Form of introduction

"My name is X. I'm from Essex/London University. We're preparing a report (writing a book) about standards of living in Britain today and how families manage. We think it's important for the Government and everyone else to know what the facts really are. We're hoping to talk to about 3,000 families throughout the country and I'd be very grateful if you could help us by answering some questions. All our information is, of course, strictly confidential."

SUMMARY : COMPLETE AFTER INTERVIEW

1. Interview carried out at first call at second call at third or later call	10 X Y 0	3. Which sections were answered in whole or in part by which persons on the household? Informant	Write Section 1, 2, 3, etc. 13 <u>3</u> 14 <u>2</u> 15 <u>2</u> 16 <u>3</u> 17 <u>3</u> 18 <u>1</u> 19 <u>2</u> 20 X Y <u>0</u> 1 2 3 4	5. HOUSING AND LIVING FACILITIES

General

Information recorded by the interviewer on the left of the main column is needed so that the circumstances of the household may be fully understood by those in the office but it may not be required for computer-analysis.

QUESTION 1 — Rooms

No room should be listed twice. Bedsitters should be listed as bedrooms and not also as living-rooms. Do not count a scullery or a hall or a bathroom as a room. The total number of living and dining and bedrooms should not include a kitchen if it is not large enough for a family to eat in. You will see that there are two numbered boxes in the column in which to write the numbers of bedrooms and total numbers of rooms. Each is for each digit in the total: Thus, if there are 9 or fewer rooms the number should be written in the right-hand box and "0" should be written in the left-hand box. If there are, say, 13 rooms, then "1" should be written in the left-hand and "3" in the right hand box. This will help us to avoid mistakes in transferring information to the computer.

QUESTION 2 — Additional or fewer rooms

Define "room" as above.

QUESTION 4

A water closet flushed by water. Chemical or earth closets are not included, nor are flush water closets which can only be reached by going outdoors across a yard, even if under cover.

QUESTION 5

A garden is any space at the front or back of the house where it is possible to grow something. A yard is an outdoor space which is covered in concrete, asphalt, etc., where there are no plants or lawn other than in boxes or barrels (if any).

If you have already seen the garden it may be unnecessary to ask the second part of the question, for it may be possible to code 3, 4 or 5. But be sure that you are taking back as well as front garden into the reckoning. Add the two together in estimating size.

Small sized garden at back of flats but this is overgrown & not used because of husband's disability (lost an arm)

QUESTION 9

Exclude Bank Holidays in counting up holiday entitlement. List number of weeks to nearest week. Do not insert " $\frac{1}{2}$ ".

QUESTION 10 Occupation

See instructions above for Q. 7(b). Start by recording member of household in left-hand box (informant, 2nd, 3rd, etc.) and then carefully note occupation and industry or business. The office will code in the right-hand columns on the basis of your information. Avoid all vague terms, e.g. "engineer". If you find the answer too general or difficult to understand always ask "What do you do?" and write in the answer. In many households there will be only one or two persons who have been at work in the past twelve months. If necessary you can use all the space in the box just for one or two persons, providing it is clear to which person(s) the information applies.

QUESTION 11 Change of Job

Note that sub-questions (a) - (d) apply only to persons changing their jobs less than five years previously.

*The spinning room
I worked in closed
down I could have gone
in another room but thought
I'd try another job or rather
another firm after I'd been there
9 weeks this firm sent word
they were opening the winding
dept. I would like to go back
I did.*

11(c). IRU, etc., means Industrial Rehabilitation Unit or any other Government training centre.

QUESTION 12 Training Course

Our object is to check on men taking a re-training or training course, whether or not they changed their job. Some men may have taken a course and gone back to their former job or employers. Others may be unemployed and yet have taken such a course.

QUESTION 13 Fall in Earnings

You may be asked what you mean by "big" fall. Accept whatever the informant thinks is big. Put the information in the box, including the approximate earnings previously as well as the subsequent earnings and code the extent of the fall in the right-hand columns.

QUESTION 14 Best job

If you are asked "What do you mean by 'best'?" you should say "It is up to you to decide" (adding, but only if necessary, "whether it's best because of the money, the people, the job in itself or anything else"). of course there will be people who give a mixture of reasons. Code the one they treat as most important. If they are undecided code DK.

