Form of introduction

"My name is X. I'm from Essex/London University. We're preparing a report (writing a book) about standards of living in Britain today and how families manage. We think it's important for the Government and everyone else to know what the facts really are. We're hoping to talk to about 3,000 families throughout the country and I'd be very grateful if you could help us by answering some questions. All our information is, of course, strictly confidential."

HOUSING AND LIVING FACILITIES

General

Information recorded by the interviewer on the left of the main column is needed so that the circumstances of the household may be fully understood by those in the office but it may not be required for computer-analysis.

QUESTION 1 — Rooms

No room should be listed twice. Bedsitters should be listed as bedrooms and not also as living-rooms. Do not count a scullery or a hall or a bathroom as a room. The total number of living and dining and bedrooms should not include a kitchen if it is not large enough for a family to eat in. You will see that there are two numbered boxes in the column in which to write the numbers of bedrooms and total numbers of rooms. Each is for each digit in the total: Thus, if there are 9 or fewer rooms the number should be written in the right-hand box and "0" should be written in the left-hand box. If there are, say, 13 rooms, then "1" should be written in the left-hand and "3" in the right hand box. This will help us to avoid mistakes in transferring information to the computer.

QUESTION 2 — Additional or fewer rooms

Define "room" as above.

QUESTION 4

A water closet flushed by water. Chemical or earth closets are not included, nor are flush water closets which can only be reached by going outdoors across a yard, even if under cover.

QUESTION 5

A garden is any space at the front or back of the house where it is possible to grow something. A yard is an outdoor space which is covered in concrete, asphalt, etc., where there are no plants or lawn other than in boxes or barrels (if any).

If you have already seen the garden it may be unnecessary to ask the second part of the question, for it may be possible to code 3, 4 or 5. But be sure that you are taking back as well as front garden into the reckoning. Add the two together in estimating size.

this accommodation consists of one kitchen cum living room, on the ground floor, and two rooms above reached by a ladder through trap-door in roof - lorry ceiling immediately above front door. the housewife said she had next had a big family - 3 girls only and the amount of space was sufficient!!

Andrew had made an earth closet in garage, no w.c. (flush)

Margaret said bit of Nothing was
damp on one wall.

QUESTION 8(d) — Length of housing problem

Number of years should not include any period before the age of 21.

QUESTION 9 — Structural defects

Note that the need for redecoration and refurnishing is not included. Informants may vary in their interpretation of a "defect" (for example, a woman living in a modern house may complain of small damp spots on the walls) but apart from discouraging people from regarding minor blemishes as defects you should accept what informants say.

QUESTION 9

Television: combined television, radio and record-playing sets may be listed under separate headings.

Central heating: uniform heating throughout dwelling (or part of dwelling) occupied by household.

CURRENT MONETARY INCOME

General

This section asks questions in turn of the employed, the self-employed and then everyone, including those who are not employed. Our object is to obtain reliable estimates of income, before and after tax, for each income unit in the household, both for "last week" and "the last 12 months".

Income Unit

This is any person aged 15 or over, or if in full-time education any person aged 19 or over, together with wife or husband (if she or he has one) and children under 15 (or aged 16-18 if in full-time education), if any. According to this definition a man, wife, and children aged under 15 count as one income unit, but a middle-aged widow and a son who is a university student, or an elderly widow and a single daughter of 40, count as two income units. A household consisting of man and wife with three single children who are all over 15 years of age and who are at work counts as four income units.

Allocating Income

Usually amounts of income can be entered in the appropriate column, according to the person receiving it. Do not enter any income twice. Do not, for example, enter a particular amount both for the wife and the husband. Nor need you split up any amount part of which is payable for a dependent wife or child. Thus, do not attempt to divide up the total of family allowances; enter the total in the wife's column. And enter an amount for sickness benefit, say, even if it includes sums for the wife and children, in the husband's column (if indeed it is he who receives it).

