Form of introduction

"My name is X. I'm from Essex/London University. We're preparing a report (writing a book) about standards of living in Britain today and how families manage. We think it's important for the Government and everyone else to know what the facts really are. We're hoping to talk to about 3,000 families throughout the country and I'd be very grateful if you could help us by answering some questions. All our information is, of course, strictly confidential."

SECTION II EMPLOYMENT

General

This section and the next (Occupational Facilities) should normally be asked of each adult earner in the household. If you happen to be interviewing the housewife during the day you should ask these questions as they apply to herself (and also to any children and adult dependants — e.g. elderly widowed mother) and then a separate (shorter) interview with the husband (and any other adult earner who is not available at the time of the first interview) to ask him for answers to this section, to the section on occupational facilities, to the questions on earnings in Section IV and any other questions which cannot be answered by the housewife.

QUESTION 1 Attended paid employment

All persons working for gain. If a housewife, retired person or even a schoolchild works a few hours for pay each week, he or she should be included. Also count man who is not at his main occupation (and even who may be thought of as unemployable) but who has pay from a minor job. We will be able to check in analysis. Our purpose is not to miss casual earnings and supplementary sources of income.

QUESTION 2 Two jobs

If a person does some kind of job for a different employer or on own behalf in his "spare" time this counts as a second job. Even if it is the same kind of job but is separately paid for (e.g. decorator working in spare time for himself) it should be counted as second job.

QUESTION 3 House or flat

Includes house combined with business premises or farm; but the question has been introduced primarily to cater for women home-workers on piece rates. Note that it refers to any second as well as the principal job.

QUESTION 4 Starting and finishing work times

The question applies to last week. Ignore variations in working hours from week to week. If working times were the same on at least three days of the week regard them as "usual". If there were two shifts (e.g. morning and evening), list according to starting time of the first and finishing time of the second, and note fact on left.

QUESTION 5 Aid in calculating hours of work

The table below assumes a 5-day week and 1 hour for lunch. Note that each digit should be put in each separate part of the box (i.e. one digit under No. 29 and the other under No. 30).

Starting time	Finishing time			
	4.30 p.m.	5.00 p.m.	5.30 p.m.	6.00 p.m.
7.00 a.m.	42½	45	47½	50
7.30 a.m.	40	42½	45	47½
8.00 a.m.	37½	40	42½	45
8.30 a.m.	35	37½	40	42½
9.00 a.m.	32½	35	37½	40
9.30 a.m.	30	32½	35	37½
10.00 a.m.	27½	30	32½	35

QUESTION 6 NOT AT WORK

Note that this question must also be answered for persons working last week for less than 30 hours. **Unemployed:** as distinct from "off sick" or temporarily off work (e.g. on holiday). The replies will be, for example: "I lost my job"; "I'm out of a job"; "There was redundancy at the firm so I'm out of work for the moment". Sometimes a person may say he is both unemployed AND sick or disabled, or it may for other reasons be difficult to specify just one code. Accept the best answer given by the informant even if you observe that someone who says he is unemployed is obviously sick or disabled (and vice-versa). Later questions are designed to establish whether or not he is seeking work and whether or not he is chronically sick or disabled.

Unpaid holiday

Part of our purpose in asking if holidays are unpaid is to ensure that 5 is not coded rather than the underlying reasons coded as 7, 8 or 9. Distinguishing between paid and unpaid holidays introduces complications but may be worthwhile (a) for the opportunity afforded to probe the reasons an unpaid holiday is being taken and (b) later when calculating weeks not at work in previous year.

*Left works from 7.30 a.m. to 6 p.m. 5 days a wk
Basic times are 4 a.m. to 5 p.m. but there is compulsory overtime
He also works 5 hrs on a Saturday*

7.30 - 6

*basic 8.5
but working
compulsory
also 5 hrs
on Sat.*

QUESTION 5

Note that the recent Industrial Employment Act gives employers the responsibility of notifying employees about certain terms of service. Many employees will have received some kind of notification.

QUESTION 6 Whether sick pay

Include only when employer pays cash directly to an employee who is sick. Contributions towards medical care costs come under Q. 11. Ideally we would like to have details of sick pay expected and length of time employer is expected to go on paying. (Sometimes a man is paid one proportion of pay for 3 months and then a lower proportion for a further 3 months.) Many informants, however, will not know and you should do your best to get a general idea at least of the starting level for the first month, recording underneath more specific information if known.

