Name of Interviewer: J. Worthington

SERIAL NUMBER

Date(s) of interview(s): 29/11/68

Length of interview(s): 65 minutes

or contacts: 10am

Total actual interviewing time: 65 minutes

Form of introduction

"My name is X. I'm from Essex/London University. We're preparing a report (writing a book) about standards of living in Britain today and how families manage. We think it's important for the Government and everyone else to know what the facts really are. We're hoping to talk to about 3,000 families throughout the country and I'd be very grateful if you could help us by answering some questions. All our information is, of course, strictly confidential."

SUMMARY : COMPLETE AFTER INTERVIEW

1. Interview carried out at first call	10	3. Which sections were answered in whole or in part by which persons on the household? Informant	Write Section 1, 2, 3, etc.	5. Number of other households at address →	21
	<input checked="" type="checkbox"/> X <input type="checkbox"/> Y <input type="checkbox"/> 0		13		None

JS

HOUSING AND LIVING FACILITIES

General

Information recorded by the interviewer on the left of the main column is needed so that the circumstances of the household may be fully understood by those in the office but it may not be required for computer-analysis.

QUESTION 1 — Rooms

No room should be listed twice. Bedsitters should be listed as bedrooms and not also as living-rooms. Do not count a scullery or a hall or a bathroom as a room. The total number of living and dining and bedrooms should not include a kitchen if it is not large enough for a family to eat in. You will see that there are two numbered boxes in the column in which to write the numbers of bedrooms and total numbers of rooms. Each is for each digit in the total: Thus, if there are 9 or fewer rooms the number should be written in the right-hand box and "0" should be written in the left-hand box. If there are, say, 13 rooms, then "1" should be written in the left-hand and "3" in the right hand box. This will help us to avoid mistakes in transferring information to the computer.

QUESTION 2 — Additional or fewer rooms

Define "room" as above.

QUESTION 4

A water closet flushed by water. Chemical or earth closets are not included, nor are flush water closets which can only be reached by going outdoors across a yard, even if under cover.

QUESTION 5

A garden is any space at the front or back of the house where it is possible to grow something. A yard is an outdoor space which is covered in concrete, asphalt, etc., where there are no plants or lawn other than in boxes or barrels (if any).

If you have already seen the garden it may be unnecessary to ask the second part of the question, for it may be possible to code 3, 4 or 5. But be sure that you are taking back as well as front garden into the reckoning. Add the two together in estimating size.

Cl. 5 Not applicable really. No actual garden, but the farmhouse is set in farmland in beautiful countryside.

*Looking done on Agri booker —
Solid fuel.*

QUESTION 8 Work record

Our aim is to trace persons whose work record is not full and to establish both numbers of weeks off work and numbers of weeks in which fewer than 30 hours were worked.

Weeks off work in year

The procedure is first to ask the general question about numbers of weeks off work. Some informants will be uncertain of the right answer. They can be encouraged by prompts about the last spell off work for **unemployment**, then **sickness** and so on down the list. Whenever it is clear they are going back more than 12 months you should move on to the next eventuality on the list. In the appropriate column note the number of weeks for all spells of unemployment, sickness, etc. You must record "O" in all open boxes when the person has had no spell off work for that reason. You may ignore the codes "X" and "Y" under each open box. They are for office use. For easy reference you can record each spell off work alongside the months listed below. (You may in rare instances interview persons, say, who had five or six spells off work through sickness and may need to show some rough working to arrive at the right total. (Please leave any rough working in case of queries.)

List member of household (informant, 2nd, 3rd) and weeks off work and reason

January.....	July.....
February.....	August.....
March.....	September.....
April.....	October.....
May.....	November.....
June.....	December.....

Some informants may have a quick answer for the first general question (usually because they have a very full or almost empty record of work in the year). You should nonetheless use the same procedure of asking about each type of eventuality and each spell off work as a check. If an informant says he hasn't been off work except for "just odd days because of colds and so on" ASK **How much would it amount to over the past twelve months — one week, two weeks? AND CODE ACCORDINGLY.** For informants (e.g. housewives or students) who have only worked for a few weeks in the year, you may find it quicker to establish first how long they were at work.

As with so many other questions about "the last twelve months" in this questionnaire, informants will often find it helpful if you encourage them to think forwards from a date exactly a year ago.

Had not had more than one day
(back to sleep) off for 12 years.

QUESTION 9

Exclude Bank Holidays in counting up holiday entitlement. List number of weeks to nearest week. Do not insert "1/2".

Although this man worked on this farm all his life, he has only owned it for 6 years. Before that, the "good years" in farming, he worked for his father. His father, failing for some years prior to giving up work on the farm, paid him and employed another hand. When he took over the farm, he found it was making a bare living (16 acres), so he fired the man & does all the work himself. He estimated he makes a living ^{only for himself by working} 70/80 hours a week.

QUESTION 10 Occupation

See instructions above for Q. 7(b). Start by recording member of household in left-hand box (informant, 2nd, 3rd, etc.) and then carefully note occupation and industry or business. The office will code in the right-hand columns on the basis of your information. Avoid all vague terms, e.g. "engineer". If you find the answer too general or difficult to understand always ask "What do you do?" and write in the answer. In many households there will be only one or two persons who have been at work in the past twelve months. If necessary you can use all the space in the box just for one or two persons, providing it is clear to which person(s) the information applies.

QUESTION 11 Change of Job

Note that sub-questions (a) - (d) apply only to persons changing their jobs less than five years previously.

