	VIII	Private Income in Kind
	IX	Style of Living

A Survey carried out from the University of Essex and the University of London (L.S.E.)

Queries should be addressed to: Miss Sheila Benson Skepper House 13 Endsleigh Street London WC1

C.I.C. SERIAL NUMBER 2 aberly Name of Interviewer... 1'2 hrs. Length of interview(s) Date(s) of interview(s). or contacts Total actual interviewing time.....

Form of introduction

"My name is X. I'm from Essex/London University. We're preparing a report (writing a book) about standards of living in Britain today and how families manage. We think it's important for the Government and everyone else to know what the facts really are. We're hoping to talk to about 3,000 families throughout the country and I'd be very grateful if you could help us by answering some questions. All our information is, of course, strictly confidential."

SECTION II EMPLOYMENT

General

2nd is said to look after her invalid mother - in theory water to he week but in practice is never pinistred

This section and the next (Occupational Facilities) should normally be asked of each adult earner in the household. If you happen to be interviewing the housewife during the day you should ask these questions as they apply to herself (and also to any children and adult dependants—e.g. elderly widowed mother) and then a separate (shorter) interview with the husband (and any other adult earner who is not available at the time of the first interview) to ask him for answers to this section, to the section on occupational facilities, to the questions on earnings in Section IV and any other questions which cannot be answered by the housewife.

QUESTION 1 Attended paid employment

All persons working for gain. If a housewife, retired person or even a schoolchild works a few hours for pay each week, he or she should be included. Also count man who is not at his main occupation (and even who may be thought of as unemployable) but who has pay from a minor job. We will be able to check in analysis. Our purpose is not to miss casual earnings and supplementary sources of income.

QUESTION 2 Two jobs

If a person does some kind of job for a different employer or on own behalf in his "spare" time this counts as a second job. Even if it is the same kind of job but is separately paid for (e.g. decorator working in spare time for himself) it should be counted as second job.

QUESTION 3 House or flat

Includes house combined with business premises or farm; but the question has been introduced primarily to cater for women home-workers on piece rates. Note that it refers to any second as well as the principal job.

QUESTION 4 Starting and finishing work times

The question applies to last week. Ignore variations in working hours from week to week. If working times were the same on at least three days of the week regard them as "usual". If there were two shifts (e.g. morning and evening), list according to starting time of the first and finishing time of the second, and note fact on left.

QUESTION 5 Aid in calculating hours of work

The table below assumes a 5-day week and 1 hour for lunch. Note that each digit should be put in each separate part of the box (i.e. one digit under No. 29 and the other under No. 30).

Starting time	Finishing time							
time	4.30 p.m.	5.00 p.m.	5.30 p.m.	6.00 p.m.				
7.00 a.m. 7.30 a.m. 8.00 a.m. 8.30 a.m. 9.00 a.m. 9.30 a.m.	42½ 40 37½ 35 32½ 30 27⅓	$ \begin{array}{r} 45 \\ 42\frac{1}{2} \\ 40 \\ 37\frac{1}{2} \\ 35 \\ 32\frac{1}{2} \\ 30 \end{array} $	$47\frac{1}{2}$ 45 $42\frac{1}{2}$ 40 $37\frac{1}{2}$ 35 $32\frac{1}{3}$	50 47½ 45 42½ 40 35½ 35				

QUESTION 6 NOT AT WORK

QUESTION 6 NOT AT WORK

Note that this question must also be answered for persons working last week for less than 30 hours Unemployed: as distinct from "off sick" or temporarily off work (e.g. on holiday). The replies will be, for example: "I lost my job"; "Tim out of a job"; "There was redundancy at the firm so I'm out of work for the moment". Sometimes a person may say he is both unemployed AND sick or disabled, or it may for other reasons be difficult to specify just one code. Accept the best answer given by the informant even if you observe that someone who says he is unemployed is obviously sick or disabled (and vice-versa). Later questions are designed to establish whether or not he is seeking work and whether or not he is chronically sick or disabled.

