Name of Interviewer M. A. Malav

Date(s) of interview(s) Monday 12th May
or contacts 02

Length of interview(s) 2 1/2 hrs.

Total actual interviewing time 3 hrs.

Form of introduction

"My name is X. I'm from Essex/London University. We're preparing a report (writing a book) about standards of living in Britain today and how families manage. We think it's important for the Government and everyone else to know what the facts really are. We're hoping to talk to about 3,000 families throughout the country and I'd be very grateful if you could help us by answering some questions. All our information is, of course, strictly confidential."

QUESTION 5

Note that the recent Industrial Employment Act gives employers the responsibility of notifying employees about certain terms of service. Many employees will have received some kind of notification.

QUESTION 6 Whether sick pay

Include only when employer pays cash directly to an employee who is sick. Contributions towards medical care costs come under Q. 11. Ideally we would like to have details of sick pay expected and length of time employer is expected to go on paying. (Sometimes a man is paid one proportion of pay for 3 months and then a lower proportion for a further 3 months.) Many informants, however, will not know and you should do your best to get a general idea at least of the starting level for the first month, recording underneath more specific information if known.

Sick pay amount What should be entered here is costs paid by employer. Sickness benefit should not be included even though employers contribute towards it. Earnings means earnings before tax.

QUESTION 7 Pension

Include any type of occupational pension, contributory or non-contributory, funded or unfunded.

QUESTION 7a Employee's contribution

Note that we are not attempting to establish what the employer pays, because many informants will not know. We require amount paid (preferably) or per cent of earnings before tax; many schemes are not of the type that the employer pays a fixed proportion of earnings. In these instances, code "None" or "Does not apply", according to the information you are given. When given a percentage note that it may be calculated on basic wages rather than earnings and you should note this so that we can adjust the figure in the office. Estimate the proportion of normal earnings the previous contribution amounts to — correct to nearest percentage point unless respondent names half a percentage point.

QUESTION 7b Pensionable age

That is, the age at which the pension is first payable.

QUESTION 7c Years towards pension

Do not count any years towards another pension in a previous employment unless those years have been accepted by the present employer as counting towards the pension from his employment.

QUESTION 7d Amount of pension

The question refers to the total occupational pension, though part of the cost may be paid by the informant. If the informant knows more details about his entitlement enter information in box (e.g. two-thirds of salary in last 5 years of service).

QUESTION 8 Meal vouchers

You may have to build up towards the average weekly value by asking "How much is each voucher worth?", "How many do you use in an average week?". Generally vouchers are additional to wage or salary but sometimes the employer will include them on a pay slip as part of earnings received. Watch that you do not count their value both here and later under net earnings.

QUESTION 9 Subsidised meals

Meals include drinks that may accompany them though we think it might cause offence to ask this in a formal question. We are interested to learn of anything from subsidised canteen meals to expense account lunches and dinners.

QUESTION 9a Saving on meals

Note that we are seeking an estimate of the difference between the actual cost to the employee and what he would have spent in the ordinary way if there were no subsidised canteen or restaurant available, or if his work did not allow him to charge the cost of outside meals. We are not seeking an estimate of the real value of the meals. Since some employees may not spend more outside on a poorer meal than they spend inside for a subsidised one, some entries may be "0" shillings.

QUESTION 9 Staying overnight

The question concentrates on holidays and stays which are directly or indirectly paid for or subsidised by relatives and friends. It may be difficult to obtain an estimate of saving. We have in mind not only the instance of holiday but also an elderly person or a child staying with a member of the family for a lengthy period of the year during a time of loneliness or financial difficulty. Note that space allows only 8 columns on this page. In the unlikely event of interviewing in a household with 9 or 10 persons write in the details for the 9th and 10th persons lower on the page.

QUESTION 9 (b) Saving

Note that there are two alternatives in the question. The saving from staying in a relative's or a friend's home should be estimated in terms of the comparable cost of living at home. The saving from being taken on holiday should be estimated in terms of the cost of going on holiday on one's own.

QUESTION 10 Visitors

This question reverses Q. 9 but estimates of cost should be written into the column allocated for the housewife.