11(c). IRU, etc., means Industrial Rehabilitation Unit or any other Government training centre.

QUESTION 12 Training Course

Our object is to check on men taking a re-training or training course, whether or not they changed their job. Some men may have taken a course and gone back to their former job or employers. Others may be unemployed and yet have taken such a course.

QUESTION 13 Fall in Earnings

You may be asked what you mean by "big" fall. Accept whatever the informant thinks is big. Put the information in the box, including the approximate earnings previously as well as the subsequent earnings and code the extent of the fall in the right-hand columns.

in the "good years" farming affects his father's modern farming farmhouse some extent but now this man stays in the park room etc. if he was married & had a family, it would not support them.

³ left school at 18³ officially, but went to school & dad used to be kept at home to work on farm.
low has only ever worked on two farms,
father has had other jobs, but always on farms.

QUESTION 14 Best job

If you are asked "What do you mean by 'best'?" you should say "It is up to you to decide" (adding, but only if necessary, "whether it's best because of the money, the people, the job in itself or anything else"). Of course there will be people who give a mixture of reasons. Code the one they treat as most important. If they are undecided code DK.

QUESTION 15

A few persons — e.g. students — may have worked for part of the last year, or may work every Saturday and still be in full-time education. We will be asking about them later. Code them as still in full-time education.

QUESTION 15(a) Years of full-time education

The question is worded so that if someone has missed a year's schooling because of illness, say, between the ages of 5 and 14, he can adjust his answer accordingly. You can check (or aid other informants trying to reach an answer) by deducting five years from the leaving age and then asking if the result allows for any absence because of hospitalisation, war evacuation, military service, or any other reason. Note that full-time education can be provided in hospital. Only deduct a year if ALL of it was spent out of school. When writing in leaving age and number of years education remember again to insert each digit.

QUESTION 16 Manual Workers

If you are in doubt from what you have been told about a man's job whether it is manual ask, "How do you do your work? Is it mostly heavy work, or operating a machine or mostly with your hands?" If he indicates any of these ask Q. 16. If still in doubt ask the question and write a note.

QUESTION 17(a) Husband's occupation

Follow same procedure as above under Question 10. It will be even more necessary to probe for the exact type of job. Encourage the woman to tell you what her husband did, since the answer is most important for us in classifying occupational status.

Seldom goes further than Omeigh (a mile) very little
 Personal mileage — all reports of expenses set against
 business. Does about 5,000 miles per year. Estimates
 5% Personal mileage — 72% at its very outside.

QUESTION 16 Pension

Only include if a pension scheme has been worked out in relation to the business, or is available from an insurance company or another body, because of the nature of the business or self-employment. Note that provision is made in a series of questions on this page for entries to be made in the office (Qs 16a, 16b, 17a, 18c). Much depends, however, on the information you can provide in boxes on the left, leaving us to make necessary calculations.

candidate Howard
 business in same
 premises also to a farm?
 I've coded "Yes" ✓

QUESTION 19 Cheap goods and services

You should normally expect positive answers. A garage-owner may be able to purchase a car and run it well below ordinary retail prices. A grocer will obtain household stores cheaply. An insurance company sometimes reduces certain premiums. A small-holder may receive supplies cheaply in exchange for produce at market costs. There are exchange arrangements between people in different trades. It will, of course, be difficult to explore all these things properly but Q. 19a conveys our object and you should probe carefully whenever possible.

QUESTION 20 Tax savings because of combined home and business

The real incomes of many self-employed persons tend to be underestimated. Their difficulties are not always easy to explain to the tax authorities and in practice low real incomes and insecure incomes are compensated because part of housing and other costs can be offset against tax. Ask the questions openly and straightforwardly.

If informants seem doubtful about answering, say: "We have nothing at all to do with the tax people. We know it is difficult for you to divide costs between the business and yourself. But we also know that even if they have more problems many self-employed persons can live a little more cheaply than people getting a salary. I wonder whether you'd mind guessing how much more cheaply — I mean because of savings of tax".

Q. 20. This being a
 farm some expenses
 like telephone can
 be set off against
 business & estimated
 figure is given,
 although he says
 he would not have planned

This man has not paid any tax for 6 years (since he took business over efficiently from his father) He expected to have to pay £45.80, but his A.I.C. have told him to be ready to pay between £300 & £350. He has put his savings in Belfast Savings Bank, not hidden at all and he expected to be caught sometime, but not to the tune of £350. They are still

arguing about it. He considers it unjust because he started his help of does all the work himself. He has tax relief for his father who has no income.

QUESTION 12 Income tax

The informant will often know the approximate amount because profits or income from business fall under Schedule D. But we ask 12b to check that the informant is not including tax which is allowed for in other questions. For example, elsewhere we establish net income from dividends, but if here the informant adds £100, say, to the figure for tax to take account of tax on dividends deducted at source, we risk deducting the £100 twice by deducting it here as well. You should be warned that for this and other reasons the net income of the self-employed tends to be underestimated.

Weekly National Insurance contribution

Self-employed men pay 21s. per week. Self-employed women pay 17s. 3d. per week. Boys and girls under 18 pay 11s. 10d. and 10s. 1d. respectively.

QUESTION 13 Fluctuation in Income

The self-employed will often have an income that fluctuates throughout the year — especially those on low incomes. For example, the scrap dealer or stall-holder may not do as well in the winter as he does in the summer. The professional architect and the free-lance photographer may be paid at very irregular intervals. We are particularly interested in fluctuations which may produce hardship for a household which is usually prosperous. But remember that though income may fluctuate (e.g. in winter, for a shop-keeper or free-lance interviewer the same amounts per month may be drawn out of the bank or spent. Living standards are not necessarily affected.