Sick pay amount What should be entered here is costs paid by employer. Sickness benefit should not be included even though employers contribute towards it. Earnings means **earnings before tax**.

QUESTION 7 Pension

Include any type of occupational pension, contributory or non-contributory, funded or unfunded.

QUESTION 7a Employee's contribution

Note that we are not attempting to establish what the employer pays, because many informants will not know. We require amount paid (preferably) or per cent of earnings before tax: many schemes are not of the type that the employer pays a fixed proportion of earnings. In these instances, code "None" or "Does not apply", according to the information you are given. When given a percentage note that it may be calculated on basic wages rather than earnings and you should note this so that we can adjust the figure in the office. Estimate the proportion of normal earnings the previous contribution amounts to — correct to nearest percentage point unless respondent names half a percentage point.

QUESTION 7b Pensionable age

That is, the age at which the pension is first payable.

QUESTION 7c Years towards pension

Do not count any years towards another pension in a previous employment unless those years have been accepted by the present employer as counting towards the pension from his employment.

QUESTION 7d Amount of pension

The question refers to the total occupational pension, though part of the cost may be paid by the informant. If the informant knows more details about his entitlement enter information in box (e.g. two-thirds of salary in last 5 years of service).

QUESTION 8 Meal vouchers

You may have to build up towards the average weekly value by asking "How much is each voucher worth?" "How many do you use in an average week?". Generally vouchers are additional to wage or salary but sometimes the employer will include them on a pay slip as part of earnings received. Watch that you do not count their value both here and later under net earnings.

QUESTION 9 Subsidised meals

Meals include drinks that may accompany them though we think it might cause offence to ask this in a formal question. We are interested to learn of anything from subsidised canteen meals to expense account lunches and dinners.

QUESTION 9a Saving on meals

Note that we are seeking an estimate of the difference between the actual cost to the employee and what he would have spent in the ordinary way if there were no subsidised canteen or restaurant available, or if his work did not allow him to charge the cost of outside meals. We are not seeking an estimate of the real value of the meals. Since some employees may not spend more outside on a poorer meal than they spend inside for a subsidised one, some entries may be "0" shillings.

QUESTION 10 Personal use

Includes transport to and from work.

QUESTION 10a Normal repairs

Excludes repairs caused by negligence of informant or family. **Make and type** — e.g. Vauxhall Cresta, Saloon or Morris 15 cwt. van. The description should be enough for us to look up its second-hand value as a check on the value.

QUESTION 10d Driver

This is a polite way of ascertaining whether the car is chauffeur-driven. Thus Code X includes self, family, friends and other employees driving for pleasure and not because they are paid to drive the respondent around.

QUESTION 11 Other benefits

Read the prompts slowly: they are carefully drafted to cover the perks of both senior and junior staff. **The goods** may vary from free or subsidised coal given to miners to discounts on goods bought or free vegetables, seeds or seedlings. Don't hesitate to pursue it further according to occupations of informants. **Transport** may be free leisure travel given to railway or bus employees or paid holidays given to senior executives. Note this section is supplementary to the use of a vehicle in Q. 10. **Medical expenses** may be premiums to insurance agencies for private medical care or the direct payment of doctors' bills. **Education** can range from free tennis lessons or typing lessons to payment of public school fees. **Shares in the company** can be given free or below market value.

ENCOURAGE THE INFORMANT to add items under the various headings together and give time for this to be done. We are interested to know what it would cost to buy these things privately even though the employee might not have chosen to do so (e.g. the employee might have used the Health Service if his employer did not pay for him to have private medical care).

"How much a year are these things worth altogether?"

The point here is that some kinds of entries will be money saved, say, on goods and services which the informant would have had to pay for, whereas other entries will involve things he would never have afforded or thought about. Our aim is to discover what equivalent in extra income would be needed if he did the same things but had to bear the full cost himself.

QUESTION 13 Satisfaction with job

The questions are laid out in a form which equally encourage positive or negative answers. You may shorten the question to "Are you satisfied or dissatisfied with —" providing the informant seems to be genuinely weighing the alternatives.