Unpaid holiday

Part of our purpose in asking if holidays are unpaid is to ensure that 5 is not coded rather than the underlying reasons coded as 7, 8 or 9. Distinguishing between paid and unpaid holidays introduces complications but may be worthwhile (a) for the opportunity afforded to probe the reasons an unpaid holiday is being taken and (b) later when calculating weeks not at work in previous year.

Do these questions apply to 2nd - tho' officially employed by lup to look after her the home, she would not would be paid full

Obviously the gets all her meals anythow. I have since been

told that 2nd also received \$2-0-0 week QUESTION 76 Pensionable age from another ord lady illage, to go in daily < helpher

QUESTION 5

Note that the recent Industrial Employment Act gives employers the responsibility of notifying employees about certain terms of service. Many employees will have received some kind of notification.

QUESTION 6 Whether sick pay

Include only when employer pays cash directly to an employee who is sick. Contributions towards medical care costs come under Q. 11. Ideally we would like to have details of sick pay expected and length of time employer is expected to go on paying. (Sometimes a man is paid one proportion of pay for 3 months and then a lower proportion for a further 3 months.) Many informants, however, will not know and you should do your best to get a general idea at least of the starting level for the first month, recording underneath more specific information if known.

Sick pay amount What should be entered here is costs paid by employer. Sickness benefit should not be included even though employers contribute towards it. Earnings means earnings before tax.

QUESTION 7 Pension

Include any type of occupational pension, contributory or non-contributory, funded or unfunded.

QUESTION 7a Employee's contribution

Note that we are not attempting to establish what the employer pays, because many informants will not know. We require amount paid (preferably) or per cent of earnings before tax: many schemes are not of the type that the employer pays a fixed proportion of earnings. In these instances, code "None" or "Does not apply", according to the information you are given. When given a percentage note that it may be calculated on basic wages rather than earnings and you should note this so that we can adjust the figure in the office. Estimate the proportion of normal earnings the previous contribution amounts to — correct to nearest percentage point unless respondent names half a percentage point.

That is, the age at which the pension is first payable.

QUESTION 7c Years towards pension

Do not count any years towards another pension in a previous employment unless those years have been accepted by the present employer as counting towards the pension from his employment.

QUESTION 7d Amount of pension

The question refers to the total occupational pension, though part of the cost may be paid by the informant. If the informant knows more details about his entitlement enter information in box (e.g. two-thirds of salary in last 5 years of service).

QUESTION 8 Meal vouchers

You may have to build up towards the average weekly value by asking "How much is each voucher worth?", "How many do you use in an average week?". Generally vouchers are additional to wage or salary but sometimes the employer will include them on a pay slip as part of earnings received. Watch that you do not count their value both here and later under net

QUESTION 9 Subsidised meals

Meals include drinks that may accompany them though we think it might cause offence to ask this in a formal question. We are interested to learn of anything from subsidised canteen meals to expense account lunches

QUESTION 9a Saving on meals

Note that we are seeking an estimate of the difference between the actual cost to the employee and what he would have spent in the ordinary way if there were no subsidised canteen or restaurant available, or if his work did not allow him to charge the cost of outside meals. We are not seeking an estimate of the real value of the meals. Since some employees may not spend more outside on a poorer meal than they spend inside for a subsidised one, some entries may be "O" shillings.

Some of These questions are not easy to answer. On the face of it, the shop belongs to Informant, but she is bedridden o quite feeble. 3rd answered all these questions, but like most of the small shops here, does not keep profession records

Tax was paid on £800 in 1968Obtain an estimate of total cost by the normal transport used. Some people who drive cars will offer their estimate of real cost but in such cases write in as indicated the average weekly mileage to and from work (not during work). In other instances assume 6d. per mile for all small cars (i.e. under 12 h.p.) and 8d. per mile for larger vehicles.

they received demand

5 miles @ 6d. = 2s. 6d. 10 miles @ 6d. = 5s. 0d. 50 miles @ 6d. = 25s. 0d. 100 miles @ 6d. = 50s. 0d.

5 miles @ 8d. = 3s. 4d. 10 miles @ 8d. = 6s. 8d. 50 miles @ 8d. = 33s. 4d. 100 miles @ 8d. = 66s. 8d.

for \$264 for years 1965-68.

