QUESTIONNAIRE ON HOUSEHOLD RESOURCES &

STANDARDS OF LIVING IN THE UNITED KINGDOM
1967-68

R3 3+1

Name of Interviewer. E. 17. CLULEY.

Name of Interview(s) 5.7n. Markenberg. 1968.

Length of interview(s) 1.7 horses. (14/10).

Total actual interviewing time. 1.3 horses.

Form of introduction

"My name is X. I'm from Essex/London University, We're preparing a report (writing a book) about standards of living in Britain today and how families manage. We think it's important for the Government and everyone else to know what the facts really are. We're hoping to talk to about 3,000 families throughout the country and I'd be very grateful if you could help us by answering some questions. All our information is, of course, strictly confidential."

SUMMARY: COMPLETE AFTER INTERVIEW

		COMPLETE ATTE			
Interview carried out at first call at second call at third or later call	10	Which sections were answered in whole or in part by which persons on the household? Informant	Write Section 1, 2, 3, etc.	5. Number of other households at address None	21

QUESTION 13(a)

"Marriage": include common law marriage if in fact revealed by informant.

QUESTION 13(b)

Code whereabouts of parents only in terms of the replies so far given (or given later) by the informant. Direct questions might seem to be very offensive and they must be avoided. Indirect questions will be helpful according to the circumstances. For example, it may transpire that one child is the half-sister of another. It would then be very reasonable to ask "How are they related?" Or when it becomes obvious that one parent is not present, it would be reasonable to ask "Does John see his father regularly?"

"Accepted stepfather" or "Accepted stepmother" describes a man or woman not legally married to the natural mother or father of the child(ren) who has been in the household for at least 13 weeks and who is clearly accepted by the informant as the "stepfather" or "stepmother" of the child(ren) living in the household, albeit not accepted by law in this role.

QUESTION 14(a) Play within easy reach

This means that the mother can rush to a tearful child within, say, 30 seconds of hearing a wail. A "safe place" could of course include the garden.

HOUSEHOLD NOVED IN LESS THAN 3 WEEKS AGO.

QUESTION 7(b) Last Occupation

Write in the occupation on the left of the columns. Identify the person to whom the information applies in the little box (i.e. Inf or 2nd or 3rd etc.) This will both allow you to enter information for a second or third person if that proves to be applicable and for the office to code in the right column(s) on the basis of your information.

QUESTION 7(c) Looking for work

You will find yourself asking retired persons as well as unemployed and other persons this question. Sometimes it will be entirely applicable because persons who have been retired by their employers or have automatically ceased employment upon reaching a pensionable age of, say, 60, may in fact be seeking alternative work. It may even be applicable for some persons in their seventies and eighties. But sometimes it will plainly be inapplicable to frail persons of extreme age, especially women. In this case code "NO" and skip to Q. 8. When in doubt, however, you should ask the question.

7(8) OI STATED THAT HYRS HGO WORKED FOR 3 MONTHS IN A LOCAL HOTEL PART-TIME AS A BUT SHE HAD TO GIVE ITUP WHEN HER LAST CHILD WAS BORN, 4 HER OWN HEALTH BECAME Pool

QUESTION 8 Work record

Our aim is to trace persons whose work record is not full and to establish both numbers of weeks off work and numbers of weeks in which fewer than 30 hours were worked.

Weeks off work in year

The procedure is first to ask the general question about numbers of weeks off work. Some informants will be uncertain of the right answer. They can be encouraged by prompts about the last spell off work for unemployment, then sickness and so on down the list. Whenever it is clear they are going back more than 12 months you should move on to the next eventuality on the list. In the appropriate column note the number of weeks for all spells of unemployment, sickness, etc. You must record "O" in all open boxes when the person has had no spell off work for that reason. You may ignore the codes "X" and "Y" under each open box. They are for office use. For easy reference you can record each spell off work alongside the months listed below. (You may in rare instances interview persons, say, who had five or six spells off work through sickness and may need to show some rough working to arrive at the right total. (Please leave any rough working in case of queries.) rough working in case of queries.)