Facilities at work means facilities as asked under Q. 3 earlier.

The wife firm has
concession with
other firms and shares
that make it possible
for the left. to save
£50 a year if he
buys certain things
from certain shops
He ~~saves~~ reckons
he saves £50
a year by this
scheme.

concession
with certain
firms
£50

CURRENT MONETARY INCOME

General

This section asks questions in turn of the employed, the self-employed and then everyone, including those who are not employed. Our object is to obtain reliable estimates of income, before and after tax, for each income unit in the household, both for "last week" and "the last 12 months".

Income Unit

This is any person aged 15 or over, or if in full-time education any person aged 19 or over, together with wife or husband (if she or he has one) and children under 15 (or aged 16-18 if in full-time education), if any. According to this definition a man, wife, and children aged under 15 count as one income unit, but a middle-aged widow and a son who is a university student, or an elderly widow and a single daughter of 40, count as two income units. A household consisting of man and wife with three single children who are all over 15 years of age and who are at work counts as four income units.

Allocating Income

Usually amounts of income can be entered in the appropriate column, according to the person receiving it. Do not enter any income twice. Do not, for example, enter a particular amount both for the wife and the husband. Nor need you split up any amount part of which is payable for a dependent wife or child. Thus, do not attempt to divide up the total of family allowances; enter the total in the wife's column. And enter an amount for sickness benefit, say, even if it includes sums for the wife and children, in the husband's column (if indeed it is he who receives it).

Gross and Net

In the first question you carefully ask for the last pay net of deductions and go on in the second question to establish what these deductions are. The answers to both questions effectively give gross and net earnings for the last period for which pay was received and you can build up further information in the questions that follow. You should be conscious of this distinction throughout the section. It will not always be possible to get information both for income after tax and income before tax. Remember that if you cannot get an answer for one you may be able to get it for the other. Make a note whenever you can. We can calculate in the office.

Last 12 months

Though you start by finding what was the last amount of pay received it is very important also to find what was the average pay during the previous 12 months and gradually build up the total income received by the income unit and the household in those months. You have already filled in a work-record and this will help you to answer several of the questions in the section.

QUESTION 1 Last earnings

Remember to check earnings for each member of the household, even those of a wife who had a job for only a few weeks in the year, a young son who works only on Saturdays, and a retired man with a part-time job. Second or subsidiary earnings are dealt with in Q. 14. Note that each digit is ruled off from the next. Insert "0" in any column which does not apply. Please note also that we have allowed wider columns on these income pages so that you have enough room to write in figures. But note that you will have to indicate which member of the household received any income if you are obliged to use a fifth or sixth column.

QUESTION 2 Deductions

Don't forget that a total is better than nothing. If the informant is uncertain say, "I believe it is on your pay slip" and encourage him or her to check. We have asked you to put a tick if in fact you are shown a slip or the informant reads off the amounts. As before, the small boxes on the left are for you to identify the member of the household: "Inf." "2nd" "3rd", etc.

National Insurance contributions

A male employee ordinarily pays 15s. 8d. and a female employee 13s. 2d. per week, although note that a married woman can elect to pay only 7d. per week to cover industrial injuries benefits. Boys under 18 pay 10s. 1d. and girls 8s. 5d. per week. Persons over 18 who are contracted out of the graduated pension scheme pay a higher flat rate insurance contribution of 18s. 1d. (men), 14s. 8d. (women).

Graduated pension contributions

The employee contributes $\frac{4}{100}$ per cent of each pound of gross weekly earnings between the ninth and the eighteenth, i.e. approximately 11 $\frac{1}{2}$ d. for each of these pounds, plus $\frac{1}{100}$ per cent for each pound between the 19th and the 30th, i.e. rather more than 1d. for each of these pounds. In fact a man with gross weekly earnings of £9 pays nothing, one with £13 pays 4s. 0d., one with £21 pays 9s. 0d., and one with £30, 9s. 9d. About one person in every five, however, is contracted out of the graduated pension scheme, but such persons nonetheless pay $\frac{1}{100}$ per cent on each pound of gross earnings between the ninth and the 30th, or a maximum of 2s. 1d.