Income varies as milk prices but averages out the same. Does not expect to make as much this year, sales of beef not as high. Will not affect standard of living.

QUESTION 14 Second job

This will have been established in the earlier section on Employment. Repeat the question because earnings from subsidiary occupations tend to be forgotten. For example, painters and decorators may have done one remunerative weekend job for a few weeks several months earlier in the year. A gardener may have done some intensive paid work for various local people in the evenings and weekends of the summer months. Or a university lecturer may have had a remunerative consultancy or a series of well-paid broadcasts at some point in the year. Remember that extra earnings from a source other than usual employment may not be thought of as a second job. You should probe for all kinds of additional earnings, depending on the nature of the usual employment.

QUESTION 15

This is laid out as concisely as possible on one page and you are asked to ring 01, 02, 03, etc., as appropriate and then to enter the rates per week and amounts below, carefully writing in the code "01" (i.e. Family Allowances) "02" (i.e. Retirement Pension) and so on so that we are clearly aware of the allowances to which the amounts refer.

Amounts will sometimes be joint—e.g. retirement pension for man and wife—or will be for several members of the household—e.g. sickness benefit for man and wife and children. In these instances the amount should be entered (if necessary, after the interview) in one column only, under that member of household receiving the payment. Wherever possible encourage informants (especially when elderly) to show you the allowance or pension book.

CODE 01 Family Allowances

	First child	Second	Third	Fourth & subsequent
up to April 1968	nil	8s.	10s.	15s.
after April 1968	nil	15s.	17s.	17s.

counting children under 15 or up to 19 if still in full-time education or college or an apprentice on low wages.

CODE 02 Retirement Pension

Note that the actual amounts vary widely. Increased pensions are paid if retirement is deferred. There are now in addition small graduated state pensions (averaging about 3s.) and pensions may be reduced because of earnings or a deficient contribution record. Note that some of these points also apply to other benefits. Pensions and supplementary benefits can be combined in a single payment. You will be prompting for supplementary benefit and wherever possible we should like you to list the amount separately (as well as the fact that it is being received). But whenever the rate given to you exceeds the standard rate below you should check the reason.

Single person (husband)	£4 10s. 0d.
Wife's income	£2 16s. 0d.
1st dependent child	£1 5s. 0d.
2nd dependent child	17s. 0d.

CODE 03 Standard Widow's Pension

Note: not the widow's allowance which is paid for the first 26 weeks after widowhood.

Widow or widowed mother	£4 10s. 0d.
1st dependent child	£2 2s. 6d.
2nd child	£1 14s. 6d.
3rd and subsequent child	£1 12s. 6d.

Depending on the circumstances of the death of the husband (armed service and so on) widows' pensions may differ in size. Note that family allowances are received in addition to dependent children's allowances.

Widow's Allowance: Widow £6 7s., children as for widow's pension

CODE 04 and 05 Sickness Benefit and Unemployment Benefit

Sickness benefit is often paid for periods other than a week. Find what was the last payment and for how many days (excluding Sundays). A payment for 6 days, excluding Sunday, makes up a "week's" benefit. Note that an earnings-related supplement may be paid in addition to the flat rate benefits listed below. Moreover, these benefit rates depend on the contribution record.

Single person	£4 10s. 0d.
Married woman	£2 16s. 0d.
1st dependent child	£1 5s. 0d.
Each subsequent child	17s. 0d.

CODE 06 Supplementary Benefit

The former "national assistance". Rent is sometimes paid direct to the landlord by the Supplementary Benefits Commission. There is a check later that the amount is known and counted as income.

CODE 07 Industrial Injury Benefit

£6 7s. 0d. (with additions for dependants) is payable for the first 26 weeks after injury after which the injured person goes before a Board to have his injury assessed for an individual disablement pension.

CODES 08 and 09 Industrial and Disablement Pensions

The 100 per cent rate is £7 12s. 0d. (with additions for dependants). CODE 09: Note that these are war pensions, not service pensions included under occupational pensions later in Q. 19.

CODE 10 Maternity Allowance

The standard rate of maternity allowance is £4 a week. It is paid to women who have been paying full national insurance contributions. It begins 11 weeks before the expected confinement and ends after the sixth week following it.

CODE 11 Maternity Grant

This grant is £22 either for home or hospital confinement.

CODE 14 Single Grant

This is officially described as an exceptional needs grant. The Ministry of Social Security has replaced the former National Assistance Board and you may need to explain "a grant from the Assistance". Probe carefully for this for all income units who are not employed, whether or not they receive supplementary benefit. A large number of people obtain single grants, e.g. for spectacles or dentures, even though they are not normally eligible to receive supplementary benefit. Note also that since you are asking about a period of 12 months there will be instances of people now in work who obtained a grant at an earlier point in the year.

the old man does not receive any allowances from the State. He never paid any N.I. contributions. Once they did apply, but at that time he owned the farm and he was not destitute, although his little or no cash. They have never claimed since.

low funds it diff. to answer question about father's income
or retirement. Father can not answer. Says as I've
noted somewhere at that time his father was paying him
and another man, so although there was more money in farming,
he would make as much. Does not think it is estimate for
but

QUESTION 16 Supplementary Benefit

It is most important that you should not overlook anyone who may be receiving or who has received supplementary benefit. There are two problems. One is, as noted above, that an informant may neglect to tell you that a standard benefit, like retirement pension and sickness benefit, is in fact supplemented. The other is that the official term "supplementary benefit" is fairly new. You may therefore have to prompt "supplementary assistance?", "national assistance?" or "public assistance?"

