Form of introduction

"My name is X. I'm from Essex/London University. We're preparing a report (writing a book) about standards of living in Britain today and how families manage. We think it's important for the Government and everyone else to know what the facts really are. We're hoping to talk to about 3,000 families throughout the country and I'd be very grateful if you could help us by answering some questions. All our information is, of course, strictly confidential."

QUESTION 8(d) — Length of housing problem

Number of years should not include any period before the age of 21.

QUESTION 9 — Structural defects

Note that the need for redecoration and refurnishing is not included. Informants may vary in their interpretation of a "defect" (for example, a woman living in a modern house may complain of small damp spots on the walls) but apart from discouraging people from regarding minor blemishes as defects you should accept what informants say.

QUESTION 9

Television: combined television, radio and record-playing sets may be listed under separate headings.

Central heating: uniform heating throughout dwelling (or part of dwelling) occupied by household.

QUESTION 10

At this point put any christian name of informant in first box on back flap, then christian names of all other adults and children in household. In complex households always list children immediately after their parent(s) or guardian(s). Otherwise, in the case, say, of a married couple and adolescent children you may find it easiest to list according to age: first the wife who is, say 54, husband 55, children 26, 24, 20, 17 and 14. When you write in information throughout the questionnaire please keep rigorously to the particular column for each named person in the household. Specifically "household" information is recorded in the first column. The informant's answers about himself should always be entered in the next column. The list of members under Q. 10 may have to be later modified according to who is temporarily residing in the household or who is temporarily away. This should be checked carefully. Boarders of more than four weeks residence should be recorded as members of the household; lodgers and sub-tenants will require separate questionnaires.

** HOUSEHOLD TYPE

On the back of the questionnaire you will find a code list of household compositions. When you are checking the questionnaire put the appropriate code for this household in the box allocated under the double asterisk

Definition of a Household

A private household comprises one person living alone or a group of persons living together, having some or all meals together and benefiting from a common housekeeping. Persons who have resided in the household for at least four weeks and are not expected to leave shortly, and persons who have resided in the household for less than four weeks but are not expected to leave again after that period, should be listed as members. Persons who are felt to be members of the household but are away (e.g. students or men at work) should only be included if they have been away for less than 13 weeks and are expected back within the total period of 13 weeks (code under 10(d)).

QUESTION 10(e)

Age-group: code as below

0 - 1	01
2 - 4	02
5 - 9	03
10 - 14	04
15 - 19	05
20 - 29	06
30 - 39	07
40 - 49	08
50 - 59	09
60 - 64	10
65 - 69	11
70 - 79	12
80 and over	13
DK	X
NA	Y

QUESTION 10(d)

Code reasons as below

Hospital/nursing Home/convallescent Home	1
Staying with relative or friend	2
Otherwise away on holiday	3
In armed services/merchant navy	4
Otherwise working away from home	5
Prison, approved school, Borstal, detention, etc.	6
Children's Home or foster home	7
Boarding school, college, university	8
Other (specify)	9

QUESTION 10(f) - Court order

A maintenance order secured through the courts. If no action has been taken to confirm the separation then code 1; in this situation at least the spouse in the household accepts that man and wife are not living together and there is no immediate prospect of them so doing.

QUESTION 11

If answer yes, complete other parts of question and amend Q. 10 if someone included in answers to that question who proves in fact to be a temporary visitor or guest (i.e. who has stayed less than 4 weeks and not expected to stay for total period longer than 4 weeks).

QUESTION 11(a)

If there is more than one visitor enter information for all in box or on this left hand page.

QUESTION 11(f) Code as follows:

Relative staying without payment	1
Friend staying without payment	2
Relative staying with payment	3
Friend staying with payment	4
Other person staying with payment	5
Other (e.g. nurse/student - specify)	6

QUESTION 12

If any person is felt to belong to the household and is expected to return to it after a total absence of less than thirteen weeks (e.g. at University, in hospital, at work, staying with relatives), then the interviewer should include such a person in the replies to Q. 10. But the information should also be recorded here in Q.12.

QUESTION 12(h) Prompt and code as follows:

Hospital/nursing/convallescent/residential Home	1
Staying with relative or friend	2
Otherwise away on holiday	3
In armed services/merchant navy	4
At boarding school, college or university	5
Otherwise working away from home	6
Approved school/Borstal/detention centre, etc.	7
Children's Home/foster home	8
Prison	9
Other (specify)	X

*Left moved into the house 20 years ago

wife*

QUESTION 13(a)

"Marriage": include common law marriage if in fact revealed by informant.

QUESTION 13(b)

Code whereabouts of parents only in terms of the replies so far given (or given later) by the informant. Direct questions might seem to be very offensive **and they must be avoided**. Indirect questions will be helpful according to the circumstances. For example, it may transpire that one child is the half-sister of another. It would then be very reasonable to ask "How are they related?" Or when it becomes obvious that one parent is not present, it would be reasonable to ask "Does John see his father regularly?"

"Accepted stepfather" or "Accepted stepmother" describes a man or woman not legally married to the natural mother or father of the child(ren) who has been in the household for at least 13 weeks and who is clearly accepted by the informant as the "stepfather" or "stepmother" of the child(ren) living in the household, albeit not accepted by law in this role.

QUESTION 14(a) Play within easy reach

This means that the mother can rush to a tearful child within, say, 30 seconds of hearing a wail. A "safe place" could of course include the garden.

1st - 20 yrs. } time spent in
2nd - 23 yrs } household.

23
20

SECTION II EMPLOYMENT

General

This section and the next (Occupational Facilities) should normally be asked of each adult earner in the household. If you happen to be interviewing the housewife during the day you should ask these questions as they apply to herself (and also to any children and adult dependants — e.g. elderly widowed mother) and then a separate (shorter) interview with the husband (and any other adult earner who is not available at the time of the first interview) to ask him for answers to this section, to the section on occupational facilities, to the questions on earnings in Section IV and any other questions which cannot be answered by the housewife.

QUESTION 1 Attended paid employment

All persons working for gain. If a housewife, retired person or even a schoolchild works a few hours for pay each week, he or she should be included. Also count man who is not at his main occupation (and even who may be thought of as unemployable) but who has pay from a minor job. We will be able to check in analysis. Our purpose is not to miss casual earnings and supplementary sources of income.

QUESTION 2 Two jobs

If a person does some kind of job for a different employer or on own behalf in his "spare" time this counts as a second job. Even if it is the same kind of job but is separately paid for (e.g. decorator working in spare time for himself) it should be counted as second job.

QUESTION 3 House or flat

Includes house combined with business premises or farm; but the question has been introduced primarily to cater for women home-workers on piece rates. Note that it refers to any second as well as the principal job.

QUESTION 4 Starting and finishing work times

The question applies to last week. Ignore variations in working hours from week to week. If working times were the same on at least three days of the week regard them as "usual". If there were two shifts (e.g. morning and evening), list according to starting time of the first and finishing time of the second, and note fact on left.

QUESTION 5 Aid in calculating hours of work

The table below assumes a 5-day week and 1 hour for lunch. Note that each digit should be put in each separate part of the box (i.e. one digit under No. 29 and the other under No. 30).