QUESTION 3 Highest and lowest

Check the number of weeks worked by turning up the work record. Some people's earnings will have varied only in one or two weeks of the year and it will not be difficult for you to establish an average in (b). Remember Q. 3(b) is very important. Other people's earnings may have varied widely, either because of changes of job or variations in overtime. Do not include variations due to holidays or sickness. If it is difficult to arrive at an average write in the box or in the margins, e.g. 10 weeks @ £15 10s., six weeks @ £18 15s. and 23 weeks @ £24 11s. We will work out the rest. Do not include weeks of holiday or sickness, which are explored later.

QUESTION 4 Bonuses

If a commission or bonus has been included in Q. 3 do not now amend the answer to that question. If the information is given for the first time write the amount in the box and also strike out "Before" or "After" Tax as appropriate.

15s
2s-6d
grad pension 1s
1-12s-7d

basic rate is £14

11

W_o

QUESTION 8

Obtain an estimate of total cost by the normal transport used. Some people who drive cars will offer their estimate of real cost but in such cases write in as indicated the average weekly mileage to and from work (not during work). In other instances assume 6d. per mile for all small cars (i.e. under 12 h.p.) and 8d. per mile for larger vehicles.

5 miles @ 6d. = 2s. 6d.	5 miles @ 8d. = 3s. 4d.
10 miles @ 6d. = 5s. 0d.	10 miles @ 8d. = 6s. 8d.
50 miles @ 6d. = 25s. 0d.	50 miles @ 8d. = 33s. 4d.
100 miles @ 6d. = 50s. 0d.	100 miles @ 8d. = 66s. 8d.

QUESTION 9 Holiday pay

Be careful not to include pay received simultaneously with holiday pay for any week of work. Remember that many wage earners only receive the basic wage during holidays, which is usually much lower than average earnings.

QUESTION 10 Sick pay

There are several practices. (1) Some employers (e.g. public services) automatically deduct national insurance sickness benefit for the worker and his dependants from pay during sickness (or sometimes expect him to report what sickness benefit he receives so that it may be deducted from later amounts of sick pay or even from the first weeks of earnings after recovery from sickness). (2) Others (mainly smaller private firms) deduct only the sickness benefit for the worker, ignoring what he may get for his dependants. (3) Still others deduct nothing for any sickness benefit for which a worker may be eligible. In the last two cases it might seem that the worker will be better off in sickness than at work. This is true for some, particularly salaried earners, but remember that if any employer pays anything to a wage-earner in sickness rarely does it exceed the basic wage. His average earnings may be much higher. (4) When the level of sick pay is small no deductions may be made for any sickness benefit.

Changes in sick pay after the first weeks

In rare instances of persons who have been sick more than a few weeks the rate of sick pay will have changed. If the average is difficult to estimate write in the amounts thus: 4 weeks @ £10, 4 @ £5 10s., etc. After deductions of tax, etc. Note if only the amount of pay before deductions is known.

QUESTION 11 Income of self-employed

The income of the self-employed is sometimes difficult to ascertain. Four alternative methods of questioning that have been found to be helpful in previous research are listed. Our first aim is to find the figure for annual income before tax. Thus Q. 11 A(iv) is the crucial one and if you can get the answer to this do not press unduly for the answers to the preceding questions, but they are helpful in establishing that (iv) is in fact the figure you want. The alternative aim (if you cannot achieve the first) is to seek the amount obtained from the business, either Method B — net profit including money taken out for own use, or Method C, the sums actually taken out for personal use. Method D should only be tried if all else fails, and frankly, is not of much help. An accurate figure for income is important and you should if necessary take time to establish it. Method D "Turnover" = total receipts from sale of goods and services, less any discount allowed.

It would cost the 1st
28s to travel to and

144

1st. basic
2nd. basic
for first 2 weeks
+ then 1/3rd

QUESTION 16 Supplementary Benefit

It is most important that you should not overlook anyone who may be receiving or who has received supplementary benefit. There are two problems. One is, as noted above, that an informant may neglect to tell you that a standard benefit, like retirement pension and sickness benefit, is in fact supplemented. The other is that the official term "supplementary benefit" is fairly new. You may therefore have to prompt "supplementary assistance?", "national assistance?" or "public assistance?".