*2nd
Worked in pit
14 yrs ago. Lost arm
in accident works
as clerk now & likes
it much better both
the work & the
company*

QUESTION 15

A few persons — e.g. students — may have worked for part of the last year, or may work every Saturday and still be in full-time education. We will be asking about them later. Code them as still in full-time education.

QUESTION 15(a) Years of full-time education

The question is worded so that if someone has missed a year's schooling because of illness, say, between the ages of 5 and 14, he can adjust his answer accordingly. You can check (or aid other informants trying to reach an answer) by deducting five years from the leaving age and then asking if the result allows for any absence because of hospitalisation, war evacuation, military service, or any other reason. Note that full-time education can be provided in hospital. Only deduct a year if ALL of it was spent out of school. When writing in leaving age and number of years education remember again to insert each digit.

QUESTION 16 Manual Workers

If you are in doubt from what you have been told about a man's job whether it is manual ask, "How do you do your work? Is it mostly heavy work, or operating a machine or mostly with your hands?" If he indicates any of these ask Q. 16. If still in doubt ask the question and write a note.

QUESTION 17(a) Husband's occupation

Follow same procedure as above under Question 10. It will be even more necessary to probe for the exact type of job. Encourage the woman to tell you what her husband did, since the answer is most important for us in classifying occupational status.

QUESTION 5

Note that the recent Industrial Employment Act gives employers the responsibility of notifying employees about certain terms of service. Many employees will have received some kind of notification.

QUESTION 6 Whether sick pay

Include only when employer pays cash directly to an employee who is sick. Contributions towards medical care costs come under Q. 11. Ideally we would like to have details of sick pay expected and length of time employer is expected to go on paying. (Sometimes a man is paid one proportion of pay for 3 months and then a lower proportion for a further 3 months.) Many informants, however, will not know and you should do your best to get a general idea at least of the starting level for the first month, recording underneath more specific information if known.

Sick pay amount What should be entered here is costs paid by employer. Sickness benefit should not be included even though employers contribute towards it. Earnings means earnings before tax.

*Adding
age & sick leave
of 1/2*

QUESTION 7 Pension

Include any type of occupational pension, contributory or non-contributory, funded or unfunded.

QUESTION 7a Employee's contribution

Note that we are not attempting to establish what the employer pays, because many informants will not know. We require amount paid (preferably) or per cent of earnings before tax: many schemes are not of the type that the employer pays a fixed proportion of earnings. In these instances, code "None" or "Does not apply", according to the information you are given. When given a percentage note that it may be calculated on basic wages rather than earnings and you should note this so that we can adjust the figure in the office. Estimate the proportion of normal earnings the previous contribution amounts to — correct to nearest percentage point unless respondent names half a percentage point.

QUESTION 7b Pensionable age

That is, the age at which the pension is first payable.

QUESTION 7c Years towards pension

Do not count any years towards another pension in a previous employment unless those years have been accepted by the present employer as counting towards the pension from his employment.

QUESTION 7d Amount of pension

The question refers to the total occupational pension, though part of the cost may be paid by the informant. If the informant knows more details about his entitlement enter information in box (e.g. two-thirds of salary in last 5 years of service).

QUESTION 8 Meal vouchers

You may have to build up towards the average weekly value by asking "How much is each voucher worth?" "How many do you use in an average week?" Generally vouchers are additional to wage or salary but sometimes the employer will include them on a pay slip as part of earnings received. Watch that you do not count their value both here and later under net earnings.

QUESTION 9 Subsidised meals

Meals include drinks that may accompany them though we think it might cause offence to ask this in a formal question. We are interested to learn of anything from subsidised canteen meals to expense account lunches and dinners.

QUESTION 9a Saving on meals

Note that we are seeking an estimate of the difference between the actual cost to the employee and what he would have spent in the ordinary way if there were no subsidised canteen or restaurant available, or if his work did not allow him to charge the cost of outside meals. We are not seeking an estimate of the real value of the meals. Since some employees may not spend more outside on a poorer meal than they spend inside for a subsidised one, some entries may be "0" shillings.