Gross and Net

In the first question you carefully ask for the last pay net of deductions and go on in the second question to establish what these deductions are. The answers to both questions effectively give gross and net earnings for the last period for which pay was received and you can build up further information in the questions that follow. You should be conscious of this distinction throughout the section. It will not always be possible to get information both for income after tax and income before tax. Remember that if you cannot get an answer for one you may be able to get it for the other. Make a note whenever you can. We can calculate in the office.

Last 12 months

Though you start by finding what was the last amount of pay received it is very important also to find what was the average pay during the previous 12 months and gradually build up the total income received by the income unit and the household in those months. You have already filled in a work-record and this will help you to answer several of the questions in the section.

QUESTION 1 Last earnings

Remember to check earnings for each member of the household, even those of a wife who had a job for only a few weeks in the year, a young son who works only on Saturdays, and a retired man with a part-time job. Second or subsidiary earnings are dealt with in Q. 14. Note that each digit is ruled off from the next. Insert "0" in any column which does not apply. Please note also that we have allowed wider columns on these income pages so that you have enough room to write in figures. But note that you will have to indicate which member of the household received any income if you are obliged to use a fifth or sixth column.

QUESTION 2 Deductions

Don't forget that a total is better than nothing. If the informant is uncertain say, "I believe it is on your pay slip" and encourage him or her to check. We have asked you to put a tick if in fact you are shown a slip or the informant reads off the amounts. As before, the small boxes on the left are for you to identify the member of the household: "Inf." "2nd" "3rd", etc.

National Insurance contributions

A male employee ordinarily pays 15s. 8d. and a female employee 13s. 2d. per week, although note that a married woman can elect to pay only 7d. per week to cover industrial injuries benefits. Boys under 18 pay 10s. 1d. and girls 8s. 5d. per week. Persons over 18 who are contracted out of the graduated pension scheme pay a higher flat rate insurance contribution of 18s. 1d. (men), 14s. 8d. (women).

Graduated pension contributions

The employee contributes 4 1/2 per cent of each pound of gross weekly earnings between the ninth and the eighteenth, i.e. approximately 11 1/2d. for each of these pounds, plus 1/2 per cent for each pound between the 19th and the 30th, i.e. rather more than 1d. for each of these pounds. In fact a man with gross weekly earnings of £9 pays nothing, one with £13 pays 4s. 0d., one with £21 pays 9s. 0d., and one with £30, 9s. 9d. About one person in every five, however, is contracted out of the graduated pension scheme, but such persons nonetheless pay 1/2 per cent on each pound of gross earnings between the ninth and the 30th, or a maximum of 2s. 1d.

QUESTION 3 Highest and lowest

Check the number of weeks worked by turning up the work record. Some people's earnings will have varied only in one or two weeks of the year and it will not be difficult for you to establish an average in (b). Remember Q. 3(b) is very important. Other people's earnings may have varied widely, either because of changes of job or variations in overtime. Do not include variations due to holidays or sickness. If it is difficult to arrive at an average write in the box or in the margins, e.g. 10 weeks @ £15 10s., six weeks @ £18 15s. and 23 weeks @ £24 11s. We will work out the rest. Do not include weeks of holiday or sickness, which are explored later.

QUESTION 4 Bonuses

If a commission or bonus has been included in Q. 3 do not now amend the answer to that question. If the information is given for the first time write the amount in the box and also strike out "Before" or "After" Tax as appropriate.

Publica does not pay G. Paulson. I thought it was paid on £9 per week which is the sup. 1/2

QUESTION 8

Obtain an estimate of total cost by the normal transport used. Some people who drive cars will offer their estimate of real cost but in such cases write in as indicated the average weekly mileage to and from work (not during work). In other instances assume 6d. per mile for all small cars (i.e. under 12 h.p.) and 8d. per mile for larger vehicles.

5 miles @ 6d. = 2s. 6d.	5 miles @ 8d. = 3s. 4d.
10 miles @ 6d. = 5s. 0d.	10 miles @ 8d. = 6s. 8d.
50 miles @ 6d. = 25s. 0d.	50 miles @ 8d. = 33s. 4d.
100 miles @ 6d. = 50s. 0d.	100 miles @ 8d. = 66s. 8d.

