## Form of introduction

"My name is X. I'm from Essex/London University. We're preparing a report (writing a book) about standards of living in Britain today and how families manage. We think it's important for the Government and everyone else to know what the facts really are. We're hoping to talk to about 3,000 families throughout the country and I'd be very grateful if you could help us by answering some questions. All our information is, of course, strictly confidential."

## SUMMARY : COMPLETE AFTER INTERVIEW

1. Interview carried out at first call at second call at third or later call	10 <input checked="" type="radio"/> X Y 0	3. Which sections were answered in whole or in part by which persons on the household?	Write Section 1, 2, 3, etc.	5. Number of other households at address →	21
		Informant	13	None	<input checked="" type="radio"/> 0
		2nd member	14	6. Household living on	22
2. Information for household — — complete skip to Q. 3 incomplete—answer 2a	11 <input checked="" type="radio"/> X Y		15	ground basement floor	<input checked="" type="radio"/> X
(a) Sections incomplete	1 2 3 4 5 6 7 8 9	CODE ALL THAT APPLY AS LISTED IN Q'AIRE (Some Sections may be listed twice)	16	1st floor	<input checked="" type="radio"/> Y

		Self-con. flat attached to shop/business	2	Yes	<input checked="" type="radio"/> 8
		Room(s): furnished	3	No	<input checked="" type="radio"/> 9
		Other (specify)	4		

**QUESTION 7(b) Last Occupation**

Write in the occupation on the left of the columns. Identify the person to whom the information applies in the little box (i.e. 1st or 2nd or 3rd etc.) This will both allow you to enter information for a second or third person if that proves to be applicable and for the office to code in the right column(s) on the basis of your information.

**QUESTION 7(c) Looking for work**

You will find yourself asking retired persons as well as unemployed and other persons this question. Sometimes it will be entirely applicable because persons who have been retired by their employers or have automatically ceased employment upon reaching a pensionable age of, say, 60, may in fact be seeking alternative work. It may even be applicable for some persons in their seventies and eighties. But sometimes it will plainly be inapplicable to frail persons of extreme age, especially women. In this case code "NO" and skip to Q. 8. When in doubt, however, you should ask the question.

*Worked full-time  
at 61 but new pension at 60*

## V SAVINGS AND ASSETS

### QUESTION 1 Personal

This excludes a business bank account which is covered by Q. 4. Avoid double-counting the same bank balance or assets when questioning husband and wife.

### QUESTION 2 Savings

Note that you should proceed by prompting all items to see how many are appropriate, then try to establish a total and then establish totals for each item only as a check or if necessary. Care should be taken to avoid double-counting. If the informant is hesitant or confused repeat the question to make sure he or she knows what kind of savings you are referring to and THEN show Flashcard No. 4 to get the total. Then try to obtain an absolute total rather than a range. For example, you could ask: "Would you say the figure was at the top end or the lower end of that range — nearer X or nearer Y?"

### QUESTION 2(c) Interest

Try to establish the amounts the informant receives **in the form he receives it** — that is, before tax is deducted or after it has been deducted at source. In difficult instances you need not waste time converting a "before tax" total into "after tax" so long as you make plain what it is. We will do that work in the office.

### QUESTION 3 Value of stocks and shares

This question of the value of stocks and shares is crucial and every encouragement should be used to obtain an answer. Some informants simply will not know. Remember that brokers sometimes send an annual valuation. If there is considerable uncertainty, tactfully suggest or imply that it would be very helpful to know and take any opportunity to see the valuation or to leave a note (and s.a.e.) so that a more reliable estimate can be made and either you can pick it up at a second call or ask for it to be sent on.

### QUESTION 3(b) Interest

Proceed as in Q. 2c above. Mostly amounts will be received **after tax** has been deducted.