List member of household (informant, 2nd, 3rd) and weeks off work and reason

January	July
	August
March	September
	October
May	November
June	December

Some informants may have a quick answer for the first general question Some informants may have a quick answer for the first general question (usually because they have a very full or almost empty record of work in the year). You should nonetheless use the same procedure of asking about each type of eventuality and each spell off work as a check. If an informant says he hasn't been off work except for "just odd days because of colds and so on " ASK How much would it amount to over the past twelve months—one week, two weeks? AND CODE ACCORDINGLY. For informants (e.g. housewives or students) who have only worked for a few weeks in the year, you may find it quicker to establish first how long they were at work.

As with so many other questions about "the last twelve months" in this questionnaire, informants will often find it helpful if you encourage them to think forwards from a date exactly a year ago.

H. C. H. STATES THAT HE HAS

NET TAKEN ANY HOLIDAYS IN THE

PAST TWO YEARS - BUSY BUILDING UP

HIS OWN BUSINESS

CAN PLEASE HINSELF

BUT DOES NOT BOTHER WITH

HOLIDAY ENTITLEMENT.

QUESTION 9

Exclude Bank Holidays in counting up holiday entitlement. List number of weeks to nearest week. Do not insert " $\frac{1}{2}$ ".

QUESTION 10 Occupation

See instructions above for Q. 7(b). Start by recording member of household in left-hand box (informant, 2nd, 3rd, etc.) and then carefully note occupation and industry or business. The office will code in the right-hand columns on the basis of your information. Avoid all vague terms, e.g. "engineer". If you find the answer too general or difficult to understand always ask "What do you do?" and write in the answer. In many households there will be only one or two persons who have been at work in the past twelve months. If necessary you can use all the space in the box just for one or two persons, providing it is clear to which person(s) the information applies.

QUESTION 11 Change of Job

11(c). IRU, etc., means Industrial Rehabilitation Unit or any other Government training centre.

QUESTION 12 Training Course

Our object is to check on men taking a re-training or training course, whether or not they changed their job. Some men may have taken a course and gone back to their former job or employers. Others may be unemployed and yet have taken such a course.

QUESTION 13 Fall in Earnings

You may be asked what you mean by "big" fall. Accept whatever the informant thinks is big. Put the information in the box, including the approximate earnings previously as well as the subsequent earnings and code the extent of the fall in the right-hand columns.

QUESTION 16 Pension

Only include if a pension scheme has been worked out in relation to the business, or is available from an insurance company or another body, because of the nature of the business or self-employment. Note that provision is made in a series of questions on this page for entries to be made in the office (Qs 16a, 16b, 17a, 18c). Much depends, however, on the information you can provide in boxes on the left, leaving us to make necessary calculations.

PURELY PRIVATE TRANSPORT IN CAR AVERAGE 30 mls PER WEEK. FOR TRANSPORT TO 9 FROM WORK USED EVERY DAY TO CARRY LADDERS PAINT ETC. 200 miles fet week.

230 miles fee week = 11,960

HOUSE TELEPHONE IS NAINLY FOR BUSINESS PURPOSES-ACCOUNTS ETC PREPARED AT HOME TOO 9 PAINTS ETC KEPT IN 2 SHEDS IN THE GARDEN.

QUESTION 19 Cheap goods and services

You should normally expect positive answers. A garage-owner may be able to purchase a car and run it well below ordinary retail prices. A grocer will obtain household stores cheaply. An insurance company sometimes reduces certain premiums. A small-holder may receive supplies cheaply in exchange for produce at market costs, There are exchange arrangements between people in different trades. It will, of course, be difficult to explore all these things properly but Q. 19a conveys our object and you should probe carefully whenever possible.

QUESTION 20 Tax savings because of combined home and business

The real incomes of many self-employed persons tend to be underestimated. Their difficulties are not always easy to explain to the tax authorities and in practice low real incomes and insecure incomes are compensated because part of housing and other costs can be offset against tax. Ask the questions openly and straightforwardly.