QUESTION 16(c) Rent paid by Supplementary Benefits Commission

If the rent is in fact paid by the S.B.C. we shall be asking later how much that is.

QUESTION 17 Single Grant

A single payment may be made to meet an exceptional need — such as bedding, clothing or household equipment. It may also be made to meet charges for glasses, dentures or dental treatment obtained through the National Health Service.

QUESTION 18 Income in last year at work

Note that you have already asked how many years it is since such a man last worked (in Section II). Now you are asking for the actual year when last at work, and, if it is 1955 or a later year, for the wage and household income. Do not neglect to find the composition of the household at that time (for example, write: man, wife and adult single son, or, man, wife and wife's widowed mother). We realise memories may be faulty but most people remember the last occasion they were at work and we are anxious (for retired and disabled persons, for example) to get a rough estimate of their fall in income upon giving up work. In the office we shall of course allow for average wage increases in the intervening years in interpreting the information you collect.

QUESTION 19 Employer's pension

The question is in a form which allows for the possibility of an policeman, ex-serviceman or ex-civil servant drawing a pension though still holding a subsequent job. Service pensions should be included here but not war pensions, which have been covered in Q. 15. As before: **Strike out Before or After Tax as appropriate.**

I am not sure about the coding as regards farm.
No income used for business.

Very difficult to estimate value of farmhouse - this man says it's worth and another to sell it. Farms in this part of Ireland are not easy to sell. He has estimated value of farmhouse only.

what it is worth
is too very well defined
but has built etc.
I should think
he knows what
he is talking
about & his
estimate is
accurate.

QUESTION 25(a) Private and business accommodation

Count as "business" accommodation any accommodation which counts for purposes of offsetting tax. This may include a study room for some teachers, for example.

QUESTION 25(e) Rate rebate or reduction

Note that many councils pay rebates twice a year.

QUESTION 25(h) Mortgage

The informant may know the total sum paid in the previous year but not the division of the sum between interest and repayments of principal. Yet it is essential for us to find how much of the payment represents capital repayments and how much interest payments, because otherwise we cannot work out housing costs which are comparable with costs incurred by households paying rent. In many instances a monthly or annual payment slip will show the two amounts and the informant should be encouraged to look this up. Note that if the informant still cannot give you the answer we have provided certain questions on the right-hand side of the page which will allow us to make a reliable estimate. You should note certain details in the

- (a) source of loan or mortgage;
- (b) term of repayment;
- (c) number of years paid;
- (d) amount of loan.

Please make special note if the repayment of a mortgage is covered by an endowment policy and note the amount and frequency of the premium. As elsewhere put a tick in the small box or make a note if you are fortunate enough to be shown documents.

QUESTION 25(i) Value of house/flat

Ask for an estimate and only show Flashcard No. 3 if the informant hesitates in giving an answer and you judge that it would be appropriate. Always insert the code number as given on the Flashcard, even if you also obtain an exact estimate.

QUESTION 25(l) Government's Mortgage Scheme

Note that, broadly, this is advantageous only to a householder with relatively low income who does not expect to pay tax at the standard rate in the foreseeable future.

25g) He never bought the house, father had it made over to him 6 years ago. Father bought it about 50 years ago.

QUESTION 29(c) Estimate of market rent

Proceed as for Q. 27(a)

*Does not grow any of
own food. Unconvinced.*

QUESTION 30(a) Income from lodgers or boarders

Be careful not to obtain an inflated total. Amounts may vary according to numbers of boarders and, if necessary, write down separate amounts on this page. If the informant has difficulty in producing an average per week or total in year, obtain last week's GROSS income (taking into account number of boarders) and then work back to get an estimate for the year.

QUESTION 30(c) Net income

Carefully prompt for services and the cost of providing these services so that you can make an estimate of NET income — "profit" as some people will understand it. In some instances you will have to write down figures for gross amount received and an estimate of the cost of different services. If the informant does not know what his net income has been, make an estimate on the basis of what he tells you about gross payments and cost of services and expenses. Try to obtain a figure net of any tax paid. As before, note that if you cannot do this, you can strike out "after" tax in the box provided. We are asking you to provide a figure both for last week and last year. There may be changes in income (due to loss or arrival of boarders) during the year which are revealed in interview. Remember also that costs may be as great or even greater than receipts. In these cases write in "0" and make a note.

QUESTION 32 Value of own food or poultry

Try to obtain a weekly average of the value of using own garden, allotment and farm produce. Do not waste too much time on produce amounting in value to less than 10s. a week. Be careful not to give an inflated estimate of the saving. Husbands sometimes exaggerate the value of what they grow in a large garden. What you want is an estimate of what it would cost in the shops to purchase the kind of produce consumed in the home which is grown by the household, LESS all expenses. For a small holding or farm this means taking account of purchases of stock or seed, wages, payments of fuel bills, etc., in the same way as earlier you explored the income of the self-employed.

*But got a yard in one of
farm outhouses. Not growing
at all.*

QUESTION 33 Total income last year

In some instances you may have difficulty with an informant who, though willing to answer other questions, is unwilling to answer questions on income, or an informant who is vague or uncertain about details. By adopting a matter of fact approach or by coming back to these questions after dealing with the rest of the questionnaire in an interview, you may overcome the difficulty. If the questions remain unanswered, try the question here as given, adding any other explanation according to your individual style or to the circumstances of the situation. Show the Flash-card and the do your best to arrive at a specific amount. Also do your best to check: "Does that include family allowances, pensions, etc.?" You may be surprised sometimes to find that the informant gradually undends and is prepared to answer many preceding questions. You should also do your best to check whether the total given includes other income units in the household. Try to establish totals for these units in the same way.