Starting time	Finishing time			
	4.30 p.m.	5.00 p.m.	5.30 p.m.	6.00 p.m.
7.00 a.m.	42½	45	47½	50
7.30 a.m.	40	42½	45	47½
8.00 a.m.	37½	40	42½	45
8.30 a.m.	35	37½	40	42½
9.00 a.m.	32½	35	37½	40
9.30 a.m.	30	32½	35	37½
10.00 a.m.	27½	30	32½	35

QUESTION 6 NOT AT WORK

Note that this question must also be answered for persons working last week for less than 30 hours. Unemployed: as distinct from "off sick" or temporarily off work (e.g. on holiday). The replies will be, for example: "I lost my job"; "I'm out of a job"; "There was redundancy at the firm so I'm out of work for the moment". Sometimes a person may say he is both unemployed AND sick or disabled, or it may for other reasons be difficult to specify just one code. Accept the best answer given by the informant even if you observe that someone who says he is unemployed is obviously sick or disabled (and vice-versa). Later questions are designed to establish whether or not he is seeking work and whether or not he is chronically sick or disabled.

Unpaid holiday

Part of our purpose in asking if holidays are unpaid is to ensure that 5 is not coded rather than the underlying reasons coded as 7, 8 or 9. Distinguishing between paid and unpaid holidays introduces complications but may be worthwhile (a) for the opportunity afforded to probe the reasons an unpaid holiday is being taken and (b) later when calculating weeks not at work in previous year.

2nd not working
because heart - weak
heart (origin)

QUESTION 7(b) Last Occupation

Write in the occupation on the left of the columns. Identify the person to whom the information applies in the little box (i.e. Inf or 2nd or 3rd etc.) This will both allow you to enter information for a second or third person if that proves to be applicable and for the office to code in the right column(s) on the basis of your information.

QUESTION 7(c) Looking for work

You will find yourself asking retired persons as well as unemployed and other persons this question. Sometimes it will be entirely applicable because persons who have been retired by their employers or have automatically ceased employment upon reaching a pensionable age of, say, 60, may in fact be seeking alternative work. It may even be applicable for some persons in their seventies and eighties. But sometimes it will plainly be inapplicable to frail persons of extreme age, especially women. In this case code "NO" and skip to Q. 8. When in doubt, however, you should ask the question.

bad
heart

QUESTION 8 Work record

Our aim is to trace persons whose work record is not full and to establish both numbers of weeks off work and numbers of weeks in which fewer than 30 hours were worked.

Weeks off work in year

The procedure is first to ask the general question about numbers of weeks off work. Some informants will be uncertain of the right answer. They can be encouraged by prompts about the last spell off work for unemployment, then sickness and so on down the list. Whenever it is clear they are going back more than 12 months you should move on to the next eventuality on the list. In the appropriate column note the number of weeks for all spells of unemployment, sickness, etc. You must record "O" in all open boxes when the person has had no spell off work for that reason. You may ignore the codes "X" and "Y" under each open box. They are for office use. For easy reference you can record each spell off work alongside the months listed below. (You may in rare instances interview persons, say, who had five or six spells off work through sickness and may need to show some rough working to arrive at the right total. (Please leave any rough working in case of queries.)

List member of household (informant, 2nd, 3rd) and weeks off work and reason

January.....	July.....
February.....	August.....
March.....	September.....
April.....	October.....
May.....	November.....
June.....	December.....

Some informants may have a quick answer for the first general question (usually because they have a very full or almost empty record of work in the year). You should nonetheless use the same procedure of asking about each type of eventuality and each spell off work as a check. If an informant says he hasn't been off work except for "just odd days because of colds and so on" ASK How much would it amount to over the past twelve months — one week, two weeks? AND CODE ACCORDINGLY. For informants (e.g. housewives or students) who have only worked for a few weeks in the year, you may find it quicker to establish first how long they were at work.

As with so many other questions about "the last twelve months" in this questionnaire, informants will often find it helpful if you encourage them to think forwards from a date exactly a year ago.

left unemployed for
30 weeks in last
12 months.
left only left
school at Easter
and only been
working 17 weeks.
left 4th class 3 jobs
since he left school.

3 jobs
since Easter

1st - gets 2 weeks
paid holiday when
he has been there a
year - same for both
(both at same factory).

QUESTION 9

Exclude Bank Holidays in counting up holiday entitlement. List number of weeks to nearest week. Do not insert " $\frac{1}{2}$ ".

1st gets
2 weeks
when needed
avg.

QUESTION 10 Occupation

See instructions above for Q. 7(b). Start by recording member of household in left-hand box (informant, 2nd, 3rd, etc.) and then carefully note occupation and industry or business. The office will code in the right-hand columns on the basis of your information. Avoid all vague terms, e.g. "engineer". If you find the answer too general or difficult to understand always ask "What do you do?" and write in the answer. In many households there will be only one or two persons who have been at work in the past twelve months. If necessary you can use all the space in the box just for one or two persons, providing it is clear to which person(s) the information applies.

QUESTION 11 Change of Job

Note that sub-questions (a) - (d) apply only to persons changing their jobs less than five years previously.

3rd Dobbie's
became a
stand wine
as she has
migraine.
1st gets
Sack.

11(c). IRU, etc., means Industrial Rehabilitation Unit or any other Government training centre.

QUESTION 12 Training Course

Our object is to check on men taking a re-training or training course, whether or not they changed their job. Some men may have taken a course and gone back to their former job or employers. Others may be unemployed and yet have taken such a course.

1st
got
1st
not

QUESTION 13 Fall in Earnings

You may be asked what you mean by "big" fall. Accept whatever the informant thinks is big. Put the information in the box, including the approximate earnings previously as well as the subsequent earnings and code the extent of the fall in the right-hand columns.

reducing

QUESTION 5

Note that the recent Industrial Employment Act gives employers the responsibility of notifying employees about certain terms of service. Many employees will have received some kind of notification.

QUESTION 6 Whether sick pay

Include only when employer pays cash directly to an employee who is sick. Contributions towards medical care costs come under Q. 11. Ideally we would like to have details of sick pay expected and length of time employer is expected to go on paying. (Sometimes a man is paid one proportion of pay for 3 months and then a lower proportion for a further 3 months.) Many informants, however, will not know and you should do your best to get a general idea at least of the **starting level** for the first month, recording underneath more specific information if known.

Sick pay amount What should be entered here is costs paid by employer. Sickness benefit should not be included even though employers contribute towards it. Earnings means **earnings before tax**.

QUESTION 7 Pension

Include any type of occupational pension, contributory or non-contributory, funded or unfunded.

QUESTION 7a Employee's contribution

Note that we are **not** attempting to establish what the employer pays, because many informants will not know. We require amount paid (preferably) or per cent of earnings **before tax**: many schemes are not of the type that the employer pays a fixed proportion of earnings. In these instances, code "None" or "Does not apply", according to the information you are given. When given a percentage note that it may be calculated on basic wages rather than earnings and you should note this so that we can adjust the figure in the office. Estimate the proportion of normal earnings the previous contribution amounts to — correct to nearest percentage point unless respondent names half a percentage point.

QUESTION 7b Pensionable age

That is, the age at which the pension is first payable.

QUESTION 7c Years towards pension

Do not count any years towards another pension in a previous employment unless those years have been accepted by the present employer as counting towards the pension from his employment.

QUESTION 7d Amount of pension

The question refers to the total occupational pension, though part of the cost may be paid by the informant. If the informant knows more details about his entitlement enter information in box (e.g. two-thirds of salary in last 5 years of service).