If informants seem doubtful about answering, say: "We have nothing at all to do with the tax people. We know it is difficult for you to divide costs between the business and yourself. But we also know that even if they have more problems many self-employed persons can live a little more cheaply than people getting a salary. I wonder whether you'd mind guessing how much more cheaply—I mean because of savings of tax".

QUESTION 13 Fluctuation in Income

The self-employed will often have an income that fluctuates throughout the year — especially those on low incomes. For example, the scrap dealer or stall-holder may not do as well in the winter as he does in the summer. The professional architect and the free-lance photographer may be paid at very irregular intervals. We are particularly interested in fluctuations which may produce hardship for a household which is usually prosperous. But remember that though income may fluctuate (e.g. in winter, for a shop-keeper or free-lance interviewer the same amounts per month may be drawn out of the bank or spent. Living standards are not necessarily affected.

QUESTION 14 Second job

This will have been established in the earlier section on Employment. Repeat the question because earnings from subsidiary occupations tend to be forgotten. For example, painters and decorators may have done one remunerative weekend job for a few weeks several months earlier in the year. A gardener may have done some intensive paid work for various local people in the evenings and weekends of the summer months. Or a university lecturer may have had a remunerative consultancy or a series of well-paid broadcasts at some point in the year. Remember that extra earnings from a source other than usual employment may not be thought of as a second job. You should probe for all kinds of additional earnings, depending on the nature of the usual employment.

QUESTION 15
This is laid out as concisely as possible on one page and you are asked to ring 01, 02, 03, etc., as appropriate and then to enter the rates per week and amounts below, carefully writing in the code "01" (i.e. Family Allowances) "02" (i.e. Retirement Pension) and so on so that we are clearly aware of the allowances to which the amounts

refer.

Amounts will sometimes be joint—e.g. retirement pension for man and wife—or will be for several members of the household—e.g. sickness benefit for man and wife and children. In these instances the amount should be entered (if necessary, after the interview) in one column only, under that member of household receiving the payment. Wherever possible encourage informants (especially when elderly) to show you the allowance or pension book.

CODE 01 Family Allowances

CODE Of Family	Anowa	inces	First child	Second	Third	Fourth & subsequent	
up to April 1968			nil	8s.	10s.	15s.	
after April 1968			nil	15s.	17s.	17s.	
counting children	under	15 or	up to 19 if	still in full-ti	me educat	tion or college	or an
apprentice on low							
CODE 02 Retirer	ment P	ension	1	1 T		no maid if motino	mont

Note that the actual amounts vary widely. Increased pensions are paid if retirement is deferred. There are now in addition small graduated state pensions (averaging about 3s.) and pensions may be reduced because of earnings or a deficient contribution record. Note that some of these points also apply to other benefits. Pensions and supplementary benefits can be combined in a single payment. You will be prompting for supplementary benefit and wherever possible we should like you to list the amount separately (as well as the fact that it is being received). But whenever the rate given to you exceeds the standard rate below you should check the reason.

Single person (husbard)

CODE 03 Standard Widow's	Pens	ion	
2nd dependent child			17s. 0d.
1st dependent child			£1 5s. 0d.
Wife's income			£2 16s. 0d.
Single person (husband)			£4 10s. 0d.

Note: not the widow's Pension
Note: not the widow's allowance which is paid for the first 26 weeks after widowhood.

2nd child						14s.		
3rd and sub	sequent	child			£1	12s.	6a.	

Single person			10s.	
Married woman		£2	16s.	
1st dependent child		£1	5s.	
Each subsequent child			17s.	Ua

CODES 08 and 09 Industrial and Disablement Pensions

The 100 per cent rate is £7 12s. 0d. (with additions for dependants). CODE 09:
Note that these are war pensions, not service pensions included under occupational pensions later in Q. 19. pensions rater in Q. 19.

