QUESTION 8 Work record

Our aim is to trace persons whose work record is not full and to establish both numbers of weeks off work and numbers of weeks in which fewer than 30 hours were worked.

Weeks off work in year

The procedure is first to ask the general question about numbers of weeks off work. Some informants will be uncertain of the right answer. They can be encouraged by prompts about the last spell off work for **unemployment**, then **sickness** and so on down the list. Whenever it is clear they are going back more than 12 months you should move on to the next eventuality on the list. In the appropriate column note the number of weeks for all spells of unemployment, sickness, etc. You must record "0" in all open boxes when the person has had no spell off work for that reason. You may ignore the codes "X" and "Y" under each open box. They are for office use. For easy reference you can record each spell off work alongside the months listed below. (You may in rare instances interview persons, say, who had five or six spells off work through sickness and may need to show some rough working to arrive at the right total. (Please leave any rough working in case of queries.)

of **List member of household (informant, 2nd, 3rd) and weeks off work and reason**

January..... <i>4 weeks</i>	July.....
February.....	August.....
March.....	September.....
April.....	October.....
May.....	November.....
June.....	December..... <i>6 weeks</i>

Some informants may have a quick answer for the first general question (usually because they have a very full or almost empty record of work in the year). You should nonetheless use the same procedure of asking about each type of eventuality and each spell off work as a check. If an informant says he hasn't been off work except for "just odd days because of colds and so on" **ASK How much would it amount to over the past twelve months — one week, two weeks? AND CODE ACCORDINGLY.** For informants (e.g. housewives or students) who have only worked for a few weeks in the year, you may find it quicker to establish first how long they were at work.

As with so many other questions about "the last twelve months" in this questionnaire, informants will often find it helpful if you encourage them to think forwards from a date exactly a year ago.

QUESTION 14 Best job

If you are asked "What do you mean by 'best'?" you should say "It is up to you to decide" (adding, but only if necessary, "whether it's best because of the money, the people, the job in itself or anything else"). Of course there will be people who give a mixture of reasons. Code the one they treat as most important. If they are undecided code DK.

*OZ
Please note that
OZ is at present a
Bipolar man - but has
also been a typist
in the past with other
colleagues - so
dishes coding at
110.*

QUESTION 15

A few persons — e.g. students — may have worked for part of the last year, or may work every Saturday and still be in full-time education. We will be asking about them later. Code them as still in full-time education.

QUESTION 15(a) Years of full-time education

The question is worded so that if someone has missed a year's schooling because of illness, say, between the ages of 5 and 14, he can adjust his answer accordingly. You can check (or aid other informants trying to reach an answer) by deducting five years from the leaving age and then asking if the result allows for any absence because of hospitalisation, war evacuation, military service, or any other reason. Note that full-time education can be provided in hospital. Only deduct a year if ALL of it was spent out of school. When writing in leaving age and number of years education remember again to insert each digit.

QUESTION 16 Manual Workers

If you are in doubt from what you have been told about a man's job whether it is manual ask, "How do you do your work? Is it mostly heavy work, or operating a machine or mostly with your hands?" If he indicates any of these ask Q. 16. If still in doubt ask the question and write a note.

QUESTION 17(a) Husband's occupation

Follow same procedure as above under Question 10. It will be even more necessary to probe for the exact type of job. Encourage the woman to tell you what her husband did, since the answer is most important for us in classifying occupational status.

OCCUPATIONAL FACILITIES AND FRINGE BENEFITS

General

Our intention is to invite anyone who has been working full-time to tell us about working conditions and fringe benefits. This will include anyone currently sick or unemployed who has been in full-time work in the last 12 months.

NORMALLY QUESTIONS SHOULD NOT BE ASKED ON SOMEONE ELSE'S BEHALF: THEY SHOULD BE ADDRESSED TO THE PERSON IN OR RECENTLY IN A PARTICULAR EMPLOYMENT.

But if two brothers, or husband and wife, work in the same factory or if otherwise the informant has good reason for knowing the employment conditions, then the interviewer may exercise discretion.