QUESTION 8 Meal vouchers

You may have to build up towards the average weekly value by asking "How much is each voucher worth?" "How many do you use in an average week?" Generally vouchers are additional to wage or salary but sometimes the employer will include them on a pay slip as part of earnings received. Watch that you do not count their value both here and later under net earnings.

QUESTION 9 Subsidised meals

Meals include drinks that may accompany them though we think it might cause offence to ask this in a formal question. We are interested to learn of anything from subsidised canteen meals to expense account lunches and dinners.

QUESTION 9a Saving on meals

Note that we are seeking an estimate of the difference between the actual cost to the employee and what he would have spent in the ordinary way if there were no subsidised canteen or restaurant available, or if his work did not allow him to charge the cost of outside meals. We are not seeking an estimate of the real value of the meals. Since some employees may not spend more outside on a poorer meal than they spend inside for a subsidised one, some entries may be "O" shillings.

QUESTION 10 Personal use

Includes transport to and from work.

QUESTION 10a Normal repairs

Excludes repairs caused by negligence of informant or family. **Make and type** — e.g. Vauxhall Cresta, Saloon or Morris 15 cwt. van. The description should be enough for us to look up its second-hand value as a check on the value.

QUESTION 10d Driver

This is a polite way of ascertaining whether the car is chauffeur-driven. Thus Code X includes self, family, friends and other employees driving for pleasure and not because they are paid to drive the respondent around.

QUESTION 11 Other benefits

Read the prompts slowly: they are carefully drafted to cover the perks of both senior and junior staff. **The goods** may vary from free or subsidised coal given to miners to discounts on goods bought or free vegetables, seeds or seedlings. Don't hesitate to pursue it further according to occupations of informants. **Transport** may be free leisure travel given to railway or bus employees or paid holidays given to senior executives. Note this section is supplementary to the use of a vehicle in Q. 10. **Medical expenses** may be premiums to insurance agencies for private medical care or the direct payment of doctors' bills. **Education** can range from free tennis lessons or typing lessons to payment of public school fees. **Shares in the company** can be given free or below market value.

ENCOURAGE THE INFORMANT to add items under the various headings together and give time for this to be done. We are interested to know what it would cost to buy these things privately even though the employee might not have chosen to do so (e.g. the employee might have used the Health Service if his employer did not pay for him to have private medical care).

"How much a year are these things worth altogether?"

The point here is that some kinds of entries will be money saved, say, on goods and services which the informant would have had to pay for, whereas other entries will involve things he would never have afforded or thought about. Our aim is to discover what equivalent in extra income would be needed if he did the same things but had to bear the full cost himself.

QUESTION 13 Satisfaction with job

The questions are laid out in a form which equally encourage positive or negative answers. You may shorten the question to "Are you satisfied or dissatisfied with —" providing the informant seems to be genuinely weighing the alternatives.

Facilities at work means facilities as asked under Q. 3 earlier.

*You can include
one pair of industrial
boots per year 10s
cheaper than normal
if you ask for the
1st 1.5 Mc*

*1st incl. boots
10/- cheap*

CURRENT MONETARY INCOME

General

This section asks questions in turn of the employed, the self-employed and then everyone, including those who are not employed. Our object is to obtain reliable estimates of income, before and after tax, for each income unit in the household, both for "last week" and "the last 12 months".

Income Unit

This is any person aged 15 or over, or if in full-time education any person aged 19 or over, together with wife or husband (if she or he has one) and children under 15 (or aged 16-18 if in full-time education), if any. According to this definition a man, wife, and children aged under 15 count as one income unit, but a middle-aged widow and a son who is a university student, or an elderly widow and a single daughter of 40, count as two income units. A household consisting of man and wife with three single children who are all over 15 years of age and who are at work counts as four income units.

Allocating Income

Usually amounts of income can be entered in the appropriate column, according to the person receiving it. Do not enter any income twice. Do not, for example, enter a particular amount both for the wife and the husband. Nor need you split up any amount part of which is payable for a dependent wife or child. Thus, do not attempt to divide up the total of family allowances; enter the total in the wife's column. And enter an amount for sickness benefit, say, even if it includes sums for the wife and children, in the husband's column (if indeed it is he who receives it).

Gross and Net

In the first question you carefully ask for the last pay net of deductions and go on in the second question to establish what these deductions are. The answers to both questions effectively give gross and net earnings for the last period for which pay was received and you can build up further information in the questions that follow. You should be conscious of this distinction throughout the section. It will not always be possible to get information both for income after tax and income before tax. Remember that if you cannot get an answer for one you may be able to get it for the other. Make a note whenever you can. We can calculate in the office.

Last 12 months

Though you start by finding what was the last amount of pay received it is very important also to find what was the average pay during the previous 12 months and gradually build up the total income received by the income unit and the household in those months. You have already filled in a work-record and this will help you to answer several of the questions in the section.

QUESTION 1 Last earnings

Remember to check earnings for each member of the household, even those of a wife who had a job for only a few weeks in the year, a young son who works only on Saturdays, and a retired man with a part-time job. Second or subsidiary earnings are dealt with in Q. 14. Note that each digit is ruled off from the next. Insert "0" in any column which does not apply. Please note also that we have allowed wider columns on these income pages so that you have enough room to write in figures. But note that you will have to indicate which member of the household received any income if you are obliged to use a fifth or sixth column.

QUESTION 2 Deductions

Don't forget that a total is better than nothing. If the informant is uncertain say, "I believe it is on your pay slip" and encourage him or her to check. We have asked you to put a tick if in fact you are shown a slip or the informant reads off the amounts. As before, the small boxes on the left are for you to identify the member of the household: "Inf.", "2nd", "3rd", etc.

National Insurance contributions

A male employee ordinarily pays 15s. 8d. and a female employee 13s. 2d. per week, although note that a married woman can elect to pay only 7d. per week to cover industrial injuries benefits. Boys under 18 pay 10s. 1d. and girls 8s. 5d. per week. Persons over 18 who are contracted out of the graduated pension scheme pay a higher flat rate insurance contribution of 18s. 1d. (men), 14s. 8d. (women).

Graduated pension contributions

The employee contributes 4½ per cent of each pound of gross weekly earnings between the ninth and the eighteenth, i.e. approximately 11½d. for each of these pounds, plus ¼ per cent for each pound between the 19th and the 30th, i.e. rather more than 1d. for each of these pounds. In fact a man with gross weekly earnings of £9 pays nothing, one with £13 pays 4s. 0d., one with £21 pays 9s. 0d., and one with £30, 9s. 9d. About one person in every five, however, is contracted out of the graduated pension scheme, but such persons nonetheless pay ¼ per cent on each pound of gross earnings between the ninth and the 30th, or a maximum of 2s. 1d.

QUESTION 3 Highest and lowest

Check the number of weeks worked by turning up the work record. Some people's earnings will have varied only in one or two weeks of the year and it will not be difficult for you to establish an average in (b). Remember Q. 3(b) is very important. Other people's earnings may have varied widely, either because of changes of job or variations in overtime. Do not include variations due to holidays or sickness. If it is difficult to arrive at an average write in the box or in the margins, e.g. 10 weeks @ £15 10s., six weeks @ £18 15s. and 23 weeks @ £24 11s. We will work out the rest. Do not include weeks of holiday or sickness, which are explored later.