V SAVINGS AND ASSETS

QUESTION 1 Personal

This excludes a business bank account which is covered by Q. 4. Avoid double-counting the same bank balance or assets when questioning husband and wife.

QUESTION 2 Savings

Note that you should proceed by prompting all items to see how many are appropriate, then try to establish a total and then establish totals for each item only as a check or if necessary. Care should be taken to avoid double-counting. If the informant is hesitant or confused repeat the question to make sure he or she knows what kind of savings you are referring to and THEN show Flashcard No. 4 to get the total. Then try to obtain an absolute total rather than a range. For example, you could ask: "Would you say the figure was at the top end or the lower end of that range—nearer X or nearer Y?"

QUESTION 2(c) Interest

Try to establish the amounts the informant receives in the form he receives it—that is, before tax is deducted or after it has been deducted at source. In difficult instances you need not waste time converting a "before tax" total into "after tax" so long as you make plain what it is. We will do that work in the office.

QUESTION 3 Value of stocks and shares

This question of the value of stocks and shares is crucial and every encouragement should be used to obtain an answer. Some informants simply will not know. Remember that brokers sometimes send an annual valuation. If there is considerable uncertainty, tactfully suggest or imply that it would be very helpful to know and take any opportunity to see the valuation or to leave a note (and s.a.e.) so that a more reliable estimate can be made and either you can pick it up at a second call or ask for it to be sent on.

QUESTION 3(b) Interest

Proceed as in Q. 2c above. Mostly amounts will be received after tax has been deducted.

QUESTION 4

This is to cover any type of business which is owned in part or in whole by the informant. Being a director does not necessarily mean ownership. The answer to this question should not duplicate the answer to the previous question. Shares come under Q. 3. This is to cover such things as shops, professional practices and small businesses of every kind except limited companies. In all cases make sure that money in the business, bank account and stocks are borne in mind when the valuation is made. When the business (e.g. shop or farm) is run from the owner occupier's dwelling, the value of the dwelling will often have been included in the answer to this question (i.e. Q. 25 in Section V). UNDER NO CIRCUMSTANCES MUST THE DWELLING BE COUNTED TWICE. The valuation should be on the assumption that the informant had to sell but was in no great hurry. A year or even more could be taken to find a purchaser. The valuation should NOT be made on the basis of: "What would you take for your business?"—that is, when the informant has to be persuaded to sell. NOTE that vehicles should be included in the valuation of a business—say of a haulage contractor, a cab owner or even a building contractor or window cleaner.

QUESTION 5 Other property

Remember that some people use two houses. Others have houses which they rent off to others. This last is not uncommon among elderly people who may be very poor themselves. A "boat" may include anything from a luxury yacht to a small rowing boat.

Bestest Savings Bank. Trustee?
Old man has a few pounds tucked away
but in cash. Asked what he meant by
few + he thought about £50. No A/cs of
any kind.

QUESTION 6a Cars, Vans

Note that in Section II you will have noted any car owned by the business or firm and whether it is also used privately. Do not count this car here also but find out whether there is a second car — e.g. wife's. **If informant unable to value a vehicle** note instead its make, type and year of manufacture to enable us to look up its value.

QUESTION 6c Debts on vehicles

Note that the question does not apply only to payments which are overdue but to the total sum still owing. You will usually have difficulty in excluding interest from the amount owed. If the amount owed is estimated at less than £50 record the sum and do not take up time making sure that the interest is deducted. But if the amount owed including the interest element is £50 or more ask for the details listed under (c). We will then make an estimate in the office.

QUESTION 7 Life Insurance

If there is more than one policy add up the payments and, if necessary, note any difference in frequency or years of payment. Note that our main object is to establish the equivalent current value in cash of policies they hold. The majority of households will hold policies of little **current** value and you will see that if they pay less than 10s. a week we do not ask for any details.

QUESTION 8 Value of saleable assets

Please note that we do not envisage that goods in everyday use — beds, blankets, basic furniture, crockery, clothes — need to be valued. We are interested only in items of value that could be sold without serious detriment to the household and its daily life if some ready cash was badly needed. Jewellery, furs, stamp collections, works of art, antiques, and collections of books, might be sold and we need to obtain an approximate estimate of their total current worth. Naturally enough we cannot expect precise valuations and you will find the minimum value of £25 for an article (or a group of articles — e.g. a number of pieces of jewellery) helpful in avoiding protracted discussion of the value of articles used every day in the home.

QUESTION 9 Other assets

Rarely will there be any kind of asset not covered by our other questions. But by asking this general question you may be given information that belongs in the answer to another question. The informant may have misunderstood a question. But be careful not to include an item here which is already covered elsewhere.

QUESTIONS 10 & 11 General assets sold and windfalls

It may be difficult for you to secure an estimate of money raised or spent on "ordinary living expenses" but you will find that our object is fairly clear and once you understand it you can probe for an estimate. We do not want information about sums of money invested in new assets, in replacing old assets (e.g. property, including houses and cars) and in savings, but only information about sums of money spent in the ordinary way on housekeeping, food, clothing, and entertainment. An estimate is better than nothing. Note that we are not asking you to waste time checking small amounts of less than £25.

