way if there were no subsidised canteen or restaurant available, or if his work did not allow him to charge the cost of outside meals. We are not seeking an estimate of the real value of the meals. Since some employees may not spend more outside on a poorer meal than they spend inside for a subsidised one, some entries may be "0" shillings.

QUESTION 10 Personal use

Includes transport to and from work.

QUESTION 10a Normal repairs

Excludes repairs caused by negligence of informant or family. **Make and type** — e.g. Vauxhall Cresta, Saloon or Morris 15 cwt. van. The description should be enough for us to look up its second-hand value as a check on the value.

QUESTION 10d Driver

This is a polite way of ascertaining whether the car is chauffeur-driven. Thus Code X includes self, family, friends and other employees driving for pleasure and not because they are paid to drive the respondent around.

QUESTION 11 Other benefits

Read the prompts slowly: they are carefully drafted to cover the perks of both senior and junior staff. **The goods** may vary from free or subsidised coal given to miners to discounts on goods bought or free vegetables, seeds or seedlings. Don't hesitate to pursue it further according to occupations of informants. **Transport** may be free leisure travel given to railway or bus employees or paid holidays given to senior executives. Note this section is supplementary to the use of a vehicle in Q. 10. **Medical expenses** may be premiums to insurance agencies for private medical care or the direct payment of doctors' bills. **Education** can range from free tennis lessons or typing lessons to payment of public school fees. **Shares in the company** can be given free or below market value.

ENCOURAGE THE INFORMANT to add items under the various headings together and give time for this to be done. We are interested to know what it would cost to buy these things privately even though the employee might not have chosen to do so (e.g. the employee might have used the Health Service if his employer did not pay for him to have private medical care).

"How much a year are these things worth altogether?"

The point here is that some kinds of entries will be money saved, say, on goods and services which the informant would have had to pay for, whereas other entries will involve things he would never have afforded or thought about. Our aim is to discover what equivalent in extra income would be needed if he did the same things but had to bear the full cost himself.

QUESTION 13 Satisfaction with job

The questions are laid out in a form which equally encourage positive or negative answers. You may shorten the question to "Are you satisfied or dissatisfied with _____" providing the informant seems to be genuinely weighing the alternatives.

Facilities at work means facilities as asked under Q. 3 earlier.

*Question 10(c)
Infr. aids¹ know
figure but said
proportion was very
very small compared
to total mileage*

QUESTION 25(a) Private and business accommodation

Count as "business" accommodation any accommodation which counts for purposes of offsetting tax. This may include a study room for some teachers, for example.

QUESTION 25(e) Rate rebate or reduction

Note that many councils pay rebates twice a year.

QUESTION 25(h) Mortgage

The informant may know the total sum paid in the previous year but not the division of the sum between interest and repayments of principal. Yet it is essential for us to find how much of the payment represents capital repayments and how much interest payments, because otherwise we cannot work out housing costs which are comparable with costs incurred by households paying rent. In many instances a monthly or annual payment slip will show the two amounts and the informant should be encouraged to look this up. Note that if the informant still **cannot** give you the answer we have provided certain questions on the right-hand side of the page which will allow us to make a reliable estimate. You should note certain details in the

- (a) source of loan or mortgage;
- (b) term of repayment;
- (c) number of years paid;
- (d) amount of loan.

Please make special note if the repayment of a mortgage is covered by an endowment policy and note the amount and frequency of the premium. As elsewhere put a tick in the small box or make a note if you are fortunate enough to be shown documents.

Inf't did not know →

QUESTION 25(i) Value of house/flat

Ask for an estimate and only show Flashcard No. 3 if the informant hesitates in giving an answer and you judge that it would be appropriate. **Always** insert the code number as given on the Flashcard, even if you also obtain an exact estimate.

QUESTION 25(l) Government's Mortgage Scheme

Note that, broadly, this is advantageous only to a householder with relatively low income who does not expect to pay tax at the standard rate in the foreseeable future.

QUESTION 9 Staying overnight

The question concentrates on holidays and stays which are directly or indirectly paid for or subsidised by relatives and friends. It may be difficult to obtain an estimate of saving. We have in mind not only the instance of holiday but also an elderly person or a child staying with a member of the family for a lengthy period of the year during a time of loneliness or financial difficulty. Note that space allows only 8 columns on this page. In the unlikely event of interviewing in a household with 9 or 10 persons write in the details for the 9th and 10th persons lower on the page.

QUESTION 9 (b) Saving

Note that there are two alternatives in the question. The saving from staying in a relative's or a friend's home should be estimated in terms of the comparable cost of living at home. The saving from being taken on holiday should be estimated in terms of the cost of going on holiday on one's own.

QUESTION 10 Visitors

This question reverses Q. 9 but estimates of cost should be written into the column allocated for the housewife.

Question 10 (a)
Number in
Infra column
is total number
of all visits
to household.

QUESTION 14 Fuel

Everyone forgets to order coal. Stress "through lack of money".

QUESTION 15 Birthday parties

Again the emphasis is on the expense and the experience of bringing the child's friends **into the home**, so stress that we don't mean just a family party.