QUESTION 4 Bonuses

If a commission or bonus has been included in Q. 3 do not now amend the answer to that question. If the information is given for the first time write the amount in the box and also strike out "Before" or "After" Tax as appropriate.

left page income tax as though he was a single man 1.3.11

lefts. rate of pay subject to overtime but it's a fixed guaranteed amount each week doesn't vary

left page income tax as single man divorce that so gets married

basic rate £9-10s

QUESTION 8

Obtain an estimate of total cost by the normal transport used. Some people who drive cars will offer their estimate of real cost but in such cases write in as indicated the average weekly mileage to and from work (not during work). In other instances assume 6d. per mile for all small cars (i.e. under 12 h.p.) and 8d. per mile for larger vehicles.

5 miles @ 6d. = 2s. 6d.	5 miles @ 8d. = 3s. 4d.
10 miles @ 6d. = 5s. 0d.	10 miles @ 8d. = 6s. 8d.
50 miles @ 6d. = 25s. 0d.	50 miles @ 8d. = 33s. 4d.
100 miles @ 6d. = 50s. 0d.	100 miles @ 8d. = 66s. 8d.

QUESTION 9 Holiday pay

Be careful not to include pay received simultaneously with holiday pay for any week of work. Remember that many wage earners only receive the basic wage during holidays, which is usually much lower than average earnings.

QUESTION 10 Sick pay

There are several practices. (1) Some employers (e.g. public services) automatically deduct national insurance sickness benefit for the worker and his dependants from pay during sickness (or sometimes expect him to report what sickness benefit he receives so that it may be deducted from later amounts of sick pay or even from the first weeks of earnings after recovery from sickness). (2) Others (mainly smaller private firms) deduct only the sickness benefit for the worker, ignoring what he may get for his dependants. (3) Still others deduct nothing for any sickness benefit for which a worker may be eligible. In the last two cases it might seem that the worker will be better off in sickness than at work. This is true for some, particularly salaried earners, but remember that if any employer pays anything to a wage-earner in sickness rarely does it exceed the basic wage. His average earnings may be much higher. (4) When the level of sick pay is small no deductions may be made for any sickness benefit.

Changes in sick pay after the first weeks

In rare instances of persons who have been sick more than a few weeks the rate of sick pay will have changed. If the average is difficult to estimate write in the amounts thus: 4 weeks @ £10, 4 @ £5 10s., etc. After deductions of tax, etc. Note if only the amount of pay before deductions is known.

QUESTION 11 Income of self-employed

The income of the self-employed is sometimes difficult to ascertain. Four alternative methods of questioning that have been found to be helpful in previous research are listed. Our first aim is to find the figure for annual income before tax. Thus Q. 11 A (iv) is the crucial one and if you can get the answer to this do not press unduly for the answers to the preceding questions, but they are helpful in establishing that (iv) is in fact the figure you want. The alternative aim (if you cannot achieve the first) is to seek the amount obtained from the business, either Method B — net profit including money taken out for own use, or Method C, the sums actually taken out for personal use. Method D should only be tried if all else fails, and frankly, is not of much help. An accurate figure for income is important and you should if necessary take time to establish it. Method D "Turnover" = total receipts from sale of goods and services, less any discount allowed.

N.B.
Hth due to have 1 week
paid holiday next
week for which he
will be paid £6.

QUESTION 14 Second job

This will have been established in the earlier section on Employment. Repeat the question because earnings from subsidiary occupations tend to be forgotten. For example, painters and decorators may have done one remunerative weekend job for a few weeks several months earlier in the year. A gardener may have done some intensive paid work for various local people in the evenings and weekends of the summer months. Or a university lecturer may have had a remunerative consultancy or a series of well-paid broadcasts at some point in the year. Remember that extra earnings from a source other than usual employment may not be thought of as a second job. You should probe for all kinds of additional earnings, depending on the nature of the usual employment.

QUESTION 15

This is laid out as concisely as possible on one page and you are asked to ring 01, 02, 03, etc., as appropriate and then to enter the rates per week and amounts below, carefully writing in the code "01" (i.e. Family Allowances) "02" (i.e. Retirement Pension) and so on so that we are clearly aware of the allowances to which the amounts refer.

Amounts will sometimes be joint—e.g. retirement pension for man and wife—or will be for several members of the household—e.g. sickness benefit for man and wife and children. In these instances the amount should be entered (if necessary, after the interview) in one column only, under that member of household receiving the payment. Wherever possible encourage informants (especially when elderly) to show you the allowance or pension book.

CODE 01 Family Allowances

	First child	Second	Third	Fourth & subsequent
up to April 1968	nil	8s.	10s.	15s.
after April 1968	nil	15s.	17s.	17s.

counting children under 15 or up to 19 if still in full-time education or college or an apprentice on low wages.

CODE 02 Retirement Pension

Note that the actual amounts vary widely. Increased pensions are paid if retirement is deferred. There are now in addition small graduated state pensions (averaging about 3s.) and pensions may be reduced because of earnings or a deficient contribution record. Note that some of these points also apply to other benefits. Pensions and supplementary benefits can be combined in a single payment. You will be prompting for supplementary benefit and wherever possible we should like you to list the amount separately (as well as the fact that it is being received). But whenever the rate given to you exceeds the standard rate below you should check the reason.

Single person (husband)	£4 10s. 0d.
Wife's income	£2 16s. 0d.
1st dependent child	£1 5s. 0d.
2nd dependent child	17s. 0d.

CODE 03 Standard Widow's Pension

Note: not the widow's allowance which is paid for the first 26 weeks after widowhood.

Widow or widowed mother	£4 10s. 0d.
1st dependent child	£2 2s. 6d.
2nd child	£1 14s. 6d.
3rd and subsequent child	£1 12s. 6d.

Depending on the circumstances of the death of the husband (armed service and so on) widows' pensions may differ in size. Note that family allowances are received in addition to dependent children's allowances.

Widow's Allowance: Widow £6 7s., children as for widow's pension

CODE 04 and 05 Sickness Benefit and Unemployment Benefit

Sickness benefit is often paid for periods other than a week. Find what was the last payment and for how many days (excluding Sundays). A payment for 6 days, excluding Sunday, makes up a "week's" benefit. Note that an earnings-related supplement may be paid in addition to the flat rate benefits listed below. Moreover, these benefit rates depend on the contribution record.

Single person	£4 10s. 0d.
Married woman	£2 16s. 0d.
1st dependent child	£1 5s. 0d.
Each subsequent child	17s. 0d.

CODE 06 Supplementary Benefit

The former "national assistance". Rent is sometimes paid direct to the landlord by the Supplementary Benefits Commission. There is a check later that the amount is known and counted as income.

CODE 07 Industrial Injury Benefit

£6 7s. 0d. (with additions for dependants) is payable for the first 26 weeks after injury after which the injured person goes before a Board to have his injury assessed for an individual disablement pension.

CODES 08 and 09 Industrial and Disablement Pensions

The 100 per cent rate is £7 12s. 0d. (with additions for dependants). CODE 09: Note that these are war pensions, not service pensions included under occupational pensions later in Q. 19.

CODE 10 Maternity Allowance

The standard rate of maternity allowance is £4 a week. It is paid to women who have been paying full national insurance contributions. It begins 11 weeks before the expected confinement and ends after the sixth week following it.

CODE 11 Maternity Grant

This grant is £22 either for home or hospital confinement.