QUESTION 10 Assets sold in last 12 months

Some people, especially the elderly, will have sold some of their assets in the last 12 months to bolster a low income. This can be an important contribution to their standard of living. **Savings**—Note that each item should be prompted carefully, especially to persons who have already told you they have sizeable amounts in savings, stocks and shares, etc. Note that we are not interested in this question in total sums which amount to less than £25 in the 12 months. Nor are we interested in amounts that may have been saved from income and spent in the same year (e.g. savings for Christmas or a holiday).

Partial use of sales or savings for living expenses—In some cases property might have been sold, say, and part of the money spent but part of it saved. Try to get a total estimate only of the sum spent on ordinary living expenses.

Factor has "paid-up" Life Policy.

VI HEALTH AND DISABILITY

QUESTION 1 Health

Do not probe for the names of disabling illnesses or conditions, unless the informant happens to mention them.

QUESTION 2 Unwell today

Note that the emphasis is on "today" and that you are instructed to complete the questionnaire as if all questions applied to the date when you first made contact with the household. This means that if you have postponed an interview because of illness you should ask all the questions about the day you first called.

QUESTION 2a Off work

Check with the work record (page 8) where weeks off work will have been established. But here the information is needed as the basis for general questions about current illness and disability.

QUESTION 2a (i) & b (i) Number of weeks

If more than a year write "52". If the informant cannot be sure of the exact number and there is uncertainty whether it is less or more than eight weeks seek confirmation of the exact period from the individual concerned at a second call if necessary.

QUESTION 2c Regularly

That is, at least once a month for the past three months in connection with the present illness or disability.

QUESTION 3 Condition affecting activity

This question is designed to prepare the ground for the all-important Q. 7. You are not asked to trace every conceivable disability or condition from which people may suffer. Many of them, anyway, will not know diagnostic terms even if you ask them. Instead, you ask about conditions which restrict activity, show Flashcard No. 6 (which is nearly the same list as prompted verbally) and code any part of the body or faculty with which "trouble" is reported. You do not explore all possible effects but only a few examples of effects in which we are particularly interested. Remember you are only trying to find out about certain conditions, not every condition.

Nerves

Pay particular attention to the need to prompt for any trouble with "nerves".

Reading ordinary print

Note that your code "No" only if a person cannot read print in a newspaper. Do not code "No" if a person merely has difficulty. For someone who cannot read interpret the question as "seeing" print in newspaper. We are interested at this point in sight not literacy.

Hearing

Note that if an informant does not admit difficulty with hearing but it is observed, you can code accordingly.

Did not know how to answer Q. 1 as regards father
"What sort of health can one expect at 85"?

DR. only comes when sent for.

QUESTION 4 Special schools & centres

This question is asked only of persons who have been ill and off work or confined to bed or the house for eight weeks or more continuously, and those who are coded for any item in Question 3.

QUESTION 5 Date of onset of sickness or disabling condition

Our object is to establish the year of onset but the question is worded 'first have any condition' so as to allow for the fact that some conditions develop out of others. For persons with a disabling condition you ask, in effect, when all the trouble started.

Previous occupation

In the section on Employment you have already asked for the last occupation of everyone not now at work (p. 7). Some people change their occupation because of a disabling condition before finally being obliged to give up work. You should probe for the (previous) occupation which people had before any history of illness or disability started.

QUESTION 6 Mobility

You should code people according to their **usual** mobility, taking no account of a temporary illness or injury. "Usual mobility" may be interpreted as "for at least eight weeks and unlikely to become more mobile in the immediate future" or "for less than eight weeks but unlikely to become more mobile within at least that total period." Someone who spends most of the time in bed and needs help to get out to sit in a chair is defined as bedfast. Someone who can get out of his bed into a chair or wheelchair and who can walk indoors but not even a few yards outdoors without help is defined as housebound. The test is whether someone can walk on his own (without the assistance or company of any other person — though with or without sticks or crutches).

QUESTION 7 Incapacity

In prompting this series of questions you may find it simplest to ask the question without the variation in brackets, unless it seems appropriate. Remember you are asking whether they have any difficulty in doing X. Sometimes certain questions will not apply to particular people or to particular situations. You will meet people who do not (or say they do not) wash down, negotiate stairs (living in bungalows), go shopping and do housework (especially some men). The question should then be asked in terms of "But would you have any difficulty in doing X if you had to?" The codes 0, 1, 2 are listed in increasing order of difficulty and you should check that you ring one of them for each item.

QUESTION 7e

It would be insensitive and unnecessary to ask questions about the daily activities of the bedfast. They are therefore excluded from this question and the rest of the series. You may encounter other people (e.g. advanced obesity) of whom it is clear that they cannot do certain activities. You may refrain from putting questions to them. The same is true of any situations in which the questions are likely to cause great distress. **BUT AS A GENERAL RULE QUESTIONS 7 (e) to (i) SHOULD BE ASKED FOR ALL OTHER THAN THE BEDFAST AND CHAIRFAST.**

QUESTIONS 8 & 9 Variation in incapacity

These questions explore whether the pattern of answers to Question 7 is permanent. Question 8 seeks any indication of seasonal variations (e.g. bronchitis) and Question 9 day-to-day variations in the effects of disability.

Q.10. If how is reported as housebound
Code (1) should be ringed.

QUESTION 13

NHS means free, wholly paid for by the National Health Service. Private and amenity (paying) beds in NHS hospitals should be coded as private.

QUESTION 13(b) Number of nights

If a person has had two or more spells in hospital add the total number of nights together.