QUESTION 16(c) Rent paid by Supplementary Benefits Commission

If the rent is in fact paid by the S.B.C. we shall be asking later how much that is.

QUESTION 17 Single Grant

A single payment may be made to meet an exceptional need — such as bedding, clothing or household equipment. It may also be made to meet charges for glasses, dentures or dental treatment obtained through the National Health Service.

QUESTION 18 Income in last year at work

Note that you have already asked how many years it is since such a man last worked (in Section II). Now you are asking for the actual year when last at work, and, if it is 1955 or a later year, for the wage and household income. Do not neglect to find the composition of the household at that time (for example, write: man, wife and adult single son, or, man, wife and wife's widowed mother). We realise memories may be faulty but most people remember the last occasion they were at work and we are anxious (for retired and disabled persons, for example) to get a rough estimate of their fall in income upon giving up work. In the office we shall of course allow for average wage increases in the intervening years in interpreting the information you collect.

QUESTION 19 Employer's pension

The question is in a form which allows for the possibility of an ex-policeman, ex-serviceman or ex-civil servant drawing a pension though still holding a subsequent job. Service pensions should be included here but not war pensions, which have been covered in Q. 15. As before: **Strike out Before or After Tax as appropriate.**

members of h/hold in 1955:-

VI HEALTH AND DISABILITY

QUESTION 1 Health

Do not probe for the names of disabling illnesses or conditions, unless the informant happens to mention them.

QUESTION 2 Unwell today

Note that the emphasis is on "today" and that you are instructed to complete the questionnaire as if all questions applied to the date when you first made contact with the household. This means that if you have postponed an interview because of illness you should ask all the questions about the day you first called.

QUESTION 2a Off work

Check with the work record (page 8) where weeks off work will have been established. But here the information is needed as the basis for general questions about current illness and disability.

QUESTION 2a (i) & b (i) Number of weeks

If more than a year write "52". If the informant cannot be sure of the exact number and there is uncertainty whether it is less or more than eight weeks seek confirmation of the exact period from the individual concerned at a second call if necessary.

QUESTION 2c Regularly

That is, at least once a month for the past three months in connection with the present illness or disability.

QUESTION 3 Condition affecting activity

This question is designed to prepare the ground for the all-important Q. 7. You are not asked to trace every conceivable disability or condition from which people may suffer. Many of them, anyway, will not know diagnostic terms even if you ask them. Instead, you ask about conditions which restrict activity, show Flashcard No. 6 (which is nearly the same list as prompted verbally) and code any part of the body or faculty with which "trouble" is reported. You do not explore all possible effects but only a few examples of effects in which we are particularly interested. Remember you are only trying to find out about certain conditions, not every condition.

Nerves

Pay particular attention to the need to prompt for any trouble with "nerves".

Reading ordinary print

Note that your code "No" only if a person cannot read print in a newspaper. Do not code "No" if a person merely has difficulty. For someone who cannot read interpret the question as "seeing" print in newspaper. We are interested at this point in sight not literacy.

Hearing

Note that if an informant does not admit difficulty with hearing but it is observed, you can code accordingly.

*3rd suffers from
a bit of rheumatism.
Otherwise
remarkably healthy
for his age.*

but stuff

VII SOCIAL SERVICES

General

It is assumed that the housewife will normally be the informant. It is also assumed that she will generally be the "parent" to whom many of the questions are addressed. If in fact there is another mother in the household with a child then you may accept answers by a proxy (i.e. the housewife). You should also use your discretion about the housewife's ability to answer questions about the visits to hospital, doctor or dentist by each member of the household. If she plainly does not know or is uncertain you should check the appropriate questions when you come to ask earners in the household Sections II, III & IV. If this still does not involve the right members of the household you must check directly with them. Remember to code carefully since the questions vary as to whom they apply. We have repeated instructions at the head of each question to help you.

QUESTION 1 Welfare milk

Tokens are obtained from the Ministry of Social Security and handed to the milkman. All families with children under 5 can obtain a pint of milk for each child for each day for 6d. per pint cheaper than retail prices. Free milk tokens have to be claimed separately, and few parents claim them (other than those getting supplementary benefits).