QUESTION 9 Holiday pay

Be careful not to include pay received simultaneously with holiday pay for any week of work. Remember that many wage earners only receive the basic wage during holidays, which is usually much lower than average earnings.

QUESTION 10 Sick pay

There are several practices. (1) Some employers (e.g. public services) automatically deduct national insurance sickness benefit for the worker and his dependants from pay during sickness (or sometimes expect him to report what sickness benefit he receives so that it may be deducted from later amounts of sick pay or even from the first weeks of earnings after recovery from sickness). (2) Others (mainly smaller private firms) deduct only the sickness benefit for the worker, ignoring what he may get for his dependants. (3) Still others deduct nothing for any sickness benefit for which a worker may be eligible. In the last two cases it might seem that the worker will be better off in sickness than at work. This is true for some, particularly salaried earners, but remember that if any employer pays anything to a wage-earner in sickness rarely does it exceed the basic wage. His average earnings may be much higher. (4) When the level of sick pay is small no deductions may be made for any sickness benefit.

Changes in sick pay after the first weeks

In rare instances of persons who have been sick more than a few weeks the rate of sick pay will have changed. If the average is difficult to estimate write in the amounts thus: 4 weeks @ £10, 4 @ £5 10s., etc. After deductions of tax, etc. Note if only the amount of pay before deductions is known.

QUESTION 11 Income of self-employed

The income of the self-employed is sometimes difficult to ascertain. Four alternative methods of questioning that have been found to be helpful in previous research are listed. Our first aim is to find the figure for annual income before tax. Thus Q. 11 A (iv) is the crucial one and if you can get the answer to this do not press unduly for the answers to the preceding questions, but they are helpful in establishing that (iv) is in fact the figure you want. The alternative aim (if you cannot achieve the first) is to seek the amount obtained from the business, either Method B — net profit including money taken out for own use, or Method C, the sums actually taken out for personal use. Method D should only be tried if all else fails, and frankly, is not of much help. An accurate figure for income is important and you should if necessary take time to establish it. Method D "Turnover" = total receipts from sale of goods and services, less any discount allowed.

*Don't answer +
Fabrica walk
to work*

Family have lived in this house
30 years. Landlord has not increased
rent of 2/- per week, and they never
ask him to do any repairs.

Rent 2/- a week

QUESTION 27(a)

Our object is to try to find what rent might be paid in normal circumstances in that area for such accommodation. We have asked you to make an estimate in the light of your knowledge of the area if the informant cannot make such an estimate.

QUESTION 28(a) Years on list

Sometimes the tenant will have taken on a tenancy from a member of the family who has died or moved away. Code "inherited tenancy" in all instances except that of a woman who has become the tenant through the death or absence of her husband.

QUESTION 28(d) Reason for obtaining council accommodation

Interpret "inheriting tenancy" as above. Although more than one reason may be advanced code what the informant considers to be the chief one.

QUESTION 28(e) Rent reduction or rebate

Broadly three types of scheme have been introduced. Some councils operate an automatic differential rents scheme and some informants may have their rents reduced initially upon the introduction of the scheme. But in this sort of scheme most people will not know whether or not their rents are "reduced". The second scheme is one where the tenant has to apply for a reduction of rent he expects to pay in the future, upon test of means. The third scheme is one where the tenant applies for a rebate of rent paid in the past, on test of means. We are primarily concerned with the second and third schemes here.

QUESTION 6a Cars, Vans

Note that in Section II you will have noted any car owned by the business or firm and whether it is also used privately. Do not count this car here also but find out whether there is a second car—e.g. wife's. If informant unable to value a vehicle note instead its make, type and year of manufacture to enable us to look up its value.

QUESTION 6c Debts on vehicles

Note that the question does not apply only to payments which are overdue but to the total sum still owing. You will usually have difficulty in excluding interest from the amount owed. If the amount owed is estimated at less than £50 record the sum and do not take up time making sure that the interest is deducted. But if the amount owed including the interest element is £50 or more ask for the details listed under (c). We will then make an estimate in the office.