QUESTION 9 Holiday pay

£6-£7 is drawn out weekly, plus

£4 pa 2nd.

Be careful not to include pay received simultaneously with holiday pay for any week of work. Remember that many wage earners only receive the basic wage during holidays, which is usually much lower than average

QUESTION 10 Sick pay

QUESTION 10 Sick pay

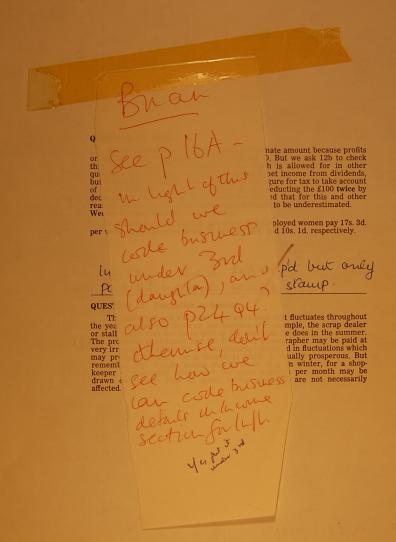

There are several practices. (1) Some employers (e.g. public services) automatically deduct national insurance sickness benefit for the worker and his dependants from pay during sickness (or sometimes expect him to report what sickness benefit he receives so that it may be deducted from later amounts of sick pay or even from the first weeks of earnings after recovery from sickness). (2) Others (mainly smaller private firms) deduct only the sickness benefit for the worker, ignoring what he may get for his dependants. (3) Still others deduct nothing for any sickness benefit for which a worker may be eligible. In the last two cases it might seem that the worker will be better off in sickness than at work. This is true for some, particularly salaried earners, but remember that if any employer pays anything to a wage-earner in sickness rarely does it exceed the basic wage. His average earnings may be much higher. (4) When the level of sick pay is small no deductions may be made for any sickness benefit. Changes in sick pay after the first weeks

In rare instances of persons who have been sick more than a few weeks

In rare instances of persons who have been sick more than a few weeks, the rate of sick pay will have changed. If the average is difficult to estimate write in the amounts thus: 4 weeks @ £10,4 @ £5 10s, etc. After deductions of tax, etc. Note if only the amount of pay before deductions is known.

QUESTION 11 Income of self-employed

The income of the self-employed and the provided ascertain. The income of the self-employed is sometimes difficult to ascertain. Four alternative methods of questioning that have been found to be helpful in previous research are listed. Our first aim is to find the figure for annual income before tax. Thus Q. 11 A(iv) is the crucial one and if you can get the answer to this do not press unduly for the answers to the preceding questions, but they are helpful in establishing that (iv) is in fact the figure you want. The alternative aim (if you cannot achieve the first) is to seek the amount obtained from the business, either Method B—net profit including money taken out for own use, or Method C, the sums actually taken out for personal use. Method D should only be tried if all else fails, and frankly, is not of much help. An accurate figure for income is important and you should if necessary take time to establish it. Method D "Turnover" = total receipts from sale of goods and services, less any discount allowed.

QUESTION 12 Income tax

The informant will often know the approximate amount because profits or income from business fall under Schedule D. But we ask 12b to check that the informant is not including tax which is allowed for in other questions. For example, elsewhere we establish net income from dividends, but if here the informant adds £100, say, to the figure for tax to take account of tax on dividends deducted at source, we risk deducting the £100 twice by deducting it here as well. You should be warned that for this and other reasons the net income of the self-employed tends to be underestimated.

Weekly National Insurance contribution

Self-employed warney 18s. per week Self-employed women per 17s. 2d.

Self-employed men pay 21s, per week, Self-employed women pay 17s, 3d, per week, Boys and girls under 18 pay 11s, 10d, and 10s, 1d, respectively, $\frac{1}{2}$

lub says she is selpemped but only pays the normal semple stamp.