*02
Write in record
family belonging to the
inc estate*

QUESTION 1 Outdoors

In determining whether **mainly** outdoors, you should find whether proportion of working time spent outdoors exceeds 50 per cent. Those working outdoors but under cover (e.g. some dock labourers and railway porters) should be counted as outdoors. Where conditions have changed, the question should be applied to the **most recent** conditions (e.g. last week at work).

QUESTION 2 Facilities

We are interested only in facilities provided by the employer. **Disregard** provisions and facilities which may happen to be available but which are not provided by the employer (e.g. garage hand who uses W.C. and washing facilities in neighbouring shop, or printer's apprentice who nips into local café for tea). For someone currently sick or unemployed the questions apply to the last job he held during the previous 12 months.

Facilities for washing Note that there must be **hot water, soap and towel** if "yes" is to be coded. Include liquid soap and paper towels in definition if necessary.

QUESTIONS 2 and 3 Writing in questions which do not apply

Working conditions vary widely and it is impossible to devise questions which fit them all. If you are satisfied that the answer yes or no to a particular question is meaningless or inappropriate **DO NOT CODE** alongside the item but write in underneath how many of the 8 or 10 items do not apply.

QUESTION 3 Sufficient Heating

The test is whether the informant feels cold at his work more often than the occasional instance of there being a heating breakdown or a really big freeze.

Facilities for washing Note that there must be **hot water, soap, towel and mirror** if "yes" is to be coded. You may count liquid soap as "soap" and paper towels and even a hand drying machine as equivalent to a towel if necessary.

Place for lunch Eating at bench or desk does not count.

Place to keep clothes e.g. cupboard, locker, wardrobe, hook in small room, etc. The wording should make clear that we are interested **both** in a place where clothes can be kept **and** one where they will be reasonably safe.

QUESTION 5

Note that the recent Industrial Employment Act gives employers the responsibility of notifying employees about certain terms of service. Many employees will have received some kind of notification.

QUESTION 6 Whether sick pay

Include only when employer pays cash directly to an employee who is sick. Contributions towards medical care costs come under Q. 11. Ideally we would like to have details of sick pay expected and length of time employer is expected to go on paying. (Sometimes a man is paid one proportion of pay for 3 months and then a lower proportion for a further 3 months.) Many informants, however, will not know and you should do your best to get a general idea at least of the starting level for the first month, recording underneath more specific information if known.

Sick pay amount What should be entered here is costs paid by employer. Sickness benefit should not be included even though employers contribute towards it. Earnings means earnings before tax.

QUESTION 7 Pension

Include any type of occupational pension, contributory or non-contributory, funded or unfunded.

QUESTION 7a Employee's contribution

Note that we are not attempting to establish what the employer pays, because many informants will not know. We require amount paid (preferably) or per cent of earnings before tax: many schemes are not of the type that the employer pays a fixed proportion of earnings. In these instances, code "None" or "Does not apply", according to the information you are given. When given a percentage note that it may be calculated on basic wages rather than earnings and you should note this so that we can adjust the figure in the office. Estimate the proportion of normal earnings the previous contribution amounts to — correct to nearest percentage point unless respondent names half a percentage point.

QUESTION 7b Pensionable age

That is, the age at which the pension is first payable.

QUESTION 7c Years towards pension

Do not count any years towards another pension in a previous employment unless those years have been accepted by the present employer as counting towards the pension from his employment.

QUESTION 7d Amount of pension

The question refers to the total occupational pension, though part of the cost may be paid by the informant. If the informant knows more details about his entitlement enter information in box (e.g. two-thirds of salary in last 5 years of service).

QUESTION 8 Meal vouchers

You may have to build up towards the average weekly value by asking "How much is each voucher worth?", "How many do you use in an average week?". Generally vouchers are additional to wage or salary but sometimes the employer will include them on a pay slip as part of earnings received. Watch that you do not count their value both here and later under net earnings.

QUESTION 9 Subsidised meals

Meals include drinks that may accompany them though we think it might cause offence to ask this in a formal question. We are interested to learn of anything from subsidised canteen meals to expense account lunches and dinners.

QUESTION 9a Saving on meals

Note that we are seeking an estimate of the difference between the actual cost to the employee and what he would have spent in the ordinary way if there were no subsidised canteen or restaurant available, or if his work did not allow him to charge the cost of outside meals. We are not seeking an estimate of the real value of the meals. Since some employees may not spend more outside on a poorer meal than they spend inside for a subsidised one, some entries may be "0" shillings.