CODE 10 Maternity Allowance

The standard rate of maternity allowance is £4 a week. It is paid to women who have been paying full national insurance contributions. It begins 11 weeks before the expected confinement and ends after the sixth week following it.

expected confinement and ends after the sixth week following it.

CODE 11 Maternity Grant
This grant is \$22 either for home or hospital confinement.

CODE 14 Single Grant
This is officially described as an exceptional needs grant. The Ministry of Social
This is officially described as an exceptional needs grant. The Ministry of Social
Security has replaced the former National Assistance Board and you may need to
explain "a grant from the Assistance". Probe carefully for this for all income units
who are not employed, whether or not they receive supplementary benefit. A large
number of people obtain single grants, e.g. for spectacles or dentures, even though they
are not normally eligible to receive supplementary benefit. Note also that since you
are asking about a period of 12 months there will be instances of people now in work
who obtained a grant at an earlier point in the year.

22 who 0 18 -27 " " 32 -" 37 -3 "

V SAVINGS AND ASSETS

QUESTION 1 Personal

This excludes a business bank account which is covered by Q. 4. Avoid ele-counting the same bank balance or assets when questioning husband

QUESTION 2 Savings

Note that you should proceed by prompting all items to see how many are appropriate, then try to establish a total and then establish totals for each item only as a check or if necessary. Care should be taken to avoid double-counting. If the informant is hesitant or confused repeat the question to make sure he or she knows what kind of savings you are referring to and THEN show Flashcard No. 4 to get the total. Then try to obtain an absolute total rather than a range. For example, you could ask: "Would you say the figure was at the top end or the lower end of that range—nearer X or nearer Y?"

QUESTION 2(c) Interest

Try to establish the amounts the informant receives in the form he receives it—that is, before tax is deducted or after it has been deducted at source. In difficult instances you need not waste time converting a "before tax" total into "after tax" so long as you make plain what it is. We will do that work in the office.

QUESTION 3 Value of stocks and shares

This question of the value of stocks and shares is crucial and every encouragement should be used to obtain an answer. Some informants simply will not know. Remember that brokers sometimes send an annual valuation. If there is considerable uncertainty, tactfully suggest or imply that it would be very helpful to know and take any opportunity to see the valuation or to leave a note (and s.a.e.) so that a more reliable estimate can be made and either you can pick it up at a second call or ask for it to be sent on to be sent on.

QUESTION 3(b) Interest

Proceed as in $\mathbf{Q}.$ 2c above. Mostly amounts will be received after tax has been deducted.

QUESTION 4

QUESTION 4

This is to cover any type of business which is owned in part or in whole by the informant. Being a director does not necessarily mean owner-ship. The answer to this question should not duplicate the answer to the previous question. Shares come under Q. 3. This is to cover such things as shops, professional practices and small businesses of every kind except limited companies. In all cases make sure that money in the business, bank account and stocks are borne in mind when the valuation is made. When the business (e.g. shop or farm) is run from the owner occupier's dwelling, the value of the dwelling will often have been included in the answer to this question (i.e. Q. 25 in Section V). UNDER NO CIRCUMSTANCES MUST THE DWELLING BE COUNTED TWICE. The valuation should be on the assumption that the informant had to sell but was in no great hurry. A year or even more could be taken to find a purchaser. The valuation should NOT be made on the basis of: "What would you take for your business?" — that is, when the informant has to be persuaded to sell. NOTE that vehicles should be included in the valuation of a business — say of a haulage contractor, a cab owner or even a building contractor or window cleaner. window cleaner.

QUESTION 5 Other property

Remember that some people use two houses. Others have houses which they rent off to others. This last is not uncommon among elderly people who may be very poor themselves, A "boat" may include anything from a luxury yacht to a small rowing boat.

INTO SAVINGS A/C OF ANY SURT.

402 FOUND THIS DIFFICULT TO ESTINATE BOT AGREED ON \$400 200 FOR VEHICLE " LADDERS 9 BRUSHES STOCK WALLPADER PAINTS 50 GOODWILL (IF 1100

QUESTION 6a Cars, Vans

Note that in Section II you will have noted any car owned by the business or firm and whether it is also used privately. Do not count this car here also but find out whether there is a second car—e.g. wife's. If informant unable to value a vehicle note instead its make, type and year of manufacture to enable us to look up its value.