### QUESTION 4

This is to cover any type of business which is owned in part or in whole by the informant. Being a director does not necessarily mean ownership. The answer to this question should not duplicate the answer to the previous question. Shares come under Q. 3. This is to cover such things as shops, professional practices and small businesses of every kind except limited companies. In all cases make sure that money in the business, bank account and stocks are borne in mind when the valuation is made. When the business (e.g. shop or farm) is run from the owner occupier's dwelling, the value of the dwelling will often have been included in the answer to this question (i.e. Q. 25 in Section V). **UNDER NO CIRCUMSTANCES MUST THE DWELLING BE COUNTED TWICE.** The valuation should be on the assumption that the informant had to sell but was in no great hurry. A year or even more could be taken to find a purchaser. The valuation should NOT be made on the basis of: "What would you take for your business?" — that is, when the informant has to be persuaded to sell. **NOTE** that vehicles should be included in the valuation of a business — say of a haulage contractor, a cab owner or even a building contractor or window cleaner.

### QUESTION 5 Other property

Remember that some people use two houses. Others have houses which they rent off to others. This last is not uncommon among elderly people who may be very poor themselves. A "boat" may include anything from a luxury yacht to a small rowing boat.

*No assets  
at all.  
No Bank Bkts  
or Savings.*

If you are asked "What do you mean by 'best'?" you should say "It is up to you to decide" (adding, but only if necessary, "whether it's best because of the money, the people, the job in itself or anything else"). Of course there will be people who give a mixture of reasons. Code the one they treat as most important. If they are undecided code DK.

A few persons — e.g. students — may have worked for part of the last year, or may work every Saturday and still be in full-time education. We will be asking about them later. Code them as still in full-time education.

The question worded so that if someone has missed a year's schooling because of illness, say, between the ages of 5 and 14, he can adjust his answer accordingly. You can check (or aid other informants trying to reach an answer) by deducting five years from the leaving age and then asking if the result allows for any absence because of hospitalisation, war evacuation, or any other reason. Note that full-time education can be provided in hospital. Only deduct a year if AL is less than 5 years of school. When writing in leaving age and number of years education remember again to insert each digit.

If you are in doubt from what you have been told about a man's job whether it is manual ask, "How do you do your work? Is it mostly heavy work, or operating a machine or mostly with your hands?" If he indicates any of these ask Q. 16. If still in doubt ask the question and write a note.

about a man's job  
if mostly heavy  
" If he indicates  
and write a note.

*Spattered  
with half time at  
12- afternoon  
one week  
9 mornings  
~~next~~ next*

Follow same procedure as above under Question 10. It will be even more necessary to probe for the exact type of job. Encourage the woman to tell you what her husband did, since the answer is most important for us in classifying occupational status.

## VI HEALTH AND DISABILITY

### QUESTION 1 Health

Do not probe for the names of disabling illnesses or conditions, unless the informant happens to mention them.

### QUESTION 2 Unwell today

Note that the emphasis is on "today" and that you are instructed to complete the questionnaire as if all questions applied to the date when you first made contact with the household. This means that if you have postponed an interview because of illness you should ask all the questions about the day you first called.

#### QUESTION 2a Off work

Check with the work record (page 8) where weeks off work will have been established. But here the information is needed as the basis for general questions about current illness and disability.

#### QUESTION 2a (i) & b (i) Number of weeks

If more than a year write "52". If the informant cannot be sure of the exact number and there is uncertainty whether it is less or more than eight weeks seek confirmation of the exact period from the individual concerned at a second call if necessary.

#### QUESTION 2c Regularly

That is, at least once a month for the past three months in connection with the present illness or disability.

### QUESTION 3 Condition affecting activity

This question is designed to prepare the ground for the all-important Q. 7. You are **not** asked to trace every conceivable disability or condition from which people may suffer. Many of them, anyway, will not know diagnostic terms even if you ask them. Instead, you ask about conditions which restrict activity, show Flashcard No. 6 (which is nearly the same list as prompted verbally) and code any part of the body or faculty with which "trouble" is reported. You do **not** explore all possible effects but only a few examples of effects in which we are particularly interested. Remember you are only trying to find out about certain conditions, not every condition.

#### Nerves

Pay particular attention to the need to prompt for any trouble with "nerves".

#### Reading ordinary print

Note that your code "No" only if a person cannot read print in a newspaper. Do not code "No" if a person merely has difficulty. For someone who cannot read interpret the question as "seeing" print in newspaper. We are interested at this point in sight not literacy.

#### Hearing

Note that if an informant does not admit difficulty with hearing but it is observed, you can code accordingly.