*Q6 Please Note!
0% states he got more benefit than he got in wages!
his post got his normal wage from his employer - and has earned it over (since he earned in wages) - his sickness benefit too*

*Q9
Should be
£1.25 - 20p for wages for 5 - still decrease - still 10p to 20p a week*

CURRENT MONETARY INCOME

General

This section asks questions in turn of the employed, the self-employed and then everyone, including those who are not employed. Our object is to obtain reliable estimates of income, before and after tax, for each income unit in the household, both for "last week" and "the last 12 months".

Income Unit

This is any person aged 15 or over, or if in full-time education any person aged 19 or over, together with wife or husband (if she or he has one) and children under 15 (or aged 16-18 if in full-time education), if any. According to this definition a man, wife, and children aged under 15 count as one income unit, but a middle-aged widow and a son who is a university student, or an elderly widow and a single daughter of 40, count as two income units. A household consisting of man and wife with three single children who are all over 15 years of age and who are at work counts as four income units.

Allocating Income

Usually amounts of income can be entered in the appropriate column, according to the person receiving it. Do not enter any income twice. Do not, for example, enter a particular amount both for the wife and the husband. Nor need you split up any amount part of which is payable for a dependent wife or child. Thus, do not attempt to divide up the total of family allowances; enter the total in the wife's column. And enter an amount for sickness benefit, say, even if it includes sums for the wife and children, in the husband's column (if indeed it is he who receives it).

Gross and Net

In the first question you carefully ask for the last pay net of deductions and go on in the second question to establish what these deductions are. The answers to both questions effectively give gross and net earnings for the last period for which pay was received and you can build up further information in the questions that follow. You should be conscious of this distinction throughout the section. It will not always be possible to get information both for income after tax and income before tax. Remember that if you cannot get an answer for one you may be able to get it for the other. Make a note whenever you can. We can calculate in the office.

Last 12 months

Though you start by finding what was the last amount of pay received it is very important also to find what was the average pay during the previous 12 months and gradually build up the total income received by the income unit and the household in those months. You have already filled in a work-record and this will help you to answer several of the questions in the section.

QUESTION 1 Last earnings

Remember to check earnings for each member of the household, even those of a wife who had a job for only a few weeks in the year, a young son who works only on Saturdays, and a retired man with a part-time job. Second or subsidiary earnings are dealt with in Q. 14. Note that each digit is ruled off from the next. Insert "0" in any column which does not apply. Please note also that we have allowed wider columns on these income pages so that you have enough room to write in figures. But note that you will have to indicate which member of the household received any income if you are obliged to use a fifth or sixth column.

QUESTION 2 Deductions

Don't forget that a total is better than nothing. If the informant is uncertain say, "I believe it is on your pay slip" and encourage him or her to check. We have asked you to put a tick if in fact you are shown a slip or the informant reads off the amounts. As before, the small boxes on the left are for you to identify the member of the household: "1st", "2nd" "3rd", etc.

National Insurance contributions

A male employee ordinarily pays 15s. 8d. and a female employee 13s. 2d. per week, although note that a married woman can elect to pay only 7d. per week to cover industrial injuries benefits. Boys under 18 pay 10s. 1d. and girls 8s. 5d. per week. Persons over 18 who are contracted out of the graduated pension scheme pay a higher flat rate insurance contribution of 18s. 1d. (men), 14s. 8d. (women).

Graduated pension contributions

The employee contributes $\frac{1}{4}$ per cent of each pound of gross weekly earnings between the ninth and the eighteenth, i.e. approximately 11 $\frac{1}{2}$ d. for each of these pounds, plus $\frac{1}{4}$ per cent for each pound between the 19th and the 30th, i.e. rather more than 1d. for each of these pounds. In fact a man with gross weekly earnings of £9 pays nothing, one with £13 pays 4s. 0d., one with £21 pays 9s. 0d., and one with £30, 9s. 9d. About one person in every five, however, is contracted out of the graduated pension scheme, but such persons nonetheless pay $\frac{1}{4}$ per cent on each pound of gross earnings between the ninth and the 30th, or a maximum of 2s. 1d.