QUESTION 6c Debts on vehicles

Note that the question does not apply only to payments which are overdue but to the total sum still owing. You will usually have difficulty in excluding interest from the amount owed. If the amount owed is estimated at less than £50 record the sum and do not take up time making sure that the interest is deducted. But if the amount owed including the interest element is £50 or more ask for the details listed under (c). We will then make an estimate in the office.

QUESTION 7 Life Insurance

If there is more than one policy add up the payments and, if necessary, note any difference in frequency or years of payment. Note that our main object is to establish the equivalent current value in cash of policies they hold. The majority of households will hold policies of little current value and you will see that if they pay less than 10s. a week we do not ask for any details.

02 EXPLAINED -

lojes AGO HE WAS INSURED FOR \$50

QUESTION 8 Value of saleable assets

Please note that we do not envisage that goods in everyday use — beds,

HYES " CHAMGED IT TO HOCO Blankets, basic furniture, crockery, clothes — need to be valued. We are
interested only in items of value that could be sold without serious detriment to the household and its daily life if some ready cash was badly
eneeded. Jewellery, furs, stamp collections, works of art, antiques, and
collections of books, might be sold and we need to obtain an approximate
estimate of their total current worth. Naturally enough we cannot expect
precise valuations and you will find the minimum value of £25 for an
article (or a group of articles — e.g. a number of pieces of jewellery)
helpful in avoiding protracted discussion of the value of articles used every
day in the home. day in the home.

QUESTION 9 Other assets

Rarely will there be any kind of asset not covered by our other questions. But by asking this general question you may be given information that belongs in the answer to another question. The informant may have misunderstood a question. But be careful not to include an item here which is already covered elsewhere.

QUESTIONS 10 & 11 General assets sold and windfalls

It may be difficult for you to secure an estimate of money raised or spent on "ordinary living expenses" but you will find that our object is fairly clear and once you understand it you can probe for an estimate. We do not want information about sums of money invested in new assets, in replacing old assets (e.g. property, including houses and cars) and in savings, but only information about sums of money spent in the ordinary way on housekeeping, food, clothing, and entertainment. An estimate is better than nothing. Note that we are not asking you to waste time checking small amounts of less than £25.

QUESTION 10 Assets sold in last 12 months

Some people, especially the elderly, will have sold some of their assets in the last 12 months to bolster a low income. This can be an important contribution to their standard of living. Savings—Note that each item should be prompted carefully, especially to persons who have already told you they have sizeable amounts in savings, stocks and shares, etc. Note that we are not interested in this question in total sums which amount to less than £25 in the 12 months. Nor are we interested in amounts that may have been saved from income and spent in the same year (e.g. savings for Christmas or a holiday).

Partial use of sales or savings for living expenses—In some cases property might have been sold, say, and part of the money spent but part of it saved. Try to get a total estimate only of the sum spent on ordinary living expenses.

QUESTION 11 "Windfalls"

The procedure is the same as in the last question (Q. 10). Remember that for some people an occasional windfall is the only hope they have of getting out of debt, and please make a note if you come across any interesting example.

QUESTION 12 Hire purchase

The informant may know neither the total amounts nor the amounts less interest which are owed. If the total is less than £25 simply write it in and do not waste time asking detailed questions about original price, etc. Otherwise ask each of the questions and tick the box if any documents are seen. Sometimes there may be several large items and you may need to use the margins on the page for any additional notes. Remember that we are concerned to establish the total owed altogether, less interest, and so long as this can be estimated you should not be concerned to take up time with every subsidiary question. If you cannot get the informant to give an estimate of the total owed less interest and succeed only in answering the questions under (a) you can leave to the office the job of estimating and writing in the total.