QUESTION 13 Fluctuation in Income

The self-employed will often have an income that fluctuates throughout the year — especially those on low incomes. For example, the scrap dealer or stall-holder may not do as well in the winter as he does in the summer. The professional architect and the free-lance photographer may be paid at very irregular intervals. We are particularly interested in fluctuations which may produce hardship for a household which is usually prosperous. But remember that though income may fluctuate (e.g. in winter, for a shop-keeper or free-lance interviewer the same amounts per month may be drawn out of the bank or spent. Living standards are not necessarily affected.

Bran See p 16A in light of this Should we coshe business under 3rd (daughter), and also p2494. otherwise, devil see how we lan code busuess defails in home section for left. Yes Put it 3rd

QUESTION 29(c) Estimate of market rent

Proceed as for Q. 27(a)

QUESTION 30(a) Income from lodgers or boarders

Be careful not to obtain an inflated total. Amounts may vary according to numbers of boarders and, if necessary, write down separate amounts on this page. If the informant has difficulty in producting an average per week or total in year, obtain last week's GROSS income (taking into account number of boarders) and then work back to get an estimate for the year.

QUESTION 30(c) Net income

Carefully prompt for services and the cost of providing these services so that you can make an estimate of NET income—"profit" as some people will understand it. In some instances you will have to write down figures for gross amount received and an estimate of the cost of different services. If the informant does not know what his net income has been, make an estimate on the basis of what he tells you about gross payments and cost of services and expenses. Try to obtain a figure net of any tax paid. As before, note that if you cannot do this, you can strike out "after" tax in the box provided. We are asking you to provide a figure both for last week and last year. There may be changes in income (due to loss or arrival of boarders) during the year which are revealed in interview. Remember also that costs may be as great or even greater than receipts. In these cases write in "O" and make a note.

QUESTION 32 Value of own food or poultry

Try to obtain a weekly average of the value of using own garden, allotment and farm produce. Do not waste too much time on produce amounting in value to less than 10s. a week. Be careful not to give an inflated estimate of the saving. Husbands sometimes exaggerate the value of what they grow in a large garden. What you want is an estimate of what it would cost in the shops to purchase the kind of produce consumed in the home which is grown by the household, LESS all expenses. For a small-holding or farm this means taking account of purchases of stock or seed, wages, payments of fuel bills, etc., in the same way as earlier you explored the income of the self-employed.

QUESTION 33 Total income last year

In some instances you may have difficulty with an informant who, though willing to answer other questions, is unwilling to answer questions on income, or an informant who is vague or uncertain about details. By adopting a matter of fact approach or by coming back to these questions after dealing with the rest of the questionnaire in an interview, you may overcome the difficulty. If the questions remain unanswered, try the question here as given, adding any other explanation according to your individual style or to the circumstances of the situation. Show the Flashcard and the do your best to arrive at a specific amount. Also do your best to check: "Does that include family allowances, pensions, etc.?" You may be surprised sometimes to find that the informant gradually undends and is prepared to answer many preceding questions. You should also do your best to check whether the total given includes other income units in the household. Try to establish totals for these units in the same way.

Tub+ 3 agreed that rotal income for the whole barnily including pension, 2 incomes for 2nd & carrings for shop could not be more than 48-20 wk

IX STYLE OF LIVING

This section aims to find out some ways in which people spend their time, how they manage on their incomes, what kinds of things they buy and do, and how they feel about their situation. Most of the questions are pre-coded (but interviewers are urged to write any interesting comments on the blank spaces in the questionnaire or on the back). It is hoped that the answers will put some flesh on the income skeleton you have painstakingly built up in the rest of the questionnaire.

QUESTION 1 Holidays

Note that this question immediately follows Questions 9 and 10 of Section VIII. Question 9 of Section VIII refers only to staying in the homes of relatives and friends or being subsidised by them on a joint holiday. Question 1 in this section applies to all "holidays" (as understood by the informant) which are away from home, excluding only those which were spent actually in the homes of relatives or friends. If there was more than one holiday add together their duration and code accordingly in Question 1 (a)

QUESTION 2 Meals out

Care should be taken because people may forget meals which were incidental to the visit. By "snack" you should understand something more than a biscuit and cup of tea, say at least a sandwich. Note that in this question and in later questions there are certain persons whom it is not expected you should code. Thus children under the age of 15 should be coded DNA.