CODE 14 Single Grant

This is officially described as an exceptional needs grant. The Ministry of Social Security has replaced the former National Assistance Board and you may need to explain "a grant from the Assistance". Probe carefully for this for all income units who are not employed, whether or not they receive supplementary benefit. A large number of people obtain single grants, e.g. for spectacles or dentures, even though they are not normally eligible to receive supplementary benefit. Note also that since you are asking about a period of 12 months there will be instances of people now in work who obtained a grant at an earlier point in the year.

*N.B. 2nd can't claim
widow's pension because
in eyes of M.S.S. she
is being supported
by left who is living
with her but for
tax purposes he and
unemployment and
supplementary
benefit he is treated
as a single man!
1.5 m.c.*

*3rd sick pay
left-6s.*

*left unft pay
[X] 4-16s-N.A.
[X] 4-16s-v/f pay
could not claim
for 2nd.*

QUESTION 16 Supplementary Benefit

It is most important that you should not overlook anyone who may be receiving or who has received supplementary benefit. There are two problems. One is, as noted above, that an informant may neglect to tell you that a standard benefit, like retirement pension and sickness benefit, is in fact supplemented. The other is that the official term "supplementary benefit" is fairly new. You may therefore have to prompt "supplementary assistance?", "national assistance?" or "public assistance?".

N.B. Inf. did not
feel embarrassed when
he received Nat. Assistance.

QUESTION 16(c) Rent paid by Supplementary Benefits Commission

If the rent is in fact paid by the S.B.C. we shall be asking later how much that is.

QUESTION 17 Single Grant

A single payment may be made to meet an exceptional need — such as bedding, clothing or household equipment. It may also be made to meet charges for glasses, dentures or dental treatment obtained through the National Health Service.

QUESTION 18 Income in last year at work

Note that you have already asked how many years it is since such a man last worked (in Section II). Now you are asking for the actual year when last at work, and, if it is 1955 or a later year, for the wage and household income. Do not neglect to find the composition of the household at that time (for example, write: man, wife and adult single son, or, man, wife and wife's widowed mother). We realise memories may be faulty but most people remember the last occasion they were at work and we are anxious (for retired and disabled persons, for example) to get a rough estimate of their fall in income upon giving up work. In the office we shall of course allow for average wage increases in the intervening years in interpreting the information you collect.

QUESTION 19 Employer's pension

The question is in a form which allows for the possibility of an ex-policeman, ex-serviceman or ex-civil servant drawing a pension though still holding a subsequent job. Service pensions should be included here but not war pensions, which have been covered in Q. 15. As before: **Strike out Before or After Tax as appropriate.**

QUESTION 20 Miscellaneous allowances and cash income

The various kinds of income have been laid out as compactly as possible but remember that two or more may need to be coded and you should prompt carefully. Underneath describe the type of allowance (so that we know to which code a particular amount refers) and the amount per week or per month. Ring either "1" or "2" depending on whether the allowance did in fact cover last week and strike out "Before" or "After" tax as appropriate. Make sure that in the case of allowances of husbands temporarily away from home that you have not already written in his earnings earlier as a member of the household. If you have do not write in any amount he pays. All we want here is any income which is not covered by earlier entries.

1/2ft. received £20 redundancy pay when he lost his job.

£20 redundancy pay

QUESTION 20(b) Allowances for separated and divorced wives

Some wives receive money direct from their husbands (or via the court). Others have court orders but these are signed over to the Supplementary Benefits Commission, which collects the money and pays the mother a standard weekly allowance. We therefore want to avoid counting the amount in Q. 20 if that amount is already included in the figure for supplementary benefit listed under Q. 15. We also want to be able to sort out irregular payments of both money from court orders and supplementary benefit. Check carefully in all these instances and write a note if anything needs clarification. Fatherless families form a small proportion of the total sample of households. Where money from court orders is paid irregularly and the mother claims weekly from the Supplementary Benefits Office she might not always claim the full amount, or may delay her claim in which case she loses benefit. Check to see if such loss is occurring.

1/2ft. pays his wife £2 a week. He has paid just regularly this last 12 months but he is still £60 in arrears from just year. He failed to apply 0.5 missed a couple of weeks this year.

QUESTION 21 Allowances and sums paid to others

This question complements some of the sub-questions in Q. 20. Here we are concerned to find out about all cash payments or allowances amounting to at least 10s. a week or £25 a year. Note that married children frequently pay rent or bills for elderly parents and old people sometimes make considerable cash gifts to their children. Examples are payments for grandchildren's clothing or holidays, payment of T.V. rentals and licence, cash gift for car.

1/2ft. £2 a week £1 from wife for maintenance owes £60 because of this gets £50 tax allowance.

QUESTION 22 Tax relief

Our object is to gain further evidence about reciprocal aid but also to help us in interpreting the figures for earnings and deductions given earlier. Note that you are not expected to probe for amounts.

QUESTION 23

Property income is considerable for a small percentage of informants and tends to be of two types: income from only one or two houses and income from a range of properties. With a few people considerable time may need to be spent on getting a reliable answer to this question. Net income after tax may not be known so we deliberately seek gross income before tax, then expenses, and only finally income after tax. You may not be able to get the third but make sure you get a figure for the first. It may also be difficult to secure a figure for expenses of rates and repairs but remember that property-owners will often know the total sums entered on their income tax returns. It may even be helpful to remind informants of this: "I mean the total like that in your income tax return — gross income less expenses." Note that many owner-occupiers and tenants rent rooms and flats to others in their accommodation. Do not count the rent from a boarder living in the household.

N.B. although he says he is treated as a single man for tax purposes he has £50 saving allowance because of this £2 maintenance. I do not know if this is correct interpretation but I got this answer after a bit of clarification. L.S.M.

1208
1238.0

15-2510d
per fortnight
103
51-6
12-11-61

QUESTION 27(a)

Our object is to try to find what rent might be paid in normal circumstances in that area for such accommodation. We have asked you to make an estimate in the light of your knowledge of the area if the informant cannot make such an estimate.

2nd got her council house because her previous house was bombed during the war.

QUESTION 28(a) Years on list

Sometimes the tenant will have taken on a tenancy from a member of the family who has died or moved away. Code "inherited tenancy" in all instances except that of a woman who has become the tenant through the death or absence of her husband.

QUESTION 28(d) Reason for obtaining council accommodation

Interpret "inheriting tenancy" as above. Although more than one reason may be advanced code what the informant considers to be the chief one.

house bombed

QUESTION 28(e) Rent reduction or rebate

Broadly three types of scheme have been introduced. Some councils operate an automatic differential rents scheme and some informants may have their rents reduced initially upon the introduction of the scheme. But in this sort of scheme most people will not know whether or not their rents are "reduced". The second scheme is one where the tenant has to apply for a reduction of rent he expects to pay in the future, upon test of means. The third scheme is one where the tenant applies for a rebate of rent paid in the past, on test of means. We are primarily concerned with the second and third schemes here.

QUESTION 6a Cars, Vans

Note that in Section II you will have noted any car owned by the business or firm and whether it is also used privately. Do not count this car here also but find out whether there is a second car—e.g. wife's. **If informant unable to value a vehicle note instead its make, type and year of manufacture to enable us to look up its value.**

QUESTION 6c Debts on vehicles

Note that the question does not apply only to payments which are overdue but to the total sum still owing. You will usually have difficulty in excluding interest from the amount owed. If the amount owed is estimated at less than £50 record the sum and do not take up time making sure that the interest is deducted. But if the amount owed including the interest element is £50 or more ask for the details listed under (c). We will then make an estimate in the office.