*Candidate health fair for age  
-83 - looks very fine  
to me but says can't  
expect a lot at 83  
years old.*

*Sees Dr.  
once a month  
when he pops in. If gets a  
cold settles on chest and  
difficult to shake off.*

#### QUESTION 4 Special schools & centres

This question is asked only of persons who have been ill and off work or confined to bed or the house for eight weeks or more continuously, and those who are coded for any item in Question 3.

#### QUESTION 5 Date of onset of sickness or disabling condition

Our object is to establish the year of onset but the question is worded 'first have any condition' so as to allow for the fact that some conditions develop out of others. For persons with a disabling condition you ask, in effect, when all the trouble started.

##### Previous occupation

In the section on Employment you have already asked for the last occupation of everyone not now at work (p. 7). Some people change their occupation because of a disabling condition before finally being obliged to give up work. You should probe for the (previous) occupation which people had before any history of illness or disability started.

#### QUESTION 6 Mobility

You should code people according to their **usual** mobility, taking no account of a temporary illness or injury. "Usual mobility" may be interpreted as "for at least eight weeks and unlikely to become more mobile in the immediate future" or "for less than eight weeks but unlikely to become more mobile within at least that total period." Someone who spends most of the time in bed and needs help to get out to sit in a chair is defined as bedfast. Someone who can get out of his bed into a chair or wheelchair and who can walk indoors but not even a few yards outdoors without help is defined as housebound. The test is whether someone can walk on his own (without the assistance or company of any other person — though with or without sticks or crutches).

#### QUESTION 7 Incapacity

In prompting this series of questions you may find it simplest to ask the question without the variation in brackets, unless it seems appropriate. Remember you are asking whether they have any difficulty in doing X. Sometimes certain questions will not apply to particular people or to particular situations. You will meet people who do not (or say they do not) wash down, negotiate stairs (living in bungalows), go shopping and do housework (especially some men). The question should then be asked in terms of "But would you have any difficulty in doing X if you had to?" The codes 0, 1, 2 are listed in increasing order of difficulty and you should check that you ring one of them for each item.

#### QUESTION 7e

It would be insensitive and unnecessary to ask questions about the daily activities of the bedfast. They are therefore excluded from this question and the rest of the series. You may encounter other people (e.g. advanced obesity) of whom it is clear that they cannot do certain activities. You may refrain from putting questions to them. The same is true of any situations in which the questions are likely to cause great distress. **BUT AS A GENERAL RULE QUESTIONS 7 (e) to (i) SHOULD BE ASKED FOR ALL OTHER THAN THE BEDFAST AND CHAIRFAST.**

#### QUESTIONS 8 & 9 Variation in incapacity

These questions explore whether the pattern of answers to Question 7 is permanent. Question 8 seeks any indication of seasonal variations (e.g. bronchitis) and Question 9 day-to-day variations in the effects of disability.

#### QUESTION 13

NHS means free, wholly paid for by the National Health Service. Private and amenity (paying) beds in NHS hospitals should be coded as private.

#### QUESTION 13(b) Number of nights

If a person has had two or more spells in hospital add the total number of nights together.

#### QUESTION 13(c) Name of hospital

This will be used in the office to code type of hospital.

#### QUESTION 14

Ill in bed means actually in bed for at least half the day.

#### QUESTION 15

Visits by and to a doctor will include calls when a person is no longer in bed but up and about. The questions are not, therefore, dependent on the answer yes to Q. 14. When the household is large and/or when there have been several visits it may take you a little time to obtain a reliable answer. Remember that in cases of difficulty it is usually best to approach the answer by asking: "When did you last see your doctor?" "And when was the time before that?" "So that means you saw your doctor seven times altogether in the last 12 months?" Remember that we want to count each consultation, even if there are two consultations on one day or on succeeding days. Remember also to include locums and other (alternative) doctor seen in this period.

#### QUESTION 15(c) Visits paid for

If the informant is a wife who makes a visit to her NHS doctor and pays later for the pill, which he prescribes, this should still be counted as a NHS visit.