QUESTION 14 Rent or mortgage arrears

As elsewhere, remember to write in an amount in only one column (not in two columns, e.g. wife and husband). The amount should be debited to the person who normally pays the rent or the mortgage payments. Do not trouble to calculate the exact total amount owed. You have asked about the weekly or monthly payments earlier and so long as you tell us the number of payments (and whether weekly or monthly) we can calculate the figure in the office.

ABOUT SO CUSTONERS OWE OUTSTANDING ALCS AT PRESENT. POSSIBLY ABOUT 1650 OUTSTANDING AT THIS DATE

QUESTION 17 Total assets

Like the question at the end of the Income section, this question is designed to be used when an informant does not wish to go into detail or finds great difficulty, either in the first or in a subsequent interview, in answering preceding questions. Encourage him or her to help you gain at least a broad estimate of total assets, but remember this includes the value of any owner-occupied house, a car, the surrender value of any life insurance policy and personal possessions of value, as well as any savings or stocks and shares. Again, try to get a separate estimate for each income unit in the household, and if the informant shows willingness to go back to the preceding detailed questions encourage him to do so. Try if you can to get the informant to give an exact figure rather than a range.

QUESTION 4 Special schools & centres

This question is asked only of persons who have been ill and off work or confined to bed or the house for eight weeks or more continuously, and those who are coded for any item in Question 3.

QUESTION 5 Date of onset of sickness or disabling condition

Our object is to establish the year of onset but the question is worded 'first have any condition" so as to allow for the fact that some conditions develop out of others. For persons with a disabling condition you ask, in effect, when all the trouble started.

Previous occupation

In the section on Employment you have already asked for the last occupation of everyone not now at work (p. 7). Some people change their occupation because of a disabling condition before finally being obliged to give up work. You should probe for the (previous) occupation which people had before any history of illness or disability started.

QUESTION 6 Mobility

You should code people according to their usual mobility, taking no account of a temporary illness or injury. "Usual mobility" may be interpreted as "for at least eight weeks and unlikely to become more mobile in the immediate future" or "for less than eight weeks but unlikely to become more mobile within at least that total period." Someone who spends most of the time in bed and needs help to get out to sit in a chair is defined as bedfast. Someone who can get out of his bed into a chair or wheelchair and who can walk indoors but not even a few yards outdoors without help is defined as housebound. The test is whether someone can walk on his own (without the assistance or company of any other person — though with or without sticks or crutches). without sticks or crutches)

QUESTION 7 Incapacity

In prompting this series of questions you may find it simplest to ask the question without the variation in brackets, unless it seems appropriate. Remember you are asking whether they have any difficulty in doing X. Sometimes certain questions will not apply to particular people or to particular situations. You will meet people who do not (or say they do not) wash down, negotiate stairs (living in bungalows), go shopping and do housework (especially some men). The question should then be asked in terms of "But would you have any difficulty in doing X if you had to?" The codes 0, 1, 2 are listed in increasing order of difficulty and you should check that you ring one of them for each item.

QUESTION 7e

It would be insensitive and unnecessary to ask questions about the daily activities of the bedfast. They are therefore excluded from this question and the rest of the series. You may encounter other people (e.g. advanced properties of the series. You may encounter other people (e.g. advanced consists) of whom it is clear that they cannot do certain activities. You may refrain from putting questions to them. The same is true of any situations in which the questions are likely to cause great distress. BUT AS A GENERAL RULE QUESTIONS 7 (e) to (i) SHOULD BE ASKED FOR ALL OTHER THAN THE BEDFAST AND CHAIRFAST.

QUESTIONS 8 & 9 Variation in incapacity

These questions explore whether the pattern of answers to Question 7 is permanent. Question 8 seeks any indication of seasonal variations (e.g. bronchitis) and Question 9 day-to-day variations in the effects of disability.