QUESTION 7 Life Insurance

If there is more than one policy add up the payments and, if necessary, note any difference in frequency or years of payment. Note that our main object is to establish the equivalent current value in cash of policies they hold. The majority of households will hold policies of little current value and you will see that if they pay less than 10s. a week we do not ask for any details.

QUESTION 8 Value of saleable assets

Please note that we do not envisage that goods in everyday use—beds, blankets, basic furniture, crockery, clothes—need to be valued. We are interested only in items of value that could be sold without serious detriment to the household and its daily life if some ready cash was badly needed. Jewellery, furs, stamp collections, works of art, antiques, and collections of books, might be sold and we need to obtain an approximate estimate of their total current worth. Naturally enough we cannot expect precise valuations and you will find the minimum value of £25 for an article (or a group of articles—e.g. a number of pieces of jewellery) helpful in avoiding protracted discussion of the value of articles used every day in the home.

QUESTION 9 Other assets

Rarely will there be any kind of asset not covered by our other questions. But by asking this general question you may be given information that belongs in the answer to another question. The informant may have misunderstood a question. But be careful not to include an item here which is already covered elsewhere.

QUESTIONS 10 & 11 General assets sold and windfalls

It may be difficult for you to secure an estimate of money raised or spent on "ordinary living expenses" but you will find that our object is fairly clear and once you understand it you can probe for an estimate. We do not want information about sums of money invested in new assets, in replacing old assets (e.g. property, including houses and cars) and in savings, but only information about sums of money spent in the ordinary way on housekeeping, food, clothing, and entertainment. An estimate is better than nothing. Note that we are not asking you to waste time checking small amounts of less than £25.

QUESTION 10 Assets sold in last 12 months

Some people, especially the elderly, will have sold some of their assets in the last 12 months to bolster a low income. This can be an important contribution to their standard of living. Savings—Note that each item should be prompted carefully, especially to persons who have already told you they have sizeable amounts in savings, stocks and shares, etc. Note that we are not interested in this question in total sums which amount to less than £25 in the 12 months. Nor are we interested in amounts that may have been saved from income and spent in the same year (e.g. savings for Christmas or a holiday).

Partial use of sales or savings for living expenses—In some cases property might have been sold, say, and part of the money spent but part of it saved. Try to get a total estimate only of the sum spent on ordinary living expenses.

*2nd does not
about £20 during
1/2 periods of
unemployment to
meet ordinary
living expenses.*

*1st 5s
2nd 7s 6d
3rd 3s 3d
4th 5s*

*just
managed*

QUESTION 11 "Windfalls"

The procedure is the same as in the last question (Q. 10). Remember that for some people an occasional windfall is the only hope they have of getting out of debt, and please make a note if you come across any interesting example.

QUESTION 12 Hire purchase

The informant may know neither the total amounts nor the amounts less interest which are owed. If the total is less than £25 simply write it in and do not waste time asking detailed questions about original price, etc. Otherwise ask each of the questions and tick the box if any documents are seen. Sometimes there may be several large items and you may need to use the margins on the page for any additional notes. Remember that we are concerned to establish the total owed altogether, less interest, and so long as this can be estimated you should not be concerned to take up time with every subsidiary question. If you cannot get the informant to give an estimate of the total owed less interest and succeed only in answering the questions under (a) you can leave to the office the job of estimating and writing in the total.

QUESTION 14 Rent or mortgage arrears

As elsewhere, remember to write in an amount in only one column (not in two columns, e.g. wife and husband). The amount should be debited to the person who normally pays the rent or the mortgage payments. Do not trouble to calculate the exact total amount owed. You have asked about the weekly or monthly payments earlier and so long as you tell us the number of payments (and whether weekly or monthly) we can calculate the figure in the office.

QUESTION 17 Total assets

Like the question at the end of the Income section, this question is designed to be used when an informant does not wish to go into detail or finds great difficulty, either in the first or in a subsequent interview, in answering preceding questions. Encourage him or her to help you gain at least a broad estimate of total assets, but remember this includes the value of any owner-occupied house, a car, the surrender value of any life insurance policy and personal possessions of value, as well as any savings or stocks and shares. Again, try to get a separate estimate for each income unit in the household, and if the informant shows willingness to go back to the preceding detailed questions encourage him to do so. Try if you can to get the informant to give an exact figure rather than a range.

VI HEALTH AND DISABILITY

QUESTION 1 Health

Do not probe for the names of disabling illnesses or conditions, unless the informant happens to mention them.

QUESTION 2 Unwell today

Note that the emphasis is on "today" and that you are instructed to complete the questionnaire as if all questions applied to the date when you first made contact with the household. This means that if you have postponed an interview because of illness you should ask all the questions about the day you first called.

QUESTION 2a Off work

Check with the work record (page 8) where weeks off work will have been established. But here the information is needed as the basis for general questions about current illness and disability.

QUESTION 2a (i) & b (i) Number of weeks

If more than a year write "52". If the informant cannot be sure of the exact number and there is uncertainty whether it is less or more than eight weeks seek confirmation of the exact period from the individual concerned at a second call if necessary.

QUESTION 2c Regularly

That is, at least once a month for the past three months in connection with the present illness or disability.

QUESTION 3 Condition affecting activity

This question is designed to prepare the ground for the all-important Q. 7. You are **not** asked to trace every conceivable disability or condition from which people may suffer. Many of them, anyway, will not know diagnostic terms even if you ask them. Instead, you ask about conditions which restrict activity, show Flashcard No. 6 (which is nearly the same list as prompted verbally) and code any part of the body or faculty with which "trouble" is reported. You do **not** explore all possible effects but only a few examples of effects in which we are particularly interested. Remember you are only trying to find out about certain conditions, not every condition.

Nerves

Pay particular attention to the need to prompt for any trouble with "nerves".

Reading ordinary print

Note that your code "No" only if a person cannot read print in a newspaper. Do not code "No" if a person merely has difficulty. For someone who cannot read interpret the question as "seeing" print in newspaper. We are interested at this point in sight not literacy.

Hearing

Note that if an informant does not admit difficulty with hearing but it is observed, you can code accordingly.

VIII INCOME IN KIND

General

This section aims to discover the major exchanges of services and gifts between the household and relatives or friends living elsewhere. One major problem is that people ordinarily take for granted the exchanges between themselves and their closest relatives. When being asked questions about "help" and "gifts" a housewife may not think of her mother, or her husband's mother, who lives nearby. A grandfather may not think of his daily activity of seeing a grandchild home from school. The first question is designed to help overcome this problem. You should remember that **most** households in the UK have frequent contact with a relative (either of a wife or a husband or of both) living elsewhere in the locality. Remember that independently of his wife a husband may see someone in his family (eg: his mother or a brother at work) every day. It will be very unusual if you make no entry in the box alongside Q. 1, so probe for likely relatives (eg: parents in the case of young and middle-aged people, brothers and sisters in the case of unmarried people, sons and daughters in the case of the elderly). In the remaining questions the contacts with such relatives are a likely indication of a flow of services or small gifts. Note that earning members of the household should normally be asked these questions independently of the housewife.