QUESTION 2

Child welfare clinics are provided by local authority health departments. A visit to an ordinary hospital out-patient department does not count. Cod liver oil and orange juice are the main goods which may be purchased below normal shop prices. "Ever visited" means for the informant herself to obtain advice concerning herself or her child or to obtain goods. Accompanying another mother does not count.

QUESTION 3 Baby in hospital

It is possible there may be two mothers in the household.

On the National Health means free in a National Health Service hospital contracted to the N.H.S.

QUESTION 4 Type of school

Write in the name of each school on the left. The parent will usually know the type of school but if he or she does not or is doubtful the interviewer may know. If in doubt please verify from the Education Department or a teacher who knows about the local schools. If the child is aged 16 or over and is at an institute, college or school (of commerce, for example), list under Q. 12.

Type of School	Maintained day nursery, nursery school or class	1
	Private nursery school or nursery class	2
	State primary school	3
	Private primary/preparatory school	4
	Secondary modern/elementary/non-grammar denominational	5
	Comprehensive	6
	Technical school, Central, Intermediate	7
	State grammar	8
	Private or "public" school (secondary)	9
	Other (SPECIFY)	0

Whether built pre- or post-1940

Again, the parent may not know or may be unsure. Check if necessary.

QUESTION 5 School meals

Normally means when neither sick nor in the holidays. Did the child last week have school meals if attending school? If not attending school, when last attending school. Free school meals are provided to poorer children on a means test basis.

QUESTION 5(c) No facilities

There really are schools which do not offer school meals either because they lack dining space or there are too many children for the space available or for other reasons.

QUESTION 7 Days absent from school

Absences due to visiting an out-patient department or a dentist should not be counted.

QUESTION 8 Boarding school

If the child boards at a school which is primarily a day school code the answer "yes".

*very new
to school*

VIII INCOME IN KIND

General

This section aims to discover the major exchanges of services and gifts between the household and relatives or friends living elsewhere. One major problem is that people ordinarily take for granted the exchanges between themselves and their closest relatives. When being asked questions about "help" and "gifts" a housewife may not think of her mother, or her husband's mother, who lives nearby. A grandfather may not think of his daily activity of seeing a grandchild home from school. The first question is designed to help overcome this problem. You should remember that most households in the UK have frequent contact with a relative (either of a wife or a husband or of both) living elsewhere in the locality. Remember that independently of his wife a husband may see someone in his family (eg: his mother or a brother at work) every day. It will be very unusual if you make no entry in the box alongside Q. 1, so probe for likely relatives (eg: parents in the case of young and middle-aged people, brothers and sisters in the case of unmarried people, sons and daughters in the case of the elderly). In the remaining questions the contacts with such relatives are a likely indication of a flow of services or small gifts. Note that earning members of the household should normally be asked these questions independently of the housewife.

QUESTION 1 Relatives seen frequently

The question is designed to establish the existence of the relatives who have the most frequent contact with members of the household. Note that you ask "any of your family or a relative". The alternative wording will help to avoid information about really close relatives — eg: parents and children — who are thought of as "family" or even as members of a common household rather than as "relatives". By "most" days in the week is meant at least four of the seven days.

QUESTION 2 Help given

The unspoken assumption in the question is that these must be unpaid services. Prompt the items in the list carefully, emphasising those which are appropriate to the age or social situation of different members of the household. Make direct reference to the relatives listed in Q. 1. For example: "You say you see your mother every day. Do you do any of these things for her? And what about your sister?" Note that you prompt also for help given to friends and neighbours.

Hours

If two or three different services are undertaken, add together the informant's estimates of the time taken. Since the services are unpaid you should not expect informants to be able to give more than an approximate estimate of the time taken (that is, the time spent in the performance of the job, not interruptions for tea and conversations, etc).

QUESTION 3 Help received

The question reverses Q. 2 and proceed as in that question. Check in whatever way seems appropriate to establish the unpaid services being performed for members of the household. Again the question should be repeated for relatives seen frequently. "You've told me you see your mother every day. Does she do any of these things for you?" Two separate people might do the cleaning, for example. Add the hours together.