#### QUESTION 16 Spectacles

Most people pay in part for spectacles even under the NHS but some obtain them free by paying and then claiming a refund on test of means (by the SBC).

#### QUESTION 18 Doctor at hospital

It is the number of occasions we want to know, not the number of doctors seen at the hospital.

#### Visits to dentist

Remember to ask number of visits, not number of courses of treatment.

#### Home help

We are interested only in the use of a local council's Home Help Service.

#### Someone from the Welfare

We mean a social worker or officer from our Council health, welfare or children's department who is concerned with some aspect of family welfare. Include a health visitor, say, but not an officer from the Supplementary Benefits Commission or someone from a voluntary organisation — like the WVS or Salvation Army.

#### QUESTION 18(a) Paying a dentist

The point is that very poor people can get free dentures and do not have to pay the £1 for a course of treatment.

#### QUESTION 18(b) Home help

Some councils charge for a home help's service on test of means.

*Home help.  
6 hours week  
(Twice)  
Cannot get or  
do home help.*

## VIII INCOME IN KIND

### General

This section aims to discover the major exchanges of services and gifts between the household and relatives or friends living elsewhere. One major problem is that people ordinarily take for granted the exchanges between themselves and their closest relatives. When being asked questions about "help" and "gifts" a housewife may not think of her mother, or her husband's mother, who lives nearby. A grandfather may not think of his daily activity of seeing a grandchild home from school. The first question is designed to help overcome this problem. You should remember that **most** households in the UK have frequent contact with a relative (either of a wife or a husband or of both) living elsewhere in the locality. Remember that independently of his wife a husband may see someone in his family (eg: his mother or a brother at work) every day. It will be very unusual if you make no entry in the box alongside Q. 1, so probe for likely relatives (eg: parents in the case of young and middle-aged people, brothers and sisters in the case of unmarried people, sons and daughters in the case of the elderly). In the remaining questions the contacts with such relatives are a likely indication of a flow of services or small gifts. Note that earning members of the household should normally be asked these questions independently of the housewife.

#### QUESTION 1 Relatives seen frequently

The question is designed to establish the existence of the relatives who have the most frequent contact with members of the household. Note that you ask "any of your family or a relative". The alternative wording will help to avoid information about really close relatives—eg: parents and children—who are thought of as "family" or even as members of a common household rather than as "relatives". By "most" days in the week is meant at least four of the seven days.

#### QUESTION 2 Help given

The unspoken assumption in the question is that these must be **unpaid** services. Prompt the items in the list carefully, emphasising those which are appropriate to the age or social situation of different members of the household. Make direct reference to the relatives listed in Q. 1. For example: "You say you see your mother every day. Do you do any of these things for her? And what about your sister?" Note that you prompt also for help given to friends and neighbours.

#### Hours

If two or three different services are undertaken, add together the informant's estimates of the time taken. Since the services are unpaid you should not expect informants to be able to give more than an approximate estimate of the time taken (that is, the time spent in the performance of the job, not interruptions for tea and conversations, etc).

#### QUESTION 3 Help received

The question reverses Q. 2 and proceed as in that question. Check in whatever way seems appropriate to establish the unpaid services being performed for members of the household. Again the question should be repeated for relatives seen frequently. "You've told me you see your mother every day. Does she do any of these things for you?" Two separate people might do the cleaning, for example. Add the hours together.

**QUESTION 4 Emergency help**

Since this is rather a general question specific acts may be forgotten. Probe as seems appropriate in the light of previous answers. Most people have occasional help from family or friends in the neighbourhood.

**QUESTION 5 Gifts regularly made**

This is the counterpart of Q. 2, dealing with gifts or commodities rather than services. Again repeat the question in reference to relatives seen often. Note that a meal that is given is distinct from the service of preparing a meal (prompted in Q. 2). Obtain the best total estimate that you can of the worth of these gifts, however rough.

**QUESTION 6 Occasional gifts made**

We do not wish to waste time on occasional gifts of a value of less than £25.

**QUESTION 7 Gifts (regularly) received**

This is the counterpart of Q. 3. Refer to relatives seen frequently and repeat the question. Note that meals consumed should also be coded in this question. The service (of preparing them) was included under Q. 3. Probe according to the answers made previously.