QUESTION 3 Highest and lowest

Check the number of weeks worked by turning up the work record. Some people's earnings will have varied only in one or two weeks of the year and it will not be difficult for you to establish an average in (b). Remember Q. 3(b) is very important. Other people's earnings may have varied widely, either because of changes of job or variations in overtime. Do not include variations due to holidays or sickness. If it is difficult to arrive at an average write in the box or in the margins, e.g. 10 weeks @ £15 10s., six weeks @ £18 15s. and 23 weeks @ £24 11s. We will work out the rest. Do not include weeks of holiday or sickness, which are explored later.

QUESTION 4 Bonuses

If a commission or bonus has been included in Q. 3 do not now amend the answer to that question. If the information is given for the first time write the amount in the box and also strike out "Before" or "After" Tax as appropriate.

QUESTION 8

Obtain an estimate of total cost by the normal transport used. Some people who drive cars will offer their estimate of real cost but in such cases write in as indicated the average weekly mileage to and from work (not during work). In other instances assume 6d. per mile for all small cars (i.e. under 12 h.p.) and 8d. per mile for larger vehicles.

5 miles @ 6d. = 2s. 6d.	5 miles @ 8d. = 3s. 4d.
10 miles @ 6d. = 5s. 0d.	10 miles @ 8d. = 6s. 8d.
50 miles @ 6d. = 25s. 0d.	50 miles @ 8d. = 33s. 4d.
100 miles @ 6d. = 50s. 0d.	100 miles @ 8d. = 66s. 8d.

QUESTION 9 Holiday pay

Be careful not to include pay received simultaneously with holiday pay for any week of work. Remember that many wage earners only receive the basic wage during holidays, which is usually much lower than average earnings.

QUESTION 10 Sick pay

There are several practices. (1) Some employers (e.g. public services) automatically deduct national insurance sickness benefit for the worker and his dependants from pay during sickness (or sometimes expect him to report what sickness benefit he receives so that it may be deducted from later amounts of sick pay or even from the first weeks of earnings after recovery from sickness). (2) Others (mainly smaller private firms) deduct only the sickness benefit for the worker, ignoring what he may get for his dependants. (3) Still others deduct nothing for any sickness benefit for which a worker may be eligible. In the last two cases it might seem that the worker will be better off in sickness than at work. This is true for some, particularly salaried earners, but remember that if any employer pays anything to a wage-earner in sickness rarely does it exceed the basic wage. His average earnings may be much higher. (4) When the level of sick pay is small no deductions may be made for any sickness benefit.

Changes in sick pay after the first weeks

In rare instances of persons who have been sick more than a few weeks the rate of sick pay will have changed. If the average is difficult to estimate write in the amounts thus: 4 weeks @ £10, 4 @ £5 10s., etc. After deductions of tax, etc. Note if only the amount of pay before deductions is known.

*Q10
 02
 Please note
 that sickness
 benefit was
 all given
 to employer.
 05
 when all 2nd
 given etc pay
 (person in p. 10)*

QUESTION 11 Income of self-employed

The income of the self-employed is sometimes difficult to ascertain. Four alternative methods of questioning that have been found to be helpful in previous research are listed. Our first aim is to find the figure for **annual income before tax**. Thus Q. 11 A(iv) is the crucial one and if you can get the answer to this do not press unduly for the answers to the preceding questions, but they are helpful in establishing that (iv) is in fact the figure you want. The alternative aim (if you cannot achieve the first) is to seek the amount obtained from the business, either Method B — net profit including money taken out for own use, or Method C, the sums actually taken out for personal use. Method D should only be tried if all else fails, and frankly, is not of much help. An accurate figure for income is important and you should if necessary take time to establish it. Method D "Turnover" = total receipts from sale of goods and services, less any discount allowed.

QUESTION 14 Second job

This will have been established in the earlier section on Employment. Repeat the question because earnings from subsidiary occupations tend to be forgotten. For example, painters and decorators may have done one remunerative weekend job for a few weeks several months earlier in the year. A gardener may have done some intensive paid work for various local people in the evenings and weekends of the summer months. Or a university lecturer may have had a remunerative consultancy or a series of well-paid broadcasts at some point in the year. Remember that extra earnings from a source other than usual employment may not be thought of as a second job. You should probe for all kinds of additional earnings, depending on the nature of the usual employment.