*Both
Canteen meals
provided not used
both take sandwiches*

CURRENT MONETARY INCOME

General

This section asks questions in turn of the employed, the self-employed and then everyone, including those who are not employed. Our object is to obtain reliable estimates of income, before and after tax, for each income unit in the household, both for "last week" and "the last 12 months".

Income Unit

This is any person aged 15 or over, or if in full-time education any person aged 19 or over, together with wife or husband (if she or he has one) and children under 15 (or aged 16-18 if in full-time education), if any. According to this definition a man, wife, and children aged under 15 count as one income unit, but a middle-aged widow and a son who is a university student, or an elderly widow and a single daughter of 40, count as two income units. A household consisting of man and wife with three single children who are all over 15 years of age and who are at work counts as four income units.

Allocating Income

Usually amounts of income can be entered in the appropriate column, according to the person receiving it. Do not enter any income twice. Do not, for example, enter a particular amount both for the wife and the husband. Nor need you split up any amount part of which is payable for a dependent wife or child. Thus, do not attempt to divide up the total of family allowances; enter the total in the wife's column. And enter an amount for sickness benefit, say, even if it includes sums for the wife and children, in the husband's column (if indeed it is he who receives it).

Gross and Net

In the first question you carefully ask for the last pay net of deductions and go on in the second question to establish what these deductions are. The answers to both questions effectively give gross and net earnings for the last period for which pay was received and you can build up further information in the questions that follow. You should be conscious of this distinction throughout the section. It will not always be possible to get information both for income after tax and income before tax. Remember that if you cannot get an answer for one you may be able to get it for the other. Make a note whenever you can. We can calculate in the office.

Last 12 months

Though you start by finding what was the last amount of pay received it is very important also to find what was the average pay during the previous 12 months and gradually build up the total income received by the income unit and the household in those months. You have already filled in a work-record and this will help you to answer several of the questions in the section.

QUESTION 1 Last earnings

Remember to check earnings for each member of the household, even those of a wife who had a job for only a few weeks in the year, a young son who works only on Saturdays, and a retired man with a part-time job. Second or subsidiary earnings are dealt with in Q. 14. Note that each digit is ruled off from the next. Insert "0" in any column which does not apply. Please note also that we have allowed wider columns on these income pages so that you have enough room to write in figures. But note that you will have to indicate which member of the household received any income if you are obliged to use a fifth or sixth column.

QUESTION 2 Deductions

Don't forget that a total is better than nothing. If the informant is uncertain say, "I believe it is on your pay slip" and encourage him or her to check. We have asked you to put a tick if in fact you are shown a slip or the informant reads off the amounts. As before, the small boxes on the left are for you to identify the member of the household: "Inf.", "2nd", "3rd", etc.

National Insurance contributions

A male employee ordinarily pays 15s. 8d. and a female employee 13s. 2d. per week, although note that a married woman can elect to pay only 7d. per week to cover industrial injuries benefits. Boys under 18 pay 10s. 1d. and girls 8s. 5d. per week. Persons over 18 who are contracted out of the graduated pension scheme pay a higher flat rate insurance contribution of 18s. 1d. (men), 14s. 8d. (women).

Graduated pension contributions

The employee contributes $\frac{1}{4}$ per cent of each pound of gross weekly earnings between the ninth and the eighteenth, i.e. approximately 11½d. for each of these pounds, plus $\frac{1}{4}$ per cent for each pound between the 19th and the 30th, i.e. rather more than 1d. for each of these pounds. In fact a man with gross weekly earnings of £9 pays nothing, one with £13 pays 4s. 0d., one with £21 pays 9s. 0d., and one with £30, 9s. 9d. About one person in every five, however, is contracted out of the graduated pension scheme, but such persons nonetheless pay $\frac{1}{4}$ per cent on each pound of gross earnings between the ninth and the 30th, or a maximum of 2s. 1d.

QUESTION 3 Highest and lowest

Check the number of weeks worked by turning up the work record. Some people's earnings will have varied only in one or two weeks of the year and it will not be difficult for you to establish an average in (b). Remember Q. 3(b) is very important. Other people's earnings may have varied widely, either because of changes of job or variations in overtime. Do not include variations due to holidays or sickness. If it is difficult to arrive at an average write in the box or in the margins, e.g. 10 weeks @ £15 10s., six weeks @ £18 15s., and 23 weeks @ £24 11s. We will work out the rest. Do not include weeks of holiday or sickness, which are explored later.

