# Form of introduction

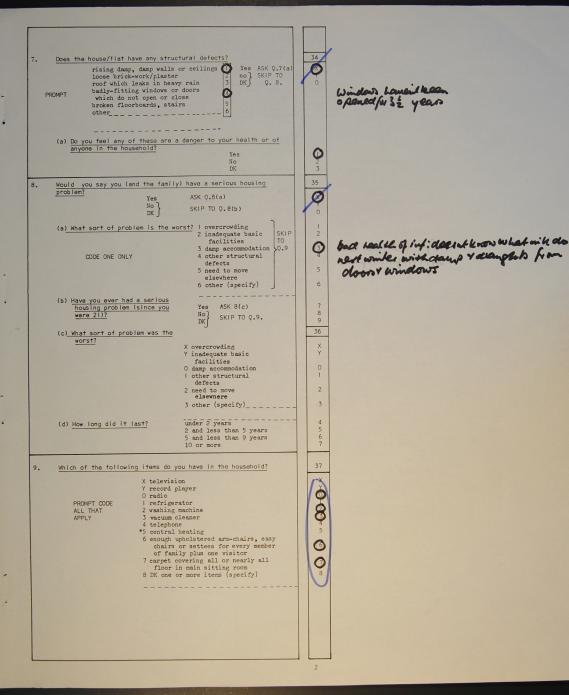

"My name is X. I'm from Essex/London University. We're preparing a report (writing a book) about standards of living in Britain today and how families manage. We think it's important for the Government and everyone else to know what the facts really are, We're hoping to talk to about 3,000 families throughout the country and I'd be very grateful if you could help us by answering some questions. All our information is, of course, strictly confidential."

Total actual interviewing time

### QUESTION 8

Obtain an estimate of total cost by the normal transport used. Some people who drive cars will offer their estimate of real cost but in such cases write in as indicated the average weekly mileage to and from work (not during work). In other instances assume 6d. per mile for all small cars (i.e. under 12 h.p.) and 8d. per mile for larger vehicles.

| 5   | miles | (a) | 6d. : | = 2s  | . 6d. | 5   | miles | @   | 8d. = | 3s.  | 4d. |
|-----|-------|-----|-------|-------|-------|-----|-------|-----|-------|------|-----|
|     | miles |     |       |       |       |     | miles |     |       |      |     |
| 50  | miles | a   | 6d. : | =25s  | . 0d. |     | miles |     |       |      |     |
| 100 | miles | (1) | 6d :  | = 50s | . 0d. | 100 | miles | (a) | 8d. = | 66S. | 8d. |

### QUESTION 9 Holiday pay

Be careful not to include pay received simultaneously with holiday pay for any week of work. Remember that many wage earners only receive the basic wage during holidays, which is usually much lower than average earnings.

# QUESTION 10 Sick pay

QUESTION 10 Sick pay

There are several practices. (1) Some employers (e.g. public services)
automatically deduct national insurance sickness benefit for the worker and
his dependants from pay during sickness (or sometimes expect him to
report what sickness benefit he receives so that it may be deducted from
later amounts of sick pay or even from the first weeks of earnings after
recovery from sickness). (2) Others (mainly smaller private firms) deduct
only the sickness benefit for the worker, ignoring what he may get for his
dependants. (3) Still others deduct nothing for any sickness benefit for
which a worker may be eligible. In the last two cases it might seem that the
worker will be better off in sickness than at work. This is true for some,
particularly salaried earners, but remember that if any employer pays
anything to a wage-earner in sickness rarely does it exceed the basic wage.
His average earnings may be much higher. (4) When the level of sick pay
is small no deductions may be made for any sickness benefit.
Changes in sick pay after the first weeks Changes in sick pay after the first weeks

In rare instances of persons who have been sick more than a few weeks the rate of sick pay will have changed. If the average is difficult to estimate write in the amounts thus: 4 weeks @ £10, 4 @ £5 10s., etc. After deductions of tax, etc. Note if only the amount of pay before deductions is known.

# QUESTION 11 Income of self-employed

The income of the self-employed is sometimes difficult to ascertain. Four alternative methods of questioning that have been found to be helpful in previous research are listed. Our first aim is to find the figure for annual income before tax. Thus Q. 11 A(iv) is the crucial one and if you can get the answer to this do not press unduly for the answers to the preceding questions, but they are helpful in establishing that (iv) is in fact the figure you want. The alternative aim (if you cannot achieve the first) is to seek the amount obtained from the business, either Method B — net profit including money taken out for own use, or Method C, the sums actually taken out for personal use. Method D should only be tried if all else fails, and frankly, is not of much help. An accurate figure for income is important and you should if necessary take time to establish it. Method D "Turnover" = total receipts from sale of goods and services, less any discount allowed.

(2) has railway

# VI HEALTH AND DISABILITY

### QUESTION 1 Health

## QUESTION 2 Unwell today

Note that the emphasis is on "today" and that you are instructed to complete the questionnaire as if all questions applied to the date when you first made contact with the household. This means that if you have postponed an interview because of illness you should ask all the questions about the day you first called.

# QUESTION 2a Off work

Check with the work record (page 8) where weeks off work will have a established. But here the information is needed as the basis for general questions about current illness and disability

# QUESTION 2a (i) & b (i) Number of weeks

If more than a year write "52". If the informant cannot be sure of the exact number and there is uncertainty whether it is less or more than eight weeks seek confirmation of the exact period from the individual concerned at a second call if necessary.