QUESTION 15

This is laid out as concisely as possible on one page and you are asked to ring 01, 02, 03, etc., as appropriate and then to enter the rates per week and amounts below, carefully writing in the code "01" (i.e. Family Allowances) "02" (i.e. Retirement Pension) and so on so that we are clearly aware of the allowances to which the amounts refer.

Amounts will sometimes be joint — e.g. retirement pension for man and wife — or will be for several members of the household — e.g. sickness benefit for man and wife and children. In these instances the amount should be entered (if necessary, after the interview) in one column only, under that member of household receiving the payment. Wherever possible encourage informants (especially when elderly) to show you the allowance or pension book.

CODE 01 Family Allowances

	First child	Second	Third	Fourth & subsequent
up to April 1968	nil	8s.	10s.	15s.
after April 1968	nil	15s.	17s.	17s.

counting children under 15 or up to 19 if still in full-time education or college or an apprentice on low wages.

CODE 02 Retirement Pension

Note that the actual amounts vary widely. Increased pensions are paid if retirement is deferred. There are now in addition small graduated state pensions (averaging about 3s.) and pensions may be reduced because of earnings or a deficient contribution record. Note that some of these points also apply to other benefits. Pensions and supplementary benefits can be combined in a single payment. You will be prompting for supplementary benefit and wherever possible we should like you to list the amount separately (as well as the fact that it is being received). But whenever the rate given to you exceeds the standard rate below you should check the reason.

Single person (husband)	£4 10s. 0d.
Wife's income	£2 16s. 0d.
1st dependent child	£1 5s. 0d.
2nd dependent child	17s. 0d.

CODE 03 Standard Widow's Pension

Note: not the widow's allowance which is paid for the first 26 weeks after widowhood.

Widow or widowed mother	£4 10s. 0d.
1st dependent child	£2 2s. 6d.
2nd child	£1 14s. 6d.
3rd and subsequent child	£1 12s. 6d.

Depending on the circumstances of the death of the husband (armed service and so on) widows' pensions may differ in size. Note that family allowances are received in addition to dependent children's allowances.

Widow's Allowance: Widow £6 7s., children as for widow's pension

CODE 04 and 05 Sickness Benefit and Unemployment Benefit

Sickness benefit is often paid for periods other than a week. Find what was the last payment and for how many days (excluding Sundays). A payment for 6 days, excluding Sunday, makes up a "week's" benefit. Note that an earnings-related supplement may be paid in addition to the flat rate benefits listed below. Moreover, these benefit rates depend on the contribution record.

Single person	£4 10s. 0d.
Married woman	£2 16s. 0d.
1st dependent child	£1 5s. 0d.
Each subsequent child	17s. 0d.

CODE 06 Supplementary Benefit

The former "national assistance". Rent is sometimes paid direct to the landlord by the Supplementary Benefits Commission. There is a check later that the amount is known and counted as income.

CODE 07 Industrial Injury Benefit

£6 7s. 0d. (with additions for dependants) is payable for the first 26 weeks after injury after which the injured person goes before a Board to have his injury assessed for an individual disablement pension.

CODES 08 and 09 Industrial and Disablement Pensions

The 100 per cent rate is £7 12s. 0d. (with additions for dependants). **CODE 09:** Note that these are war pensions, not service pensions included under occupational pensions later in Q. 19.

CODE 10 Maternity Allowance

The standard rate of maternity allowance is £4 a week. It is paid to women who have been paying full national insurance contributions. It begins 11 weeks before the expected confinement and ends after the sixth week following it.

CODE 11 Maternity Grant

This grant is £22 either for home or hospital confinement.

CODE 14 Single Grant

This is officially described as an exceptional needs grant. The Ministry of Social Security has replaced the former National Assistance Board and you may need to explain "a grant from the Assistance". Probe carefully for this for all income units who are not employed, whether or not they receive supplementary benefit. A large number of people obtain single grants, e.g. for spectacles or dentures, even though they are not normally eligible to receive supplementary benefit. Note also that since you are asking about a period of 12 months there will be instances of people now in work who obtained a grant at an earlier point in the year.