5 A OI DEVELOPED ASTHRA WHEN HEED 2 YRS.

7 (E) OI SUFFERS FROM ASTHMA9

CHRENIC BRONCHITIS - IS RATHER DELICHTE, BUT SHE HAS LEARNED TO LIVE WITH IT. AND IN WINTER MONTHS IS AS BUCH AS POSSIBLE. SHE ALSO THE ANGUNT 9 TYPE OF SULTS

HOUSEWORK SHE DOES TO THE WAY SHE IS FEELING EACH DAY

VII SOCIAL SERVICES

General

It is assumed that the housewife will normally be the informant. It is also assumed that she will generally be the "parent" to whom many of the questions are addressed. If in fact there is another mother in the household with a child then you may accept answers by a proxy (i.e. the housewife). You should also use your discretion about the housewife's ability to answer questions about the visits to hospital, doctor or dentist by each member of the household. If she plainly does not know or is uncertain you should check the appropriate questions when you come to ask earners in the household Sections II, III & IV. If this still does not involve the right members of the household you must check directly with them. Remember to code carefully since the questions vary as to whom they apply. We have repeated instructions at the head of each question to help you.

QUESTION 1 Welfare milk

Tokens are obtained from the Ministry of Social Security and handed to the milkman. All families with children under 5 can obtain a pint of milk for each child for each day for 6d. per pint cheaper than retail prices. Free milk tokens have to be claimed separately, and few parents claim them (other than those getting supplementary benefits).

QUESTION 2

Child welfare clinics are provided by local authority health departments. A visit to an ordinary hospital out-patient department does not count. Cod liver oil and orange juice are the main goods which may be purchased below normal shop prices. "Ever visited" means for the informant herself to obtain advice concerning herself or her child or to obtain goods. Accompanying another mother does not count.

QUESTION 3 Baby in hospital

It is possible there may be two mothers in the household. On the National Health means free in a National Health Service hospital contracted to the N.H.S.

QUESTION 4 Type of school

Write in the name of each school on the left. The parent will usually know the type of school but if he or she does not or is doubtful the interviewer may know. If in doubt please verify from the Education Department or a teacher who knows about the local schools. If the child is aged 16 or over and is at an institute, college or school (of commerce, for example), list under Q. 12.

Type	Maintained day nursery, nursery school or cl	lass		
of	Private nursery school or nursery class

Whether built pre- or post-1940

Again, the parent may not know or may be unsure. Check if necessary.

QUESTION 5 School meals

Normally means when neither sick nor in the holidays. Did the child last week have school meals if attending school? If not attending school, when last attending school. Free school meals are provided to poorer children on a means test basis.

QUESTION 5(c) No facilities

There really are schools which do not offer school meals either because they lack dining space or there are too many children for the space available or for other reasons.

QUESTION 7 Days absent from school

Absences due to visiting an out-patient department or a dentist should

QUESTION 8 Boarding school

If the child boards at a school which is primarily a day school code the answer "yes".

General

OH ATTENDS PRIMARY SCHOOL STILL HOUSED IN OLD BUILDING - BUILT 1880 .

03 ATTENDS SENIOR SELTION -

LAST YEAR

NEW SCHOOL COMPLETED

WAS OFF SCHOOL FOR 3 DAYS LAST TERN WHEN NOTHER WAS ILL IN BED.

QUESTION 14 Fuel

Everyone forgets to order coal. Stress "through lack of money".

QUESTION 15 Birthday parties

Again the emphasis is on the expense and the experience of bringing the child's friends into the home, so stress that we don't mean just a family party.

QUESTION 17 (a) Social class

QUESTION 17 (a) Social class

This question requires the views of both chief wage-earner (head of household) and housewife. By "chief wage-earner" we mean the person upon whose earnings the housekeeping income primarily depends. By "Head of Household" we have in mind the alternative person to be questioned if there is no chief wage-earner, e.g. a husband who is a retirement pensioner, or a widowed mother (who may be the tenant) living with her widowed daughter (the housewife) and grandchildren. As far as possible the views on social class should be sought from each person independently. If both are present take the question stage by stage, making sure both answer before passing on. The question asks first for a self-rating, which must be written down. At this stage avoid putting names of classes into people's heads. People often hesitate awkwardly, so try to get the informant to say what class she thinks she belongs to or "is nearest to". Prompt by repeating the question carefully, and say "It's what you think", implying (which is true) that everyone has their own idea and each is equally valid. Do not strain to get an answer if one is not easily forthcoming. Do not assume the informant will pick one class only. Multiple choices of "middle and working" or "professional and working" are allowed.