QUESTION 7 Life Insurance

If there is more than one policy add up the payments and, if necessary, note any difference in frequency or years of payment. Note that our main object is to establish the equivalent current value in cash of policies they hold. The majority of households will hold policies of little current value and you will see that if they pay less than 10s. a week we do not ask for any details.

QUESTION 8 Value of saleable assets

Please note that we do not envisage that goods in everyday use—beds, blankets, basic furniture, crockery, clothes—need to be valued. We are interested only in items of value that could be sold without serious detriment to the household and its daily life if some ready cash was badly needed. Jewellery, furs, stamp collections, works of art, antiques, and collections of books, might be sold and we need to obtain an approximate estimate of their total current worth. Naturally enough we cannot expect precise valuations and you will find the minimum value of £25 for an article (or a group of articles—e.g. a number of pieces of jewellery) helpful in avoiding protracted discussion of the value of articles used every day in the home.

QUESTION 9 Other assets

Rarely will there be any kind of asset not covered by our other questions. But by asking this general question you may be given information that belongs in the answer to another question. The informant may have misunderstood a question. But be careful not to include an item here which is already covered elsewhere.

QUESTIONS 10 & 11 General assets sold and windfalls

It may be difficult for you to secure an estimate of money raised or spent on "ordinary living expenses" but you will find that our object is fairly clear and once you understand it you can probe for an estimate. We do not want information about sums of money invested in new assets, in replacing old assets (e.g. property, including houses and cars) and in savings, but only information about sums of money spent in the ordinary way on housekeeping, food, clothing, and entertainment. An estimate is better than nothing. Note that we are not asking you to waste time checking small amounts of less than £25.

QUESTION 10 Assets sold in last 12 months

Some people, especially the elderly, will have sold some of their assets in the last 12 months to bolster a low income. This can be an important contribution to their standard of living. Savings—Note that each item should be prompted carefully, especially to persons who have already told you they have sizeable amounts in savings, stocks and shares, etc. Note that we are not interested in this question in total sums which amount to less than £25 in the 12 months. Nor are we interested in amounts that may have been saved from income and spent in the same year (e.g. savings for Christmas or a holiday).

Partial use of sales or savings for living expenses—In some cases property might have been sold, say, and part of the money spent but part of it saved. Try to get a total estimate only of the sum spent on ordinary living expenses.

Pls query says they pay all bills have no debts and save anything at all. They just manage. Andrew is paid fortnightly and the first week is better than the second.

QUESTION 4 Emergency help

Since this is rather a general question specific acts may be forgotten. Probe as seems appropriate in the light of previous answers. Most people have occasional help from family or friends in the neighbourhood.

Margaret knits for her grand-daughters, two small girls. Soup she always has knitting going. Rather reluctant to put a price on it, but finally soup prob. spends 1/- a week or more.

QUESTION 5 Gifts regularly made

This is the counterpart of Q. 2, dealing with gifts or commodities rather than services. Again repeat the question in reference to relatives seen often. Note that a meal that is given is distinct from the service of preparing a meal (prompted in Q. 2). Obtain the best total estimate that you can of the worth of these gifts, however rough.

QUESTION 6 Occasional gifts made

We do not wish to waste time on occasional gifts of a value of less than £25.

QUESTION 7 Gifts (regularly) received

This is the counterpart of Q. 3. Refer to relatives seen frequently and repeat the question. Note that meals consumed should also be coded in this question. The service (of preparing them) was included under Q. 3. Probe according to the answers made previously.

QUESTION 8 Occasional gifts received

Do not waste time inquiring about gifts of a value of less than £25.