**QUESTION 8 Occasional gifts received**

Do not waste time inquiring about gifts of a value of less than £25.

Jan. Alan helps with Gas Bills. She has had Gas fire on all night since November + last Gas Bill £10-12-0d. Gave her £5 towards it.

Also paid T.V. Licence. Also Sat. & Sunday lunch brought by daughter in law.

£5 towards previous less than £25, but very helpful.  
Also Gas Bill.

#### QUESTION 9 Staying overnight

The question concentrates on holidays and stays which are directly or indirectly paid for or subsidised by relatives and friends. It may be difficult to obtain an estimate of saving. We have in mind not only the instance of holiday but also an elderly person or a child staying with a member of the family for a lengthy period of the year during a time of loneliness or financial difficulty. Note that space allows only 8 columns on this page. In the unlikely event of interviewing in a household with 9 or 10 persons write in the details for the 9th and 10th persons lower on the page.

#### QUESTION 9 (b) Saving

Note that there are two alternatives in the question. The saving from staying in a relative's or a friend's home should be estimated in terms of the comparable cost of living at home. The saving from being taken on holiday should be estimated in terms of the cost of going on holiday on one's own.

---

#### QUESTION 10 Visitors

This question reverses Q. 9 but estimates of cost should be written into the column allocated for the housewife.

Almost a year ago was in hospital for  
Hernia operation, after release went to Mrs  
Home for 8 weeks. Very kind to her, but  
glad to come home, used to living alone.  
Prefer it. Wanted to come home house  
getting very damp. Son wouldn't take any money  
so saved a few ££s, and bought new Gas fire.

#### QUESTION 19 Housekeeping and board

The question refers to ALL INCOME RECIPIENTS including pensioners, as well as earners, who contribute to the housekeeping expenses. Be careful that you probe for everyone in the house, including adolescent earners. Sometimes the actual sum available for housekeeping will be quite different from that suggested by the total income of the household. The husband or teenagers may retain quite large sums not only for their own use but because the pattern of responsibility in one household for expenditure may be different from that in another household which has the same composition. Housekeeping can be a touchy point if both husband and wife are present, and it is perhaps best dealt with by interviewing one of them on their own (the housewife preferably) and, if possible, checking later with the other (the husband). If both husband and wife are present avoid expressing any surprise or criticism if you think the housekeeping is small. Also avoid indicating any opinion on the question of whether wage-earners should pay bills. Try to imply that all arrangements are equally possible. We have listed the common ones, but there will be others. REMEMBER TO CODE EACH INCOME RECIPIENT.

#### QUESTION 19 (b) Money back

This can be daily fares, insurances or clubs paid, dinner money, or simply "spending money". Some teenagers hand over their wages but get clothing bought. Usually this question will apply to teenagers, but some husbands may get money from the housekeeping for their cigarettes and beer mid-week.

#### QUESTION 19 (c) Payment of housekeeping bills

Often the husband will pay some larger bills, but alternatively he may pay housekeeping but expect to "help out" if a heavy bill comes in. We realise that an estimate may be rough but try to get an average contribution. Teenage children may buy food as "treats" for the household from the money they retain. Again try for an average.

#### QUESTION 20 Long-term saving

We are not interested in asking here whether the informant has savings (that was asked in Section V). Nor are we interested here in asking for short-term saving. Instead the question explores whether at the present time the informant manages to put aside savings for a long-term objective.

#### QUESTION 21 Ten years ago

To give us some idea of fluctuating fortunes we ask what things were like ten years ago. Some persons aged 35 or over will have been at home in their parents' households ten years ago and therefore we have to find what was the composition of the household. In any case, we require an estimate of the total money flowing into the household, and the number of adults and children that were supported at that time. Give the informant time to recollect. And check that income includes pensions, family allowances, etc. Fortunately, the informant will already have some idea of what you are after from the detailed questions asked earlier.

Can't live but says  
not much paid in housekeeping  
\$3 per week  
I don't mention retirement at the  
age just "saying day" but  
says they're all saying

Spends about \$100 week on Gas  
\$15.00 on rent  
\$10 on Insurance  
Black Bell averages \$2-15.00  
per quarter