QUESTION 17 (a) Social class

This question requires the views of both chief wage-earner (head of household) and housewife. By "chief wage-earner" we mean the person upon whose earnings the housekeeping income primarily depends. By "Head of Household" we have in mind the **alternative** person to be questioned if there is no chief wage-earner, e.g. a husband who is a retirement pensioner, or a widowed mother (who may be the tenant) living with her widowed daughter (the housewife) and grandchildren. As far as possible the views on social class should be sought from each person independently. If both are present take the question stage by stage, making sure both answer before passing on. The question asks first for a self-rating, which must be written down. At this stage **avoid putting names of classes into people's heads**. People often hesitate awkwardly, so try to get the informant to say what class she thinks she belongs to or "is nearest to". Prompt by repeating the question carefully, and say "It's what you think", implying (which is true) that everyone has their own idea and each is equally valid. Do not strain to get an answer if one is not easily forthcoming. Do not assume the informant will pick one class only. Multiple choices of "middle and working" or "professional and working" are allowed.

QUESTION 17 (b) Determinant of class

Code housewife and chief wage-earner only. Next, to give us a clue as to what the informant is using as a reference point and scale we ask, in effect, the informant's idea of what determines "class". Try to get the most important one only.

QUESTION 17 (c) Names of classes

Third, the informant is presented with a flash-card (this is why husband and wife should if possible be interviewed separately, since otherwise the second person may be unduly influenced). Code one item only. If informant wants (again) to say "None", say "Well, I've got to put something down, **which would you think was nearest?**" This rating is the most important bit of the question. Do not be puzzled if the wife gives a different answer from the husband. This is quite common.

QUESTION 17 (d) Father's main occupation

That is, the occupation held for most of the time (not necessarily the most recent).

QUESTION 18 Well off

Four comparisons are made in this series of questions—with relatives, with other people (note—of the same age) in locality, with the average in the country and finally in the context of time. Prompt carefully and remember that you might get a different response for one comparison than for another.

Questions 17-18
Was not able to
get Husband's
Opinions.

QUESTION 19 Housekeeping and board

The question refers to ALL INCOME RECIPIENTS including pensioners, as well as earners, who contribute to the housekeeping expenses. Be careful that you probe for everyone in the house, including adolescent earners. Sometimes the actual sum available for housekeeping will be quite different from that suggested by the total income of the household. The husband or teenagers may retain quite large sums not only for their own use but because the pattern of responsibility in one household for expenditure may be different from that in another household which has the same composition. Housekeeping can be a touchy point if both husband and wife are present, and it is perhaps best dealt with by interviewing one of them on their own (the housewife preferably) and, if possible, checking later with the other (the husband). If both husband and wife are present avoid expressing any surprise or criticism if you think the housekeeping is small. Also avoid indicating any opinion on the question of whether wage-earners should pay bills. Try to imply that all arrangements are equally possible. We have listed the common ones, but there will be others. REMEMBER TO CODE EACH INCOME RECIPIENT.

QUESTION 19 (b) Money back

This can be daily fares, insurances or clubs paid, dinner money, or simply "spending money". Some teenagers hand over their wages but get clothing bought. Usually this question will apply to teenagers, but some husbands may get money from the housekeeping for their cigarettes and beer mid-week.

QUESTION 19 (c) Payment of housekeeping bills

Often the husband will pay some larger bills, but alternatively he may pay housekeeping but expect to "help out" if a heavy bill comes in. We realise that an estimate may be rough but try to get an average contribution. Teenage children may buy food as "treats" for the household from the money they retain. Again try for an average.

QUESTION 20 Long-term saving

We are not interested in asking here whether the informant has savings (that was asked in Section V). Nor are we interested here in asking for short-term saving. Instead the question explores whether at the present time the informant manages to put aside savings for a long-term objective.

QUESTION 21 Ten years ago

To give us some idea of fluctuating fortunes we ask what things were like ten years ago. Some persons aged 35 or over will have been at home in their parents' households ten years ago and therefore we have to find what was the composition of the household. In any case, we require an estimate of the total money flowing into the household, and the number of adults and children that were supported at that time. Give the informant time to recollect. And check that income includes pensions, family allowances, etc. Fortunately, the informant will already have some idea of what you are after from the detailed questions asked earlier.

*I was not sure
whether I
would get to
see husband so
I took Hoxsewitz
opinions. It
later transpired
that I didn't
interview him.*

~~At [unclear] 21
[unclear]
[unclear]
[unclear]~~

QUESTION 23 Poor now

Stress genuinely and try to avoid facetiousness at this point. Question 23 (a) explores what the informant understands by feeling "poor". If the word "poor" seems inappropriate use the alternative "very hard up".

QUESTION 24 Poverty

Stress the word "poverty". Do not explain what you think it means if you are asked. Seek from the informant his definition and write it in the box as clearly as you can.

QUESTION 25 Voting

Ask for those old enough to have voted in the last election (March 1965). We are not concerned who they voted for (although they will probably say) but would like to know if they are sufficiently involved to vote at all. Be careful to reassure people that this is confidential and as far as you are concerned non-voting is blameless—many people consider that voting is legally compulsory or morally obligatory and so voting figures are over-estimated. Try to get a clear recollection by fixing the incident (time of day, who they went with) if necessary. Stress **National**, not local elections.

QUESTION 26 Action on poverty

We are interested in what the informant thinks can be done. Give as full an answer as possible.

Please write in any additional notes.

I couldn't see the husband in this family as he leads very irregular hours of working and the wife wasn't prepared to commit herself to allowing me to come on a Sunday partly because they often go out. I left the forms for him to fill in his income & assets but when I returned later in the next week his wife said he had^{n't} been interested, or hadn't wanted to fill them in. She refused again to give a rough estimate of their savings and assets so I felt I had to leave it at that.