QUESTION 3 Friends to meals

Note that it is possible to code both "Yes, relative" and "Yes, friend".

QUESTION 4 Friends in to play

There are few simple questions which can be asked about the child's own standard of living and social life. Some homes are too poor for the child to bring his friends in, so stress in the house.

QUESTION 5 Afternoons and evenings out

The key point is entertainment for which someone spends money (youth clubs require entrance and weekly fees; scouts, guides, etc., require uniform and 'bus fares for outings). Examples of leisure-time activities will vary according to the age of the person to whom the question is addressed and you should probe accordingly. (Note that while we do not ask for amounts of expenditure we try to find the relative frequency of all forms of entertainments so that we can see how it varies with income.)

Prior has visited lay

QUESTION 6 Church

Accept any religious sect or denomination which may be mentioned.

QUESTION 19 Housekeeping and board

little about it

the tusiness is very small & most of its

vicome comes from clubs of cheques.

The question refers to ALL INCOME RECIPIENTS including pension-creful and well as earners, who contribute to the housekeeping expenses. Be careful that you probe for everyone in the house, including adolescent that the record of the fifteent from that suggested by the total income of the household. The fusband or teenagers may retain quite large sums not only for their own use but because the pattern of responsibility in one household for expenditure may be different from that in another household which has the same represent, and it is perhaps best dealt with by interviewing one of them on their own (the housewife preferably) and, if possible, checking later with the other (the husband). If both husband and wife are present avoid expressing any surprise or criticism if you think the housekeeping is small. Also avoid indicating any opinion on the question of whether wage-earners should pay bills. Try to imply that all arrangements are equally possible. We have listed the common ones, but there will be others. REMEMBER TO

QUESTION 19 (b) Money back

This can be daily fares, insurances or clubs paid, dinner money, or simply "spending money". Some teenagers hand over their wages but get clothing bought. Usually this question will apply to teenagers, but some husbands may get money from the housekeeping for their cigarettes and beer mid-week.

QUESTION 19 (c) Payment of housekeeping bills

Often the husband will pay some larger bills, but alternatively he may pay housekeeping but expect to "help out" if a heavy bill comes in. We realise that an estimate may be rough but try to get an average contribution. Teenage children may buy food as "treats" for the household from the money they retain. Again try for an average.

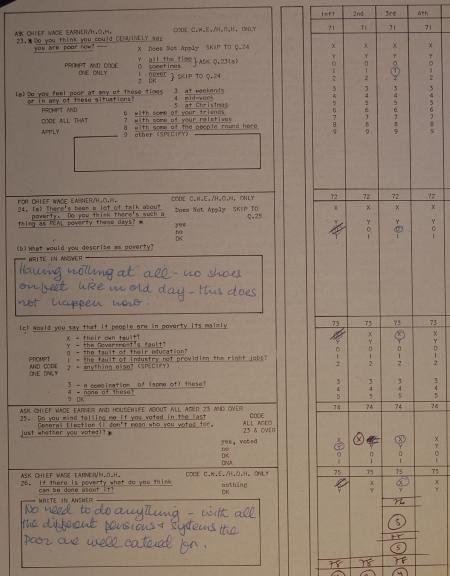

QUESTION 20 Long-term saving

We are not interested in asking here whether the informant has savings (that was asked in Section V). Nor are we interested here in asking for short-term saving. Instead the question explores whether at the present time the informant manages to put aside savings for a long-term objective.

QUESTION 21 Ten years ago

To give us some idea of fluctuating fortunes we ask what things were like ten years ago. Some persons aged 35 or over will have been at home in their parents' households ten years ago and therefore we have to find what was the composition of the household. In any case, we require an estimate of the total money flowing into the household, and the number of adults and children that were supported at that time. Give the informant time to recollect. And check that income includes pensions, family allowances, etc. Fortunately, the informant will already have some idea of what you are after from the detailed questions asked earlier.

Into gives her pension their money
