Table 8:

Percentage of persons entitled to supplementary benefit according to disability scores.

	0	1-2	3-6	7+	All
Received	2.8	10.6	18.8 24.6	31.6	6.3
Could not claim	90.3	54.1	39.4 51	19.0	80.9
At or above	4.6	23.1	31.2 41	34.2	9.86
Below	2.3	12.2	10.6	15.2	4.8
	100	100	100	100	100
	4707	518	421	342	5888

unclassifiable: 210

Table 8 shows two things. First it gives a crude standard of living. The important parts being those receiving benefits and those below the supplementary benefit level. Both increase with disability. A tab by age gives a similar trend (Tab 7/35). A better method of the standard of living in household income is %SB. Secondly, Table 8 shows that a large proportion of disabled persons who are below the government standard were not receiving supplementary benefits. A similar trend was found with age (See Tab 7/35).