QUESTION 1 Relatives seen frequently

The question is designed to establish the existence of the relatives who have the most frequent contact with members of the household. Note that you ask "any of your family or a relative". The alternative wording will help to avoid information about really close relatives — eg: parents and children — who are thought of as "family" or even as members of a common household rather than as "relatives". By "most" days in the week is meant at least four of the seven days.

QUESTION 2 Help given

The unspoken assumption in the question is that these must be **unpaid** services. Prompt the items in the list carefully, emphasising those which are appropriate to the age or social situation of different members of the household. Make direct reference to the relatives listed in Q. 1. For example: "You say you see your mother every day. Do you do any of these things for her? And what about your sister?" Note that you prompt also for help given to friends and neighbours.

Hours

If two or three different services are undertaken, add together the informant's estimates of the time taken. Since the services are unpaid you should not expect informants to be able to give more than an approximate estimate of the time taken (that is, the time spent in the performance of the job, not interruptions for tea and conversations, etc).

QUESTION 3 Help received

The question reverses Q. 2 and proceed as in that question. Check in whatever way seems appropriate to establish the unpaid services being performed for members of the household. Again the question should be repeated for relatives seen frequently. "You've told me you see your mother every day. Does she do any of these things for you?" Two separate people might do the cleaning, for example. Add the hours together.

QUESTION 7 Food

Actual nutritional levels cannot be established by an interview of this kind, but it is hoped that these questions will show very roughly (i) whether a family member goes short of food occasionally, (ii) whether the family is able to buy relatively expensive foods frequently, (iii) whether any member of the family goes short of food occasionally, and (iv) to what extent patterns of food consumption vary with income.

(a) Cooked breakfast

Many women do not eat breakfast. Bacon and eggs is only an example. Others would be boiled or fried egg, haddock, kipper, etc. But not porridge, toast, fried bread or potatoes (the distinction is between carbohydrates and other foods).

(b) No cooked meal

Stress the whole day. A heavy breakfast but nothing later, or a heavy meal at supper-time will not count as going without a cooked meal during the day.

(c) Fresh meat

This will be difficult for households where children have school dinners, or members of the household eat canteen meals. It would be reasonable to code such persons "Yes" in the absence of any better information. It is highly possible that some housewives may have very little fresh meat (defined to include chicken, chops, frozen meat of any kind but not corned beef, tinned meat, boiled ham or sausages). Care is needed as meat-eating is probably over-stated, and when there is meat the men in the household and not the women may have it.

7/10/62

QUESTION 8 (a) Joint

Accept what the informant understands by a joint.

QUESTION 8 (b) and (c) Milk

Do not include school milk (a correction for this will be made in the office). Check for extra milk at weekends. Include sterilised milk ("stera") as fresh. Some houses buy milk in powder or liquid in tins for babies too, but do not attempt to assess the quantities of this. Just make a note that it is bought.

QUESTION 9 (b) Clothing

Clothing cheques are "Provident" cheques and the like where a cheque for £1, for example, entitles a person to shop at certain shops and repayment is made at 1s. in the £1 for 21 weeks. Clubs include any kind of arrangement through a catalogue, shop, or door-to-door salesman.

QUESTION 9 (c) and (d) Spending on clothing clubs

Some clubs include coal and furniture as well as clothes; try to get an estimate of the proportion of money spent on clothes. Informants often give a maximum figure, when in fact they miss or only pay something on account.

QUESTION 11 Adequate footwear

Includes state of repair as well as fit. Plimsolls and sandals in winter are not adequate, nor are boots alone adequate for summer. Plastic sandals are coded not adequate, unless there are other shoes.

QUESTION 12 Smoking, pools and betting

Smoking is often underestimated in surveys. By asking quantities we hope to be able to work out roughly the expenditure. Note if cigars and not cigarettes. Take care to make betting seem a very common activity (which it is, of course), since information may not readily be forthcoming in the context of all these questions on shortages.

QUESTION 13 Christmas

Make sure that the sum you have is the extra expense on top of normal housekeeping for the household unit.

every day
if could
if min
plus till
home

Should of fuel in
winter when left
unemployed
Kth commented that
he went out and
collected wood for the
fire 1.5 M.C.

QUESTION 14 Fuel

Everyone forgets to order coal. Stress "through lack of money".

burnt
wood

QUESTION 15 Birthday parties

Again the emphasis is on the expense and the experience of bringing the child's friends into the home, so stress that we don't mean just a family party.

QUESTION 17 (a) Social class

This question requires the views of both chief wage-earner (head of household) and housewife. By "chief wage-earner" we mean the person upon whose earnings the housekeeping income primarily depends. By "Head of Household" we have in mind the alternative person to be questioned if there is no chief wage-earner, e.g. a husband who is a retirement pensioner, or a widowed mother (who may be the tenant) living with her widowed daughter (the housewife) and grandchildren. As far as possible the views on social class should be sought from each person independently. If both are present take the question stage by stage, making sure both answer before passing on. The question asks first for a self-rating, which must be written down. At this stage **avoid putting names of classes into people's heads**. People often hesitate awkwardly, so try to get the informant to say what class she thinks she belongs to or "is nearest to". Prompt by repeating the question carefully, and say "It's what you think", implying (which is true) that everyone has their own idea and each is equally valid. Do not strain to get an answer if one is not easily forthcoming. Do not assume the informant will pick one class only. Multiple choices of "middle and working" or "professional and working" are allowed.

QUESTION 17 (b) Determinant of class

Code housewife and chief wage-earner only. Next, to give us a clue as to what the informant is using as a reference point and scale we ask, in effect, the informant's idea of what determines "class". Try to get the most important one only.

QUESTION 17 (c) Names of classes

Third, the informant is presented with a flash-card (this is why husband and wife should if possible be interviewed separately, since otherwise the second person may be unduly influenced). Code one item only. If informant wants (again) to say "None", say "Well, I've got to put something down, which would you think was nearest?" This rating is the most important bit of the question. Do not be puzzled if the wife gives a different answer from the husband. This is quite common.

QUESTION 17 (d) Father's main occupation

That is, the occupation held for most of the time (not necessarily the most recent).

QUESTION 18 Well off

Four comparisons are made in this series of questions—with relatives, with other people (note—of the same age) in locality, with the average in the country and finally in the context of time. Prompt carefully and remember that you might get a different response for one comparison than for another.

left expects his
situation to get better
but not too
optimistic "Can't
say F.O. to the
gaffer and get away
with like you could
two years back - got to wait
your step these days - too much
unemployment to shake off" left

expects it
to get
better
not as much
work
could say F.O.
to him

QUESTION 19 Housekeeping and board

The question refers to ALL INCOME RECIPIENTS including pensioners, as well as earners, who contribute to the housekeeping expenses. Be careful that you probe for everyone in the house, including adolescent earners. Sometimes the actual sum available for housekeeping will be quite different from that suggested by the total income of the household. The husband or teenagers may retain quite large sums not only for their own use but because the pattern of responsibility in one household for expenditure may be different from that in another household which has the same composition. Housekeeping can be a touchy point if both husband and wife are present, and it is perhaps best dealt with by interviewing one of them on their own (the housewife preferably) and, if possible, checking later with the other (the husband). If both husband and wife are present avoid expressing any surprise or criticism if you think the housekeeping is small. Also avoid indicating any opinion on the question of whether wage-earners should pay bills. Try to imply that all arrangements are equally possible. We have listed the common ones, but there will be others. REMEMBER TO CODE EACH INCOME RECIPIENT.