QUESTION 17 (b) Determinant of class

Code housewife and chief wage-earner only. Next, to give us a clue as to what the informant is using as a reference point and scale we ask, in effect, the informant's idea of what determines "class". Try to get the most important one only.

QUESTION 17 (c) Names of classes

Third, the informant is presented with a flash-card (this is why husband and wife should if possible be interviewed separately, since otherwise the second person may be unduly influenced). Code one item only. If informant wants (again) to say "None", say 'Well, I've got to put something down, which would you think was nearest?" This rating is the most important bit of the question. Do not be puzzled if the wife gives a different answer from the husband. This is quite common.

QUESTION 17 (d) Father's main occupation

That is, the occupation held for most of the time (not necessarily the most recent)

QUESTION 18 Well off

Four comparisons are made in this series of questions—with relatives, with other people (note—of the same age) in locality, with the average in the country and finally in the context of time. Prompt carefully and remember that you might get a different response for one comparison than for another.

OL'S FATHER DIED WHEN HE WAS BORN 9 HE COULD NOT BE VERY OF HIS FATHER'S EXACT PESITION BOT IS PRETTY SURE HE NOT A SKILLED HAN. HE WAS 65 YES GOD WHEN HE DIED

AND WAS OFTEN OUT OF WORK

QUESTION 19 Housekeeping and board

The question refers to ALL INCOME RECIPIENTS including pensioners, as well as earners, who contribute to the housekeeping expenses. Be careful that you probe for everyone in the house, including adolescent earners. Sometimes the actual sum available for housekeeping will be quite different from that sugested by the total income of the household. The husband or teenagers may retain quite large sums not only for their own use but because the pattern of responsibility in one household for expenditure may be different from that in another household which has the same composition. Housekeeping can be a touchy point if both husband and wife are present, and it is perhaps best dealt with by interviewing one of them on their own (the housewife preferably) and, if possible, checking later with the other (the husband). If both husband and wife are present avoid expressing any surprise or criticism if you think the housekeeping is small. Also avoid indicating any opinion on the question of whether wage-earners should pay bills. Try to imply that all arrangements are equally possible. We have listed the common ones, but there will be others. REMEMBER TO CODE EACH INCOME RECIPIENT. The question refers to ALL INCOME RECIPIENTS including pension-

QUESTION 19 (b) Money back

This can be daily fares, insurances or clubs paid, dinner money, or simply "spending money". Some teenagers hand over their wages but get clothing bought. Usually this question will apply to teenagers, but some husbands may get money from the housekeeping for their cigarettes and beer mid-week.

QUESTION 19 (c) Payment of housekeeping bills

Often the husband will pay some larger bills, but alternatively he may pay housekeeping but expect to "help out" if a heavy bill comes in. We realise that an estimate may be rough but try to get an average contribution. Teenage children may buy food as "treats" for the household from the money they retain. Again try for an average.

HOUSEHOLD REPLACEMENTS

HUSBAND PAYS

QUESTION 20 Long-term saving

We are not interested in asking here whether the informant has savings that was asked in Section V). Nor are we interested here in asking for short-term saving. Instead the question explores whether at the present time the informant manages to put aside savings for a long-term objective.

QUESTION 21 Ten years ago

To give us some idea of fluctuating fortunes we ask what things were like ten years ago. Some persons aged 35 or over will have been at home in their parents' households ten years ago and therefore we have to find what was the composition of the household. In any case, we require an estimate of the total money flowing into the household, and the number of adults and children that were supported at that time. Give the informant time to recollect. And check that income includes pensions, family allowances, etc. Fortunately, the informant will already have some idea of what you are after from the detailed questions asked earlier.