02
Please note that £26 - the first week benefit received over 5 weeks per week. State he just kept "the record" this perhaps he should have looked it over!
05
State he eligible for unemployment benefit - could not get it entitled for supplementary benefit - but did not get any. Had no income for four weeks!

05 was quite certain 18a his injuries benefit was £7-57- per week.

QUESTION 29(c) Estimate of market rent

Proceed as for Q. 27(a)

29c
INF # 02
Estimate between
7/6 - 10/1 - per
week

QUESTION 30(a) Income from lodgers or boarders

Be careful not to obtain an inflated total. Amounts may vary according to numbers of boarders and, if necessary, write down separate amounts on this page. If the informant has difficulty in producing an average per week or total in year, obtain last week's GROSS income (taking into account number of boarders) and then work back to get an estimate for the year.

Q 30
Please note that
Q2 is the boarders
with informant.

QUESTION 30(c) Net income

Carefully prompt for services and the cost of providing these services so that you can make an estimate of NET income — "profit" as some people will understand it. In some instances you will have to write down figures for gross amount received and an estimate of the cost of different services. If the informant does not know what his net income has been, make an estimate on the basis of what he tells you about gross payments and cost of services and expenses. Try to obtain a figure net of any tax paid. As before, note that if you cannot do this, you can strike out "after" tax in the box provided. We are asking you to provide a figure both for last week and last year. There may be changes in income (due to loss or arrival of boarders) during the year which are revealed in interview. Remember also that costs may be as great or even greater than receipts. In these cases write in "O" and make a note.

QUESTION 32 Value of own food or poultry

Try to obtain a weekly average of the value of using own garden, allotment and farm produce. Do not waste too much time on produce amounting in value to less than 10s. a week. Be careful not to give an inflated estimate of the saving. Husbands sometimes exaggerate the value of what they grow in a large garden. What you want is an estimate of what it would cost in the shops to purchase the kind of produce consumed in the home which is grown by the household, LESS all expenses. For a small-holding or farm this means taking account of purchases of stock or seed, wages, payments of fuel bills, etc., in the same way as earlier you explored the income of the self-employed.

QUESTION 33 Total income last year

In some instances you may have difficulty with an informant who, though willing to answer other questions, is unwilling to answer questions on income, or an informant who is vague or uncertain about details. By adopting a matter of fact approach or by coming back to these questions after dealing with the rest of the questionnaire in an interview, you may overcome the difficulty. If the questions remain unanswered, try the question here as given, adding any other explanation according to your individual style or to the circumstances of the situation. Show the Flash-card and do your best to arrive at a specific amount. Also do your best to check: "Does that include family allowances, pensions, etc.?" You may be surprised sometimes to find that the informant gradually undends and is prepared to answer many preceding questions. You should also do your best to check whether the total given includes other income units in the household. Try to establish totals for these units in the same way.

QUESTION 4 Special schools & centres

This question is asked only of persons who have been ill and off work or confined to bed or the house for eight weeks or more continuously, and those who are coded for any item in Question 3.

QUESTION 5 Date of onset of sickness or disabling condition

Our object is to establish the year of onset but the question is worded 'first have any condition' so as to allow for the fact that some conditions develop out of others. For persons with a disabling condition you ask, in effect, when all the trouble started.

Previous occupation

In the section on Employment you have already asked for the last occupation of everyone not now at work (p. 7). Some people change their occupation because of a disabling condition before finally being obliged to give up work. You should probe for the (previous) occupation which people had before any history of illness or disability started.

QUESTION 6 Mobility

You should code people according to their usual mobility, taking no account of a temporary illness or injury. "Usual mobility" may be interpreted as "for at least eight weeks and unlikely to become more mobile in the immediate future" or "for less than eight weeks but unlikely to become more mobile within at least that total period." Someone who spends most of the time in bed and needs help to get out to sit in a chair is defined as bedfast. Someone who can get out of his bed into a chair or wheelchair and who can walk indoors but not even a few yards outdoors without help is defined as housebound. The test is whether someone can walk on his own (without the assistance or company of any other person — though with or without sticks or crutches).