QUESTION 19 (b) Money back

This can be daily fares, insurances or clubs paid, dinner money, or simply "spending money". Some teenagers hand over their wages but get clothing bought. Usually this question will apply to teenagers, but some husbands may get money from the housekeeping for their cigarettes and beer mid-week.

QUESTION 19 (c) Payment of housekeeping bills

Often the husband will pay some larger bills, but alternatively he may pay housekeeping but expect to "help out" if a heavy bill comes in. We realise that an estimate may be rough but try to get an average contribution. Teenage children may buy food as "treats" for the household from the money they retain. Again try for an average.

QUESTION 20 Long-term saving

We are not interested in asking here whether the informant has savings (that was asked in Section V). Nor are we interested here in asking for short-term saving. Instead the question explores whether at the present time the informant manages to put aside savings for a long-term objective.

QUESTION 21 Ten years ago

To give us some idea of fluctuating fortunes we ask what things were like ten years ago. Some persons aged 35 or over will have been at home in their parents' households ten years ago and therefore we have to find what was the composition of the household. In any case, we require an estimate of the total money flowing into the household, and the number of adults and children that were supported at that time. Give the informant time to recollect. And check that income includes pensions, family allowances, etc. Fortunately, the informant will already have some idea of what you are after from the detailed questions asked earlier.

left in 1958 was earning £35 per week but he was working, he says, 100 hrs per week in a flour mill to replace it (not the sort to work 100 hrs 1.5.m.s.) and £5 a week. However he said that 10 years ago he could save and own a car. 1.5.m.s.

*left pay £5 - food £6 event £2
left pay about*

*3rd quarter £3
4th qtr £2*

*left £35
and £5*

*had a car
100 hrs a week
flour mills*

QUESTION 23 Poor now

Stress genuinely and try to avoid facetiousness at this point. Question 23 (a) explores what the informant understands by feeling "poor". If the word "poor" seems inappropriate use the alternative "very hard up".

QUESTION 24 Poverty

Stress the word "poverty". Do not explain what you think it means if you are asked. Seek from the informant his definition and write it in the box as clearly as you can.

QUESTION 25 Voting

Ask for those old enough to have voted in the last election (March 1965). We are not concerned who they voted for (although they will probably say) but would like to know if they are sufficiently involved to vote at all. Be careful to reassure people that this is confidential and as far as you are concerned non-voting is blameless—many people consider that voting is legally compulsory or morally obligatory and so voting figures are over-estimated. Try to get a clear recollection by fixing the incident (time of day, who they went with) if necessary. Stress **National**, not local elections.

QUESTION 26 Action on poverty

We are interested in what the informant thinks can be done. Give as full an answer as possible.

Please write in any additional notes.

This family live in what can only be described as filthy conditions. The house needs fumigating. I interviewed the 1st whilst he was sitting in a corner continuously and sitting down with only his vest and a pair of trousers on. He was to put it mildly mouth - He obviously finds it difficult to hold down a job - mainly because of his offensive appearance (i.e. dress, & scruffiness). His wife is to put it mildly totally illiterate and I suspect angina is a cover for laziness. However both the children are clean, well fed and well spoken. It is a complete contrast and a pity that they live in such an environment which incidentally is not caused by ~~lack~~ so much by lack of money but simply ^{by} generally a lack of household pride on both the 1st & 2nd part.

P.S. the 3rd has been engaged 4 years but won't get married until 1st & 2nd do because her father's friends think that the 1st & 2nd are married.
15.11.65

INTERVIEWER PLEASE CODE ALL THAT APPLY AFTER INTERVIEW

- (a) Household in which there is a child, one of whose parents is not resident
- (b) Household consisting of woman and adult dependants
- (c) Household in which there are five or more dependent children
- (d) Household containing an adult who has been unemployed for eight weeks (consecutively or in last 12 months)
- (e) Household containing an adult under 65 years of age who has been ill or injured for eight weeks (consecutively or in last 12 months)
- (f) Household containing a disabled adult under 65
(a) disabled
(b) borderline disabled
- (g) Household containing a disabled or handicapped child (including child ill or injured for eight weeks or more)
- (h) Household containing a person aged 65 or over who has been bedfast or ill for eight weeks or more or who is otherwise severely incapacitated
- (i) Household in which there are
(a) earners, none earning £12 a week or more
(b) adult male earners (aged 21 to 64) earning less than £14 a week
- (j) Household in which there are persons who are
(a) non-white
(b) born in Eire

COMPOSITION OF HOUSEHOLD: CODES (Q. 10, p. 3)

One generation		
Man alone: aged 60 or over	101	Man: and widowed or separated daughter ... 221
Man alone: aged under 60	102	Woman: and widowed or separated son ... 222
Woman alone: aged 60 or over	103	Woman: and widowed or separated daughter ... 223
Woman alone: aged under 60	104	Otherwise two generations: all related ... 224
Husband and wife: both aged 60 or over	105	Otherwise two generations: at least one person not related to any other ... 225
Husband and wife: at least one aged under 60	106	Other (SPECIFY) ... 226
Husband and wife: both under 60	107	
Man and woman: otherwise related	108	Three generation
Man and woman: unrelated	109	Man, son and d-in-law, grandchildren: all under 15 ... 301
Two or more men only: related	110	Man, son and d-in-law, grandchildren: at least one under 15 and one over 15 ... 302
Two or more men only: unrelated	111	Man, daughter & son-in-law, grandchildren: all under 15 ... 303
Two or more women only: related	112	Man, daughter and son-in-law, grandchildren: at least one under 15 and one over 15 ... 304
Two or more women only: unrelated	113	Woman, son and d-in-law, grandchildren: at least one under 15, one over 15 ... 305
Other (SPECIFY)	114	Woman, daughter and son-in-law, grandchildren: all under 15 ... 306
Two generation		Woman, daughter and son-in-law, grandchildren: at least one under 15, one over 15 ... 307
Man, wife: + 1 child under 15	201	Woman, daughter and son-in-law, grandchildren: at least one under 15, one over 15 ... 308
Man, wife: + 2 children both under 15	202	Married couple, married child and child-in-law, grandchildren under 15 ... 309
Man, wife: + 3 children all under 15	203	Otherwise 3-generations:
Man, wife: + 4 or more children all under 15	204	—all persons related, at least one child under 15 ... 310
Man, wife: + children, at least 1 under 15 and at least 1 over 15, none married	205	—at least one child under 15 ... 311
Man, wife: + children all aged 15-24, none married	206	—all persons related ... 312
Man, wife: + children all over 15, at least 1 aged 25 or over, none married	207	—unrelated ... 313
Man and one child under 15	208	Other (SPECIFY) ... 314
Man and two children both under 15	209	
Man and three or more children under 15	210	Four generation
Man and children at least one under and one over 15, none married	211	401
Man and children all aged 15-24, none married	212	DESCRIBE COMPOSITION BELOW
Man and children all over 15 at least one 25 or over, none married	213	
Woman: and one child under 15	214	
Woman: and two children both under 15	215	
Woman: and three or more children under 15	216	
Woman: and children, at least one under and one over 15, none married	217	
Woman: and children, all aged 15-24, none married	218	
Woman: and children all over 15, at least one 25 or over, none married	219	
Man: and widowed or separated son	220