QUESTION 9 Staying overnight

The question concentrates on holidays and stays which are directly or indirectly paid for or subsidised by relatives and friends. It may be difficult to obtain an estimate of saving. We have in mind not only the instance of holiday but also an elderly person or a child staying with a member of the family for a lengthy period of the year during a time of loneliness or financial difficulty. Note that space allows only 8 columns on this page. In the unlikely event of interviewing in a household with 9 or 10 persons write in the details for the 9th and 10th persons lower on the page.

15 nights

QUESTION 9 (b) Saving

Note that there are two alternatives in the question. The saving from staying in a relative's or a friend's home should be estimated in terms of the comparable cost of living at home. The saving from being taken on holiday should be estimated in terms of the cost of going on holiday on one's own.

QUESTION 10 Visitors

This question reverses Q. 9 but estimates of cost should be written into the column allocated for the housewife.

No

1st & 2nd stayed
at a relatives for
15 nights - if you
call this 30 nights
in total this
most likely saved
£20 between them

QUESTION 19 Housekeeping and board

The question refers to ALL INCOME RECIPIENTS including pensioners, as well as earners, who contribute to the housekeeping expenses. Be careful that you probe for everyone in the house, including adolescent earners. Sometimes the actual sum available for housekeeping will be quite different from that suggested by the total income of the household. The husband or teenagers may retain quite large sums not only for their own use but because the pattern of responsibility in one household for expenditure may be different from that in another household which has the same composition. Housekeeping can be a touchy point if both husband and wife are present, and it is perhaps best dealt with by interviewing one of them on their own (the housewife preferably) and, if possible, checking later with the other (the husband). If both husband and wife are present avoid expressing any surprise or criticism if you think the housekeeping is small. Also avoid indicating any opinion on the question of whether wage-earners should pay bills. Try to imply that all arrangements are equally possible. We have listed the common ones, but there will be others. REMEMBER TO CODE EACH INCOME RECIPIENT.

QUESTION 19 (b) Money back

This can be daily fares, insurances or clubs paid, dinner money, or simply "spending money". Some teenagers hand over their wages but get clothing bought. Usually this question will apply to teenagers, but some husbands may get money from the housekeeping for their cigarettes and beer mid-week.

QUESTION 19 (c) Payment of housekeeping bills

Often the husband will pay some larger bills, but alternatively he may pay housekeeping but expect to "help out" if a heavy bill comes in. We realise that an estimate may be rough but try to get an average contribution. Teenage children may buy food as "treats" for the household from the money they retain. Again try for an average.

QUESTION 20 Long-term saving

We are not interested in asking here whether the informant has savings (that was asked in Section V). Nor are we interested here in asking for short-term saving. Instead the question explores whether at the present time the informant manages to put aside savings for a long-term objective.

QUESTION 21 Ten years ago

To give us some idea of fluctuating fortunes we ask what things were like ten years ago. Some persons aged 35 or over will have been at home in their parents' households ten years ago and therefore we have to find what was the composition of the household. In any case, we require an estimate of the total money flowing into the household, and the number of adults and children that were supported at that time. Give the informant time to recollect. And check that income includes pensions, family allowances, etc. Fortunately, the informant will already have some idea of what you are after from the detailed questions asked earlier.

QUESTION 23 Poor now

Stress genuinely and try to avoid facetiousness at this point. Question 23 (a) explores what the informant understands by feeling "poor". If the word "poor" seems inappropriate use the alternative "very hard up".

QUESTION 24 Poverty

Stress the word "poverty". Do not explain what you think it means if you are asked. Seek from the informant his definition and write it in the box as clearly as you can.

QUESTION 25 Voting

Ask for those old enough to have voted in the last election (March 1965). We are not concerned who they voted for (although they will probably say) but would like to know if they are sufficiently involved to vote at all. Be careful to reassure people that this is confidential and as far as you are concerned non-voting is blameless—many people consider that voting is legally compulsory or morally obligatory and so voting figures are over-estimated. Try to get a clear recollection by fixing the incident (time of day, who they went with) if necessary. Stress **National**, not local elections.

QUESTION 26 Action on poverty

We are interested in what the informant thinks can be done. Give as full an answer as possible.

Please write in any additional notes.

This family are comfortably well off but
as the left points out their financial
situation is O.V. solely due to the
fact that he works such long hours.
Except for this they are an "average"
household with nothing of any
particular significance to comment on.
I.S.M.