QUESTION 7 Incapacity

In prompting this series of questions you may find it simplest to ask the question without the variation in brackets, unless it seems appropriate. Remember you are asking whether they have any difficulty in doing X. Sometimes certain questions will not apply to particular people or to particular situations. You will meet people who do not (or say they do not) wash down, negotiate stairs (living in bungalows), go shopping and do housework (especially some men). The question should then be asked in terms of "But would you have any difficulty in doing X if you had to?" The codes 0, 1, 2 are listed in increasing order of difficulty and you should check that you ring one of them for each item.

QUESTION 7e

It would be insensitive and unnecessary to ask questions about the daily activities of the bedfast. They are therefore excluded from this question and the rest of the series. You may encounter other people (e.g. advanced obesity) of whom it is clear that they cannot do certain activities. You may refrain from putting questions to them. The same is true of any situations in which the questions are likely to cause great distress. BUT AS A GENERAL RULE QUESTIONS 7 (e) to (i) SHOULD BE ASKED FOR ALL OTHER THAN THE BEDFAST AND CHAIRFAST.

QUESTIONS 8 & 9 Variation in incapacity

These questions explore whether the pattern of answers to Question 7 is permanent. Question 8 seeks any indication of seasonal variations (e.g. bronchitis) and Question 9 day-to-day variations in the effects of disability.

Please note that
job is done - the 'another'
employer!*

QUESTION 13

NHS means free, wholly paid for by the National Health Service. Private and amenity (paying) beds in NHS hospitals should be coded as private.

QUESTION 13(b) Number of nights

If a person has had two or more spells in hospital add the total number of nights together.

QUESTION 13(c) Name of hospital

This will be used in the office to code type of hospital.

QUESTION 14

Ill in bed means actually in bed for at least half the day.

QUESTION 15

Visits by and to a doctor will include calls when a person is no longer in bed but up and about. The questions are not, therefore, dependent on the answer yes to Q. 14. When the household is large and/or when there have been several visits it may take you a little time to obtain a reliable answer. Remember that in cases of difficulty it is usually best to approach the answer by asking: "When did you last see your doctor?" "And when was the time before that?" "So that means you saw your doctor seven times altogether in the last 12 months?" Remember that we want to count each consultation, even if there are two consultations on one day or on succeeding days. Remember also to include locums and other (alternative) doctor seen in this period.

*Q15
02
Should be 02*

QUESTION 15(c) Visits paid for

If the informant is a wife who makes a visit to her NHS doctor and pays later for the pill, which he prescribes, this should still be counted as a NHS visit.

QUESTION 16 Spectacles

Most people pay in part for spectacles even under the NHS but some obtain them free by paying and then claiming a refund on test of means (by the SBC).

QUESTION 18 Doctor at hospital

It is the number of occasions we want to know, not the number of doctors seen at the hospital.

Visits to dentist

Remember to ask number of visits, not number of courses of treatment.

Home help

We are interested only in the use of a local council's Home Help Service.

Someone from the Welfare

We mean a social worker or officer from a Council health, welfare or children's department who is concerned with some aspect of family welfare. Include a health visitor, say, but not an officer from the Supplementary Benefits Commission or someone from a voluntary organisation — like the WVS or Salvation Army.

QUESTION 18(a) Paying a dentist

The point is that very poor people can get free dentures and do not have to pay the £1 for a course of treatment.

QUESTION 18(b) Home help

Some councils charge for a home help's service on test of means.

ASK HOUSEWIFE AND INCOME RECIPIENT

19. How do you arrange the payment of housekeeping (and board-money)?

Here are some of the ways we've come across. Can you tell me how you arrange things? Does he/she * CODE ALL INCOME RECIPIENTS

PROMPT X - give a fixed amount for housekeeping (or board)?
 FOR ALL Y - give an amount which varies depending on earnings?
 INCOME 0 - give entire wage (earnings), receiving back money for
 RECIPIENTS fares, pocket money, etc?
 AND 1 - give entire wage (earnings) after first taking out
 CODE fares, pocket money, etc?
 ONE 2 - pay earnings (wage) into a joint bank account?
 ONLY 3 - have no fixed arrangement?
 4 - any other arrangement. (SPECIFY)