Andrew's wages come fortnightly by cheque to Margaret cashes this at grocery store. She gives him \$2 per. for beer & tip. and pays all expenses out of rest. She herself spends nothing on entertainment they all give to church, but did not wish to say how much. Andrew & Mo. Church collection comes out

QUESTION 19 Housekeeping and board

The question refers to ALL INCOME RECIPIENTS including pensioners, as well as earners, who contribute to the housekeeping expenses. Be careful that you probe for everyone in the house, including adolescent earners. Sometimes the actual sum available for housekeeping will be quite different from that suggested by the total income of the household. The husband or teenagers may retain quite large sums not only for their own use but because the pattern of responsibility in one household for expenditure may be different from that in another household which has the same composition. Housekeeping can be a touchy point if both husband and wife are present, and it is perhaps best dealt with by interviewing one of them on their own (the housewife preferably) and, if possible, checking later with the other (the husband). If both husband and wife are present avoid expressing any surprise or criticism if you think the housekeeping is small. Also avoid indicating any opinion on the question of whether wage-earners should pay bills. Try to imply that all arrangements are equally possible. We have listed the common ones, but there will be others. REMEMBER TO CODE EACH INCOME RECIPIENT.

QUESTION 19 (b) Money back

This can be daily fares, insurances or clubs paid, dinner money, or simply "spending money". Some teenagers hand over their wages but get clothing bought. Usually this question will apply to teenagers, but some husbands may get money from the housekeeping for their cigarettes and beer mid-week.

QUESTION 19 (c) Payment of housekeeping bills

Often the husband will pay some larger bills, but alternatively he may pay housekeeping but expect to "help out" if a heavy bill comes in. We realise that an estimate may be rough but try to get an average contribution. Teenage children may buy food as "treats" for the household from the money they retain. Again try for an average.

QUESTION 20 Long-term saving

We are not interested in asking here whether the informant has savings (that was asked in Section V). Nor are we interested here in asking for short-term saving. Instead the question explores whether at the present time the informant manages to put aside savings for a long-term objective.

QUESTION 21 Ten years ago

To give us some idea of fluctuating fortunes we ask what things were like ten years ago. Some persons aged 35 or over will have been at home in their parents' households ten years ago and therefore we have to find what was the composition of the household. In any case, we require an estimate of the total money flowing into the household, and the number of adults and children that were supported at that time. Give the informant time to recollect. And check that income includes pensions, family allowances, etc. Fortunately, the informant will already have some idea of what you are after from the detailed questions asked earlier.

of Margaret's housekeeping. but never pays her own

QUESTION 23 Poor now

Stress genuinely and try to avoid facetiousness at this point. Question 23 (a) explores what the informant understands by feeling "poor". If the word "poor" seems inappropriate use the alternative "very hard up".

QUESTION 24 Poverty

Stress the word "poverty". Do not explain what you think it means if you are asked. Seek from the informant his definition and write it in the box as clearly as you can.

QUESTION 25 Voting

Ask for those old enough to have voted in the last election (March 1965). We are not concerned who they voted for (although they will probably say) but would like to know if they are sufficiently involved to vote at all. Be careful to reassure people that this is confidential and as far as you are concerned non-voting is blameless—many people consider that voting is legally compulsory or morally obligatory and so voting figures are over-estimated. Try to get a clear recollection by fixing the incident (time of day, who they went with) if necessary. Stress **National**, not local elections.

QUESTION 26 Action on poverty

We are interested in what the informant thinks can be done. Give as full an answer as possible.

Please write in any additional notes.

No poverty now, not too much, don't go for
holidays and that sort of thing maybe, but
with pensions and assistance can manage.

INTERVIEWER PLEASE CODE ALL THAT APPLY AFTER INTERVIEW

- (a) Household in which there is a child, one of whose parents is not resident
- (b) Household consisting of woman and adult dependants
- (c) Household in which there are five or more dependent children
- (d) Household containing an adult who has been unemployed for eight weeks (consecutively or in last 12 months)
- (e) Household containing an adult under 65 years of age who has been ill or injured for eight weeks (consecutively or in last 12 months)
- (f) Household containing a disabled adult under 65
 - (a) disabled
 - (b) borderline disabled
- (g) Household containing a disabled or handicapped child (including child ill or injured for eight weeks or more)
- (h) Household containing a person aged 65 or over who has been bedfast or ill for eight weeks or more or who is otherwise severely incapacitated
- (i) Household in which there are
 - (a) earners, none earning £12 a week or more
 - (b) adult male earners (aged 21 to 64) earning less than £14 a week
- (j) Household in which there are persons who are
 - (a) non-white
 - (b) born in Eire