QUESTION 4 Bonuses

If a commission or bonus has been included in Q. 3 do not now amend the answer to that question. If the information is given for the first time write the amount in the box and also strike out "Before" or "After" Tax as appropriate.

*god
Man in charge was off
all 00 took over after
some weeks they decided
was written to responsibility
money paid camp sum
of £50.*

QUESTION 6a Cars, Vans

Note that in Section II you will have noted any car owned by the business or firm and whether it is also used privately. Do not count this car here also but find out whether there is a second car — e.g. wife's. **If informant unable to value a vehicle** note instead its make, type and year of manufacture to enable us to look up its value.

QUESTION 6c Debts on vehicles

Note that the question does not apply only to payments which are overdue but to the total sum still owing. You will usually have difficulty in excluding interest from the amount owed. If the amount owed is estimated at less than £50 record the sum and do not take up time making sure that the interest is deducted. But if the amount owed including the interest element is £50 or more ask for the details listed under (c). We will then make an estimate in the office.

QUESTION 7 Life Insurance

If there is more than one policy add up the payments and, if necessary, note any difference in frequency or years of payment. Note that our main object is to establish the equivalent current value in cash of policies they hold. The majority of households will hold policies of little **current** value and you will see that if they pay less than 10s. a week we do not ask for any details.

QUESTION 8 Value of saleable assets

Please note that we do not envisage that goods in everyday use — beds, blankets, basic furniture, crockery, clothes — need to be valued. We are interested only in items of value that could be sold without serious detriment to the household and its daily life if some ready cash was badly needed. Jewellery, furs, stamp collections, works of art, antiques, and collections of books, might be sold and we need to obtain an approximate estimate of their total current worth. Naturally enough we cannot expect precise valuations and you will find the minimum value of £25 for an article (or a group of articles — e.g. a number of pieces of jewellery) helpful in avoiding protracted discussion of the value of articles used every day in the home.

QUESTION 9 Other assets

Rarely will there be any kind of asset not covered by our other questions. But by asking this general question you may be given information that belongs in the answer to another question. The informant may have misunderstood a question. But be careful not to include an item here which is already covered elsewhere.

QUESTIONS 10 & 11 General assets sold and windfalls

It may be difficult for you to secure an estimate of money raised or spent on "ordinary living expenses" but you will find that our object is fairly clear and once you understand it you can probe for an estimate. We do not want information about sums of money invested in new assets, in replacing old assets (e.g. property, including houses and cars) and in savings, but only information about sums of money spent in the ordinary way on housekeeping, food, clothing, and entertainment. An estimate is better than nothing. Note that we are not asking you to waste time checking small amounts of less than £25.

QUESTION 10 Assets sold in last 12 months

Some people, especially the elderly, will have sold some of their assets in the last 12 months to bolster a low income. This can be an important contribution to their standard of living. **Savings**—Note that each item should be prompted carefully, especially to persons who have already told you they have sizeable amounts in savings, stocks and shares, etc. Note that we are not interested in this question in total sums which amount to less than £25 in the 12 months. Nor are we interested in amounts that may have been saved from income and spent in the same year (e.g. savings for Christmas or a holiday).

Partial use of sales or savings for living expenses—In some cases property might have been sold, say, and part of the money spent but part of it saved. Try to get a total estimate only of the sum spent on ordinary living expenses.

2nd
\$13 per week
2 insurance
one £23.75
one 8 4/5
Total insured for
£65

Inf.
One policy
22 yrs. 2 weeks £9 insured.
10/10 per week
8 yrs. £100 insured.
2/6 per week
5 yrs. £100

VI HEALTH AND DISABILITY

QUESTION 1 Health

Do not probe for the names of disabling illnesses or conditions, unless the informant happens to mention them.

QUESTION 2 Unwell today

Note that the emphasis is on "today" and that you are instructed to complete the questionnaire as if all questions applied to the date when you first made contact with the household. This means that if you have postponed an interview because of illness you should ask all the questions about the day you first called.