QUESTION 13(c) Name of hospital

This will be used in the office to code type of hospital.

QUESTION 14

Ill in bed means actually in bed for at least half the day.

QUESTION 15

Visits by and to a doctor will include calls when a person is no longer in bed but up and about. The questions are not, therefore, dependent on the answer yes to Q. 14. When the household is large and/or when there have been several visits it may take you a little time to obtain a reliable answer. Remember that in cases of difficulty it is usually best to approach the answer by asking: "When did you last see your doctor?" "And when was the time before that?" "So that means you saw your doctor seven times altogether in the last 12 months?" Remember that we want to count each consultation, even if there are two consultations on one day or on succeeding days. Remember also to include locums and other (alternative) doctor seen in this period.

QUESTION 15(c) Visits paid for

If the informant is a wife who makes a visit to her NHS doctor and pays later for the pill, which he prescribes, this should still be counted as a NHS visit.

QUESTION 16 Spectacles

Most people pay in part for spectacles even under the NHS but some obtain them free by paying and then claiming a refund on test of means (by the SBC).

QUESTION 18 Doctor at hospital

It is the number of occasions we want to know, not the number of doctors seen at the hospital.

Visits to dentist

Remember to ask number of visits, not number of courses of treatment.

Home help

We are interested only in the use of a local council's Home Help Service.

Someone from the Welfare

We mean a social worker or officer from a Council health, welfare or children's department who is concerned with some aspect of family welfare. Include a health visitor, say, but not an officer from the Supplementary Benefits Commission or someone from a voluntary organisation — like the WVS or Salvation Army.

QUESTION 18(a) Paying a dentist

The point is that very poor people can get free dentures and do not have to pay the £1 for a course of treatment.

QUESTION 18(b) Home help

Some councils charge for a home help's service on test of means.

*Disturb these visits Sunday twice weekly
to give bed bath & make as
comfortable as possible.*

VIII INCOME IN KIND

General

This section aims to discover the major exchanges of services and gifts between the household and relatives or friends living elsewhere. One major problem is that people ordinarily take for granted the exchanges between themselves and their closest relatives. When being asked questions about "help" and "gifts" a housewife may not think of her mother, or her husband's mother, who lives nearby. A grandfather may not think of his daily activity of seeing a grandchild home from school. The first question is designed to help overcome this problem. You should remember that most households in the UK have frequent contact with a relative (either of a wife or a husband or of both) living elsewhere in the locality. Remember that independently of his wife a husband may see someone in his family (eg: his mother or a brother at work) every day. It will be very unusual if you make no entry in the box alongside Q. 1, so probe for likely relatives (eg: parents in the case of young and middle-aged people, brothers and sisters in the case of unmarried people, sons and daughters in the case of the elderly). In the remaining questions the contacts with such relatives are a likely indication of a flow of services or small gifts. Note that earning members of the household should normally be asked these questions independently of the housewife.

QUESTION 1 Relatives seen frequently

The question is designed to establish the existence of the relatives who have the most frequent contact with members of the household. Note that you ask "any of your family or a relative". The alternative wording will help to avoid information about really close relatives — eg: parents and children — who are thought of as "family" or even as members of a common household rather than as "relatives". By "most" days in the week is meant at least four of the seven days.

QUESTION 2 Help given

The unspoken assumption in the question is that these must be unpaid services. Prompt the items in the list carefully, emphasising those which are appropriate to the age or social situation of different members of the household. Make direct reference to the relatives listed in Q. 1. For example: "You say you see your mother every day. Do you do any of these things for her? And what about your sister?" Note that you prompt also for help given to friends and neighbours.

Hours

If two or three different services are undertaken, add together the informant's estimates of the time taken. Since the services are unpaid you should not expect informants to be able to give more than an approximate estimate of the time taken (that is, the time spent in the performance of the job, not interruptions for tea and conversations, etc).

QUESTION 3 Help received

The question reverses Q. 2 and proceed as in that question. Check in whatever way seems appropriate to establish the unpaid services being performed for members of the household. Again the question should be repeated for relatives seen frequently. "You've told me you see your mother every day. Does she do any of these things for you?" Two separate people might do the cleaning, for example. Add the hours together.

Help is of course, given to both these men.
Answers are coded under B Informed.

A part from help by relatives, pay a woman
to clean house, 4 hours on a Saturday.

QUESTION 7 Food

Actual nutritional levels cannot be established by an interview of this kind, but it is hoped that these questions will show very roughly (i) whether a family member goes short of food occasionally, (ii) whether the family is able to buy relatively expensive foods frequently, (iii) whether any member of the family goes short of food occasionally, and (iv) to what extent patterns of food consumption vary with income.

(a) **Cooked breakfast**

Many women do not eat breakfast. Bacon and eggs is only an example. Others would be boiled or fried egg, haddock, kipper, etc. But not porridge, toast, fried bread or potatoes (the distinction is between carbohydrates and other foods).

(b) **No cooked meal**

Stress the whole day. A heavy breakfast but nothing later, or a heavy meal at supper-time will not count as going without a cooked meal during the day.

(c) **Fresh meat**

This will be difficult for households where children have school dinners, or members of the household eat canteen meals. It would be reasonable to code such persons "Yes" in the absence of any better information. It is highly possible that some housewives may have very little fresh meat (defined to include chicken, chops, frozen meat of any kind but not corned beef, tinned meat, boiled ham or sausages). Care is needed as meat-eating is probably over-stated, and when there is meat the men in the household and not the women may have it.