## QUESTION 2c Regularly

That is, at least once a month for the past three months in connection with the present illness or disability.

## QUESTION 3 Condition affecting activity

This question is designed to prepare the ground for the all-important Q. 7. You are not asked to trace every conceivable disability or condition from which people may suffer. Many of them, anyway, will not know diagnostic terms even if you ask them. Instead, you ask about conditions which restrict activity, show Flashcard No. 6 (which is nearly the same list as prompted verbally) and code any part of the body or faculty with which "trouble" is reported. You do not explore all possible effects but only a few examples of effects in which we are particularly interested. Remember you are only trying to find out about certain conditions, not every condition.

Nerves  $\underset{\text{Pay particular attention to the need to prompt for any trouble with }}{\text{Paymas}}$ 

# Reading ordinary print

Note that your code "No" only if a person cannot read print in a newspaper. Do not code "No" if a person merely has difficulty. For someone who cannot read interpret the question as "seeing" print in newspaper. We are interested at this point in sight not literacy.

Note that if an informant does not admit difficulty with hearing but it is observed, you can code accordingly.

Dat moment has pylon metally and is wanting for a thrical limb h

Odoclos said no point in treating her nesses of themhe husband- removed

The question refers to ALL INCOME RECIPIENTS including pensioners, as well as earners, who contribute to the housekeeping expenses. Be careful that you probe for everyone in the house, including adolescent earners. Sometimes the actual sum available for housekeeping will be quite different from that suggested by the total income of the household. The husband or teenagers may retain quite large sums not only for their own use but because the pattern of responsibility in one household for expenditure may be different from that in another household which has the same composition. Housekeeping can be a touchy point if both husband and wife are present, and it is perhaps best dealt with by interviewing one of them on their own (the housewife preferably) and, if possible, checking later with the other (the husband). If both husband and wife are present avoid expressing any surprise or criticism if you think the housekeeping is small also avoid indicating any opinion on the question of whether wage-earners should pay bills. Try to imply that all arrangements are equally possible. We form the action of the possible was not of the properties of the properties of the common ones, but there will be others. REMEMBER TO CODE EACH INCOME RECIPIENT.

# QUESTION 19 (b) Money back

This can be daily fares, insurances or clubs paid, dinner money, or him him planting a simply "spending money". Some teenagers hand over their wages but get clothing bought. Usually this question will apply to teenagers, but some all no wastle in husbands may get money from the housekeeping for their cigarettes and effect has to run beer mid-week.

# QUESTION 19 (c) Payment of housekeeping bills

Often the husband will pay some larger bills, but alternatively he may alone.

pay housekeeping but expect to "help out" if a heavy bill comes in. We realise that an estimate may be rough but try to get an average contribution. 43-10 s [half his Teenage children may buy food as "treats" for the household from the money they retain. Again try for an average.

# QUESTION 20 Long-term saving

We are not interested in asking here whether the informant has savings (that was asked in Section V). Nor are we interested here in asking for short-term saving. Instead the question explores whether at the present time the informant manages to put aside savings for a long-term objective.

# QUESTION 21 Ten years ago

To give us some idea of fluctuating fortunes we ask what things were like ten years ago. Some persons aged 35 or over will have been at home in their parents' households ten years ago and therefore we have to find what was the composition of the household. In any case, we require an estimate of the total money flowing into the household, and the number of adults and children that were supported at that time. Give the informant time to recollect. And check that income includes pensions, family allowances, etc. Fortunately, the informant will already have some idea of what you are after from the detailed questions asked earlier.

give her amplim house in he pension

State and L.T.E. . Plusious) would ceama reasonable guse.

# QUESTION 23 Poor now

Stress genuinely and try to avoid facetiousness at this point. Question (a) explores what the informant understands by feeling "poor". If the rd "poor" seems inappropriate use the alternative "very hard up".

# QUESTION 24 Poverty

Stress the word "poverty". Do not explain what you think it means if you are asked. Seek from the informant his definition and write it in the box as clearly as you can.

Halwer to there ofinian contian are her as esse is hills tacition.

# QUESTION 25 Voting

Ask for those old enough to have voted in the last election (March 1965). We are not concerned who they voted for (although they will probably say) but would like to know if they are sufficiently involved to vote at all. Be careful to reassure people that this is confidential and as far as you are concerned non-voting is blameless—many people consider that voting is legally compulsory or morally obligatory and so voting figures are over-estimated. Try to get a clear recollection by fixing the incident (time of day, who they went with) if necessary. Stress National, not local elections.

# QUESTION 26 Action on poverty

We are interested in what the informant thinks can be done. Give as full an answer as possible.

Please write in any additional notes

Last time Min. S. S. Ofices called they were book at work and Raming enough hot to get suppolementary or a rent reball. Now that they are both retired hill is to worried to got town hall; h/b cant be workered to do amplingabout it.

Husband ( though preindly knowsh to me) whombs of mean at he , used become in at all how ke fore amputation), for several weeks in End either does not cash his plusion or does not give her any money, so that The only has he was plastiant run the house and has to shop keying food to get money out of him. His recuperation after amountation cost her an extre Couple of pounds a week in food.