QUESTION 2a Off work

Check with the work record (page 8) where weeks off work will have been established. But here the information is needed as the basis for general questions about current illness and disability.

QUESTION 2a (1) & b (1) Number of weeks

If more than a year write "52". If the informant cannot be sure of the exact number and there is uncertainty whether it is less or more than eight weeks seek confirmation of the exact period from the individual concerned at a second call if necessary.

QUESTION 2c Regularly

That is, at least once a month for the past three months in connection with the present illness or disability.

QUESTION 3 Condition affecting activity

This question is designed to prepare the ground for the all-important Q. 7. You are not asked to trace every conceivable disability or condition from which people may suffer. Many of them, anyway, will not know diagnostic terms even if you ask them. Instead, you ask about conditions which restrict activity, show Flashcard No. 6 (which is nearly the same list as prompted verbally) and code any part of the body or faculty with which "trouble" is reported. You do not explore all possible effects but only a few examples of effects in which we are particularly interested. Remember you are only trying to find out about certain conditions, not every condition.

Nerves

Pay particular attention to the need to prompt for any trouble with "nerves".

Reading ordinary print

Note that your code "No" only if a person cannot read print in a newspaper. Do not code "No" if a person merely has difficulty. For someone who cannot read interpret the question as "seeing" print in newspaper. We are interested at this point in sight not literacy.

Hearing

Note that if an informant does not admit difficulty with hearing but it is observed, you can code accordingly.

answered No to all these but 2nd in fact has lost an arm. doesn't seem to consider this a disability

QUESTION 13

NHS means free, wholly paid for by the National Health Service. Private and amenity (paying) beds in NHS hospitals should be coded as private.

QUESTION 13(b) Number of nights

If a person has had two or more spells in hospital add the total number of nights together.

QUESTION 13(c) Name of hospital

This will be used in the office to code type of hospital.

QUESTION 14

Ill in bed means actually in bed for at least half the day.

QUESTION 15

Visits by and to a doctor will include calls when a person is no longer in bed but up and about. The questions are not, therefore, dependent on the answer yes to Q. 14. When the household is large and/or when there have been several visits it may take you a little time to obtain a reliable answer. Remember that in cases of difficulty it is usually best to approach the answer by asking: "When did you last see your doctor?" "And when was the time before that?" "So that means you saw your doctor seven times altogether in the last 12 months?" Remember that we want to count each consultation, even if there are two consultations on one day or on succeeding days. Remember also to include locums and other (alternative) doctor seen in this period.

QUESTION 15(c) Visits paid for

If the informant is a wife who makes a visit to her NHS doctor and pays later for the pill, which he prescribes, this should still be counted as a NHS visit.

QUESTION 16 Spectacles

Most people pay in part for spectacles even under the NHS but some obtain them free by paying and then claiming a refund on test of means (by the SBC).

QUESTION 18 Doctor at hospital

It is the number of occasions we want to know, not the number of doctors seen at the hospital.

Visits to dentist

Remember to ask number of visits, not number of courses of treatment.

Home help

We are interested only in the use of a local council's Home Help Service.

Someone from the Welfare

We mean a social worker or officer from a Council health, welfare or children's department who is concerned with some aspect of family welfare. Include a health visitor, say, but not an officer from the Supplementary Benefits Commission or someone from a voluntary organisation — like the WVS or Salvation Army.

QUESTION 18(a) Paying a dentist

The point is that very poor people can get free dentures and do not have to pay the £1 for a course of treatment.

QUESTION 18(b) Home help

Some councils charge for a home help's service on test of means.

For chest X-ray

QUESTION 14 Fuel

Everyone forgets to order coal. Stress "through lack of money".

QUESTION 15 Birthday parties

Again the emphasis is on the expense and the experience of bringing the child's friends into the home, so stress that we don't mean just a family party.