QUESTION 8 (a) Joint

Accept what the informant understands by a joint.

QUESTION 8 (b) and (c) Milk

Do not include school milk (a correction for this will be made in the office). Check for extra milk at weekends. Include sterilised milk ("stera") as fresh. Some houses buy milk in powder or liquid in tins for babies too, but do not attempt to assess the quantities of this. Just make a note that it is bought.

QUESTION 9 (b) Clothing

Clothing cheques are "Provident" cheques and the like where a cheque for £1, for example, entitles a person to shop at certain shops and repayment is made at 1s. in the £1 for 21 weeks. Clubs include any kind of arrangement through a catalogue, shop, or door-to-door salesman.

QUESTION 9 (c) and (d) Spending on clothing clubs

Some clubs include coal and furniture as well as clothes; try to get an estimate of the proportion of money spent on clothes. Informants often give a maximum figure, when in fact they miss or only pay something on account.

QUESTION 11 Adequate footwear

Includes state of repair as well as fit. Plimsolls and sandals in winter are not adequate, nor are boots alone adequate for summer. Plastic sandals are coded not adequate, unless there are other shoes.

QUESTION 12 Smoking, pools and betting

Smoking is often underestimated in surveys. By asking quantities we hope to be able to work out roughly the expenditure. Note if cigars and not cigarettes. Take care to make betting seem a very common activity (which it is, of course), since information may not readily be forthcoming in the context of all these questions on shortages.

QUESTION 13 Christmas

Make sure that the sum you have is the extra expense on top of normal housekeeping for the household unit.

Figure of 21 pints is estimated. Milk from own farm is not actually measured. Dad man drinks a lot of milk.

QUESTION 19 Housekeeping and board

The question refers to ALL INCOME RECIPIENTS including pensioners, as well as earners, who contribute to the housekeeping expenses. Be careful that you probe for everyone in the house, including adolescent earners. Sometimes the actual sum available for housekeeping will be quite different from that suggested by the total income of the household. The husband or teenagers may retain quite large sums not only for their own use but because the pattern of responsibility in one household for expenditure may be different from that in another household which has the same composition. Housekeeping can be a touchy point if both husband and wife are present, and it is perhaps best dealt with by interviewing one of them on their own (the housewife preferably) and, if possible, checking later with the other (the husband). If both husband and wife are present avoid expressing any surprise or criticism if you think the housekeeping is small. Also avoid indicating any opinion on the question of whether wage-earners should pay bills. Try to imply that all arrangements are equally possible. We have listed the common ones, but there will be others. REMEMBER TO CODE EACH INCOME RECIPIENT.

QUESTION 19 (b) Money back

This can be daily fares, insurances or clubs paid, dinner money, or simply "spending money". Some teenagers hand over their wages but get clothing bought. Usually this question will apply to teenagers, but some husbands may get money from the housekeeping for their cigarettes and beer mid-week.

QUESTION 19 (c) Payment of housekeeping bills

Often the husband will pay some larger bills, but alternatively he may pay housekeeping but expect to "help out" if a heavy bill comes in. We realise that an estimate may be rough but try to get an average contribution. Teenage children may buy food as "treats" for the household from the money they retain. Again try for an average.

QUESTION 20 Long-term saving

We are not interested in asking here whether the informant has savings (that was asked in Section V). Nor are we interested here in asking for short-term saving. Instead the question explores whether at the present time the informant manages to put aside savings for a long-term objective.

QUESTION 21 Ten years ago

To give us some idea of fluctuating fortunes we ask what things were like ten years ago. Some persons aged 35 or over will have been at home in their parents' households ten years ago and therefore we have to find what was the composition of the household. In any case, we require an estimate of the total money flowing into the household, and the number of adults and children that were supported at that time. Give the informant time to recollect. And check that income includes pensions, family allowances, etc. Fortunately, the informant will already have some idea of what you are after from the detailed questions asked earlier.

Ten years ago. P2 (Facts owned farm) and he paid Informant \$5 per. This is one reason why inf. feels so much better off now. He said 10 years ago he was being paid very small wage for all the work he did. The estimated figure of \$11 per. is his own + his father's estimated income.

19c) This figure of \$2 includes \$1 paid to woman for cleaning.

Q. 20 Only manages to save because he had no children & wife to support. Also he doesn't pocket around thinking + 'playing fast + loose' as he used to - PITY!!

QUESTION 23 Poor now

Stress genuinely and try to avoid facetiousness at this point. Question 23 (a) explores what the informant understands by feeling "poor". If the word "poor" seems inappropriate use the alternative "very hard up".

QUESTION 24 Poverty

Stress the word "poverty". Do not explain what you think it means if you are asked. Seek from the informant his definition and write it in the box as clearly as you can.

QUESTION 25 Voting

Ask for those old enough to have voted in the last election (March 1965). We are not concerned who they voted for (although they will probably say) but would like to know if they are sufficiently involved to vote at all. Be careful to reassure people that this is confidential and as far as you are concerned non-voting is blameless—many people consider that voting is legally compulsory or morally obligatory and so voting figures are over-estimated. Try to get a clear recollection by fixing the incident (time of day, who they went with) if necessary. Stress National, not local elections.

QUESTION 26 Action on poverty

We are interested in what the informant thinks can be done. Give as full an answer as possible.

Please write in any additional notes.

It's not poverty, poverty is starvation. I was brought up in desperate poverty and I swore I wouldn't bring any child into the world to live as I lived as a child. I've gone to bed hungry hundreds of times, poverty is hunger, there is no real poverty now.