QUESTION 17 (a) Social class

This question requires the views of both chief wage-earner (head of household) and housewife. By "chief wage-earner" we mean the person upon whose earnings the housekeeping income primarily depends. By "Head of Household" we have in mind the alternative person to be questioned if there is no chief wage-earner, e.g. a husband who is a retirement pensioner, or a widowed mother (who may be the tenant) living with her widowed daughter (the housewife) and grandchildren. As far as possible the views on social class should be sought from each person independently. If both are present take the question stage by stage, making sure both answer before passing on. The question asks first for a self-rating, which must be written down. At this stage avoid putting names of classes into people's heads. People often hesitate awkwardly, so try to get the informant to say what class she thinks she belongs to or "is nearest to". Prompt by repeating the question carefully, and say "It's what you think", implying (which is true) that everyone has their own idea and each is equally valid. Do not strain to get an answer if one is not easily forthcoming. Do not assume the informant will pick one class only. Multiple choices of "middle and working" or "professional and working" are allowed.

QUESTION 17 (b) Determinant of class

Code housewife and chief wage-earner only. Next, to give us a clue as to what the informant is using as a reference point and scale we ask, in effect, the informant's idea of what determines "class". Try to get the most important one only.

QUESTION 17 (c) Names of classes

Third, the informant is presented with a flash-card (this is why husband and wife should if possible be interviewed separately, since otherwise the second person may be unduly influenced). Code one item only. If informant wants (again) to say "None", say "Well, I've got to put something down, which would you think was nearest?" This rating is the most important bit of the question. Do not be puzzled if the wife gives a different answer from the husband. This is quite common.

QUESTION 17 (d) Father's main occupation

That is, the occupation held for most of the time (not necessarily the most recent).

QUESTION 18 Well off

Four comparisons are made in this series of questions—with relatives, with other people (note—of the same age) in locality, with the average in the country and finally in the context of time. Prompt carefully and remember that you might get a different response for one comparison than for another.

*This is because
we've no young
children that's all*

QUESTION 19 Housekeeping and board

The question refers to ALL INCOME RECIPIENTS including pensioners, as well as earners, who contribute to the housekeeping expenses. Be careful that you probe for everyone in the house, including adolescent earners. Sometimes the actual sum available for housekeeping will be quite different from that suggested by the total income of the household. The husband or teenagers may retain quite large sums not only for their own use but because the pattern of responsibility in one household for expenditure may be different from that in another household which has the same composition. Housekeeping can be a touchy point if both husband and wife are present, and it is perhaps best dealt with by interviewing one of them on their own (the housewife preferably) and, if possible, checking later with the other (the husband). If both husband and wife are present avoid expressing any surprise or criticism if you think the housekeeping is small. Also avoid indicating any opinion on the question of whether wage-earners should pay bills. Try to imply that all arrangements are equally possible. We have listed the common ones, but there will be others. REMEMBER TO CODE EACH INCOME RECIPIENT.

QUESTION 19 (b) Money back

This can be daily fares, insurances or clubs paid, dinner money, or simply "spending money". Some teenagers hand over their wages but get clothing bought. Usually this question will apply to teenagers, but some husbands may get money from the housekeeping for their cigarettes and beer mid-week.

QUESTION 19 (c) Payment of housekeeping bills

Often the husband will pay some larger bills, but alternatively he may pay housekeeping but expect to "help out" if a heavy bill comes in. We realise that an estimate may be rough but try to get an average contribution. Teenage children may buy food as "treats" for the household from the money they retain. Again try for an average.

*It varies each week we both put the money to gether it varies all the time.
Dk it varies too much.*

QUESTION 20 Long-term saving

We are not interested in asking here whether the informant has savings (that was asked in Section V). Nor are we interested here in asking for short-term saving. Instead the question explores whether at the present time the informant manages to put aside savings for a long-term objective.

QUESTION 21 Ten years ago

To give us some idea of fluctuating fortunes we ask what things were like ten years ago. Some persons aged 35 or over will have been at home in their parents' households ten years ago and therefore we have to find what was the composition of the household. In any case, we require an estimate of the total money flowing into the household, and the number of adults and children that were supported at that time. Give the informant time to recollect. And check that income includes pensions, family allowances, etc. Fortunately, the informant will already have some idea of what you are after from the detailed questions asked earlier.

ASK CHIEF WAGE EARNER/H.O.H.

CODE C.W.E./H.O.H. ONLY

23. * Do you think you could GENUINELY say you are poor now? —
